

Healthier Communities and Adult Social Care Scrutiny and Policy Development Committee

Wednesday 26 September 2018 at 4.00 pm

To be held at the Town Hall, Pinstone Street, Sheffield, S1 2HH

The Press and Public are Welcome to Attend

Membership

Councillor Pat Midgley (Chair), Sue Alston (Deputy Chair), Steve Ayris, David Barker, Mike Drabble, Adam Hurst, Talib Hussain, Francyne Johnson, Bob Johnson, Mike Levery, Martin Phipps, Chris Rosling-Josephs, Jackie Satur, Gail Smith and Garry Weatherall

Healthwatch Sheffield

Margaret Kilner and Clive Skelton (Observers)

Substitute Members

In accordance with the Constitution, Substitute Members may be provided for the above Committee Members as and when required.

PUBLIC ACCESS TO THE MEETING

The Healthier Communities and Adult Social Care Scrutiny Committee exercises an overview and scrutiny function in respect of the planning, policy development and monitoring of service performance and related issues together with other general issues relating to adult and community care services, within the Neighbourhoods area of Council activity and Adult Education services. It also scrutinises as appropriate the various local Health Services functions, with particular reference to those relating to the care of adults.

A copy of the agenda and reports is available on the Council's website at www.sheffield.gov.uk. You can also see the reports to be discussed at the meeting if you call at the First Point Reception, Town Hall, Pinstone Street entrance. The Reception is open between 9.00 am and 5.00 pm, Monday to Thursday and between 9.00 am and 4.45 pm. on Friday. You may not be allowed to see some reports because they contain confidential information. These items are usually marked * on the agenda.

Members of the public have the right to ask questions or submit petitions to Scrutiny Committee meetings and recording is allowed under the direction of the Chair. Please see the website or contact Democratic Services for further information regarding public questions and petitions and details of the Council's protocol on audio/visual recording and photography at council meetings.

Scrutiny Committee meetings are normally open to the public but sometimes the Committee may have to discuss an item in private. If this happens, you will be asked to leave. Any private items are normally left until last. If you would like to attend the meeting please report to the First Point Reception desk where you will be directed to the meeting room.

If you require any further information about this Scrutiny Committee, please contact Emily Standbrook-Shaw, Policy and Improvement Officer on 0114 27 35065 or [email emily.standbrook-shaw@sheffield.gov.uk](mailto:emily.standbrook-shaw@sheffield.gov.uk)

FACILITIES

There are public toilets available, with wheelchair access, on the ground floor of the Town Hall. Induction loop facilities are available in meeting rooms.

Access for people with mobility difficulties can be obtained through the ramp on the side to the main Town Hall entrance.

**HEALTHIER COMMUNITIES AND ADULT SOCIAL CARE SCRUTINY AND
POLICY DEVELOPMENT COMMITTEE AGENDA
26 SEPTEMBER 2018**

Order of Business

- 1. Welcome and Housekeeping Arrangements**
- 2. Apologies for Absence**
- 3. Exclusion of Public and Press**
To identify items where resolutions may be moved to exclude the press and public
- 4. Declarations of Interest** (Pages 1 - 4)
Members to declare any interests they have in the business to be considered at the meeting
- 5. Minutes of Previous Meeting** (Pages 5 - 10)
To approve the minutes of the meeting of the Committee held on 11th July, 2018
- 6. Public Questions and Petitions**
To receive any questions or petitions from members of the public
- 7. Continuing Healthcare** (Pages 11 - 18)
Presentation given by Mandy Philbin, Chief Nurse.
- 8. CQC Local System Review Action Plan**
Report to follow.
- 9. Urgent Care Update** (Pages 19 - 80)
Report of the Policy and Improvement Officer.
- 10. Work Programme** (Pages 81 - 90)
Report of the Policy and Improvement Officer.
- 11. Date of Next Meeting**
The next meeting of the Committee will be held on Wednesday, 10th October, 2018, at 4.00 pm, in the Town Hall

ADVICE TO MEMBERS ON DECLARING INTERESTS AT MEETINGS

If you are present at a meeting of the Council, of its executive or any committee of the executive, or of any committee, sub-committee, joint committee, or joint sub-committee of the authority, and you have a **Disclosable Pecuniary Interest (DPI)** relating to any business that will be considered at the meeting, you must not:

- participate in any discussion of the business at the meeting, or if you become aware of your Disclosable Pecuniary Interest during the meeting, participate further in any discussion of the business, or
- participate in any vote or further vote taken on the matter at the meeting.

These prohibitions apply to any form of participation, including speaking as a member of the public.

You **must**:

- leave the room (in accordance with the Members' Code of Conduct)
- make a verbal declaration of the existence and nature of any DPI at any meeting at which you are present at which an item of business which affects or relates to the subject matter of that interest is under consideration, at or before the consideration of the item of business or as soon as the interest becomes apparent.
- declare it to the meeting and notify the Council's Monitoring Officer within 28 days, if the DPI is not already registered.

If you have any of the following pecuniary interests, they are your **disclosable pecuniary interests** under the new national rules. You have a pecuniary interest if you, or your spouse or civil partner, have a pecuniary interest.

- Any employment, office, trade, profession or vocation carried on for profit or gain, which you, or your spouse or civil partner undertakes.
- Any payment or provision of any other financial benefit (other than from your council or authority) made or provided within the relevant period* in respect of any expenses incurred by you in carrying out duties as a member, or towards your election expenses. This includes any payment or financial benefit from a trade union within the meaning of the Trade Union and Labour Relations (Consolidation) Act 1992.

*The relevant period is the 12 months ending on the day when you tell the Monitoring Officer about your disclosable pecuniary interests.

- Any contract which is made between you, or your spouse or your civil partner (or a body in which you, or your spouse or your civil partner, has a beneficial interest) and your council or authority –
 - under which goods or services are to be provided or works are to be executed; and
 - which has not been fully discharged.

- Any beneficial interest in land which you, or your spouse or your civil partner, have and which is within the area of your council or authority.
- Any licence (alone or jointly with others) which you, or your spouse or your civil partner, holds to occupy land in the area of your council or authority for a month or longer.
- Any tenancy where (to your knowledge) –
 - the landlord is your council or authority; and
 - the tenant is a body in which you, or your spouse or your civil partner, has a beneficial interest.
- Any beneficial interest which you, or your spouse or your civil partner has in securities of a body where -
 - (a) that body (to your knowledge) has a place of business or land in the area of your council or authority; and
 - (b) either -
 - the total nominal value of the securities exceeds £25,000 or one hundredth of the total issued share capital of that body; or
 - if the share capital of that body is of more than one class, the total nominal value of the shares of any one class in which you, or your spouse or your civil partner, has a beneficial interest exceeds one hundredth of the total issued share capital of that class.

If you attend a meeting at which any item of business is to be considered and you are aware that you have a **personal interest** in the matter which does not amount to a DPI, you must make verbal declaration of the existence and nature of that interest at or before the consideration of the item of business or as soon as the interest becomes apparent. You should leave the room if your continued presence is incompatible with the 7 Principles of Public Life (selflessness; integrity; objectivity; accountability; openness; honesty; and leadership).

You have a personal interest where –

- a decision in relation to that business might reasonably be regarded as affecting the well-being or financial standing (including interests in land and easements over land) of you or a member of your family or a person or an organisation with whom you have a close association to a greater extent than it would affect the majority of the Council Tax payers, ratepayers or inhabitants of the ward or electoral area for which you have been elected or otherwise of the Authority's administrative area, or
- it relates to or is likely to affect any of the interests that are defined as DPIs but are in respect of a member of your family (other than a partner) or a person with whom you have a close association.

Guidance on declarations of interest, incorporating regulations published by the Government in relation to Disclosable Pecuniary Interests, has been circulated to you previously.

You should identify any potential interest you may have relating to business to be considered at the meeting. This will help you and anyone that you ask for advice to fully consider all the circumstances before deciding what action you should take.

In certain circumstances the Council may grant a **dispensation** to permit a Member to take part in the business of the Authority even if the member has a Disclosable Pecuniary Interest relating to that business.

To obtain a dispensation, you must write to the Monitoring Officer at least 48 hours before the meeting in question, explaining why a dispensation is sought and desirable, and specifying the period of time for which it is sought. The Monitoring Officer may consult with the Independent Person or the Council's Audit and Standards Committee in relation to a request for dispensation.

Further advice can be obtained from Gillian Duckworth, Director of Legal and Governance on 0114 2734018 or email gillian.duckworth@sheffield.gov.uk.

Healthier Communities and Adult Social Care Scrutiny and Policy Development
Committee

Meeting held 11 July 2018

PRESENT: Councillors Pat Midgley (Chair), Sue Alston (Deputy Chair), Steve Ayris, David Barker, Mike Drabble, Adam Hurst, Talib Hussain, Francyne Johnson, Mike Levery, Martin Phipps, Gail Smith and Garry Weatherall

Non-Council Members (Healthwatch Sheffield):-

Margaret Kilner

.....

1. APOLOGIES FOR ABSENCE

1.1 Apologies for absence were received from Councillor Tony Downing.

2. EXCLUSION OF PUBLIC AND PRESS

2.1 No items were identified where resolutions may be moved to exclude the public and press.

3. DECLARATIONS OF INTEREST

3.1 The Chair, Councillor Pat Midgley, declared a personal interest by virtue of being a member of the Manor and Castle Development Trust.

4. MINUTES OF PREVIOUS MEETINGS

4.1 The minutes of the meetings of the Committee held on 18th April and 16th May 2018 were approved as a correct record.

5. PUBLIC QUESTIONS AND PETITIONS

5.1 Responses were provided to three questions asked by Deborah Cobbett on behalf of Sheffield Save Our NHS, as follows:-

5.2 With regard to the Urgent Care Review the Chair, Councillor Pat Midgley, advised that the meeting today would scrutinise the consultation process and the responses submitted. A Working Group would then meet to discuss and put together the Committee's formal response to the proposals.

5.3 The Policy and Improvement Officer stated that a report from the South Yorkshire, Derbyshire, Nottinghamshire and Wakefield Joint Health Overview and Scrutiny Committee would be coming to this Committee in due course regarding the Hospital Services Review.

- 5.4 With regard to the public profile of scrutiny, the Chair acknowledged that public awareness of decision making in Local Government was low but advised that effort was being made by the Council to improve public engagement and partner agencies were encouraged to be more transparent and accessible.
- 5.5 The Policy and Improvement Officer advised that a report responding to a recent Select Committee publication regarding raising the profile of scrutiny was being considered by the Overview and Scrutiny Management Committee at their meeting next week, and undertook to send Ms Cobbett this report and the combined scrutiny work programme considered at Council last week.

6. REVIEWING URGENT PRIMARY CARE ACROSS SHEFFIELD - PUBLIC CONSULTATION

- 6.1 The Committee received a report of the Director of Commissioning, NHS Sheffield Clinical Commissioning Group which summarised the feedback received from the consultation on proposed changes to urgent primary care services in Sheffield and provided information on the consultation process and the work being undertaken to review and reflect on this feedback.
- 6.2 Present for the item were Brian Hughes, Director of Commissioning, Kate Gleave, Deputy Director of Commissioning, and Eleanor Nossiter, Urgent Care Communications and Engagement, NHS Sheffield Clinical Commissioning Group.
- 6.3 Members made various comments and asked a number of questions, to which responses were provided as follows:
- With regard to further consultation, Eleanor Nossiter reported that if the final decision taken was not the one being proposed, further consultation would be needed. Although this could not be predicted, it was a possibility the CCG remained mindful of, particularly with regard to costings.
 - Kate Gleave confirmed that there was no mandate for the urgent treatment centre to be on the Northern General site, but that there was guidance that showed benefit to being co-located with an A&E department. She also advised that there were other opportunities from being on the Northern General site such as proximity to other services and other teams, giving more opportunities for managing and training staff.
 - Ms Gleave confirmed that neighbourhoods were geographic populations of approximately 30,000-50,000 people being supported by joined up health, social, voluntary sector and wider services to enable people to remain independent, safe and well at home and in the community. She agreed that these weren't well understood by the public, but advised that there were ongoing conversations about them.
 - Brian Hughes reported that neighbourhoods were not developed as part of the urgent care review, and confirmed that they were evolving naturally rather than to a mandate, and as such some were developing faster than others and

sharing best practice.

- Ms Nossiter confirmed that copies of the consultation material had been sent to all GPs and chemists with a request to make them available for the public. Spot checks were carried out to ensure this had been carried out. She advised that, in addition to the 5,000 responses received, extra consultation was carried out with targeted groups and postcodes. In response to concern that this was a low response rate, she advised that this was in keeping with response rates to other NHS consultations.
- With regard to the challenge from Healthwatch that the consultation material wasn't clear, Ms Nossiter advised that face-to-face activity had helped to make sure people understood the proposals and had generated a lot of constructive discussions.
- With regard to improving the availability of urgent/same day GP appointments, Kate Gleave stated that this would be achieved through improvements to the signposting from 111 or GP surgeries. She confirmed that, for example, from the next financial year, changes to the 111 service would mean callers would speak directly with clinicians.
- Ms Gleave explained that other areas were increasing their use of different health professionals in primary care to help manage demand whereas Sheffield was still relying heavily on GPs. The funding realised through the proposals could be used in practices and neighbourhoods to increase the variety of professionals and skills in the workforce. This would allow more time with GPs for those patients who needed to see a GP and ensure that patients were being seen by the most appropriate clinician.
- Concerns regarding the capacity of the Northern General site were acknowledged, and Ms Gleave confirmed this was being looked at very closely. Kate Gleave advised that patients currently going to the walk-in centre or minor injury unit would be signposted to their local practice rather than the Northern General site, though it was recognised that some would still go there. Ms Gleave stated that annually approximately 60,000 used the walk-in centre and 18,000 used the minor injury unit, whereas GP surgeries saw 600,000 same day/urgent appointments.
- In response to further questioning, Ms Gleave confirmed that the walk-in centre and minor injury unit were used disproportionately by some groups, and that there was a lot of anecdotal evidence from staff that many users were seeking a second opinion and had already visited their GP, and that many users could treat themselves with over the counter medication. Ms Gleave agreed that the expectations of patients needed to be addressed, along with the quality of initial visits to the GP and the explanations given at that point.
- With regards to continuity of care, Kate Gleave confirmed that all providers involved had emphasised the need for certain patients to receive continuity of care, and the proposals sought to ensure that. Although details of how this would be achieved would vary depending on neighbourhood or area, Ms

Gleave confirmed that by patients being seen by the most appropriate clinician, the needs of those requiring continuity of care were being recognised.

- With regard to a challenge that the decision seemed made already, Brian Hughes confirmed that a preferred option had been required before consultation could take place, but that the final decision was yet to be made and would depend on whether alternatives were viable or if objections to the preferred option could be mitigated.
- In response to a question regarding how the options had been identified, Eleanor Nossiter confirmed that the CCG had come to the Committee when developing options, which had been informed by engagement feedback and that from specific groups which were likely to be disproportionately affected. Those options had then been appraised based on published criteria, and the three highest scoring had gone out for consultation.
- Ms Nossiter confirmed that the process was about reviewing the feedback on the proposed options rather than revisiting previous approaches that had been considered and that the minor injury unit could not be decided upon separately as the decision was looking at urgent care as a whole. Equality Impact Assessments had been carried out prior to the consultation and this was used to inform consultation activity and consider potential mitigations for affected groups.
- With regard to sending out a mass text to all numbers registered by patients in Sheffield, Brian Hughes stated this was not possible owing to the strict rules regarding use of patient contact information and subsequent GDPR restrictions.
- Ms Gleave confirmed there were no cost savings from the closure of the walk-in centre and the minor injury unit, as the money would go to fund additional staff elsewhere. She confirmed that recruitment was an issue and that current staffing needs were unsustainable. The proposal to address this was to broaden the skill mixture of practitioners in Sheffield.
- With regard to the involvement of professional bodies, Kate Gleave confirmed that conversations with the Local Medical Council were ongoing, who were on board with the principles of the proposal but had raised concerns over the practicalities of implementation. She confirmed that the University Health Service recognised the likely impact of the proposals from closing the walk-in centre but supported this. However, they had expressed concern about moving the minor injuries unit.
- Kate Gleave confirmed that the possibility of these changes creating additional pressures on the ambulance service had been raised, and that it was something that the Ambulance Trust and 111 were addressing through working more closely together to ensure ambulances not sent out inappropriately. She confirmed that comments from secondary care providers were being looked at before the decision was made to ensure these proposals would not add to health inequalities in Sheffield.

- 6.4 The Policy and Improvement Officer advised that the CCG would make their decision after receiving the Committee's formal response. There was a Working Group session at end of this meeting which would pull together the Committee's thoughts, after which a smaller group of Members would meet over the summer to draft the formal response for the end of August.
- 6.5 The Policy and Improvement Officer also advised that if the Committee believed the decision taken by the CCG was unreasonable, further discussions could take place to try and mitigate the impact, but ultimately the Committee could make a referral to the Secretary of State.
- 6.6 RESOLVED: That the Committee notes the approach taken to the consultation, the feedback received and key themes identified, and agree that a formal response to the consultation be provided to NHS Sheffield CCG by the end of August 2018.

7. DRAFT WORK PROGRAMME 2018/19

- 7.1 The Committee received a report of the Policy and Improvement Officer which set out the Committee's Draft Work Programme for 2018/19.
- 7.2 Members discussed additional issues including suicide prevention and the variation in life expectancy rates across Sheffield, and noted that volunteers were needed for a joint group with the Children, Young People and Family Support Scrutiny and Policy Development Committee to look at mental health services for young people.
- 7.3 RESOLVED: That the Committee approves the contents of the Draft Work Programme 2018/19 report.

8. DATE OF NEXT MEETING

- 8.1 It was noted that the next meeting of the Committee would be held on Wednesday, 26th September, 2018, at 4.00 pm in the Town Hall.

Continuing Healthcare - CHC Overview and Scrutiny Committee

Mandy Philbin: Chief Nurse

Debbie Morton: Head of Clinical Service/Interim Deputy Chief Nurse

26th September 2018

Meet Mr P ...

Happily married and healthy for 35 years living at home with his wife

Mr P became forgetful, his wife contacted Sheffield Citywide Alarms who provided a Careline service to keep Mr P safe

Mr P's dementia worsened and he became unaware of time, place or person. He was incontinent, distressed on a daily basis despite interventions, including medication and skilled support. He became aggressive and unable to communicate, regularly wandering despite appearing breathless, this uses an increased amount of energy and triggered nutritional concerns with Mr P having a recent history of falls. Mr P became resistant to all care interventions which required significant staffing to address. His needs are intense through the day and night. Mr P would qualify for CHC funding, not because of his diagnosis but because his needs require a number of skilled **health professionals** and **skilled carers** to assess and manage his needs and keep Mr P safe on a daily basis. The social worker completed a Checklist which resulted in an assessment for CHC. Mr P was found eligible for CHC as a result of having a primary health need and was transferred to a nursing care home with health and social care provided free under the NHS

Mr P's dementia worsened he was re-assessed by a social worker with his care needs dictating that he was unsafe to remain at home

Mr P and his wife agreed with the social worker that a residential home would be the best care setting

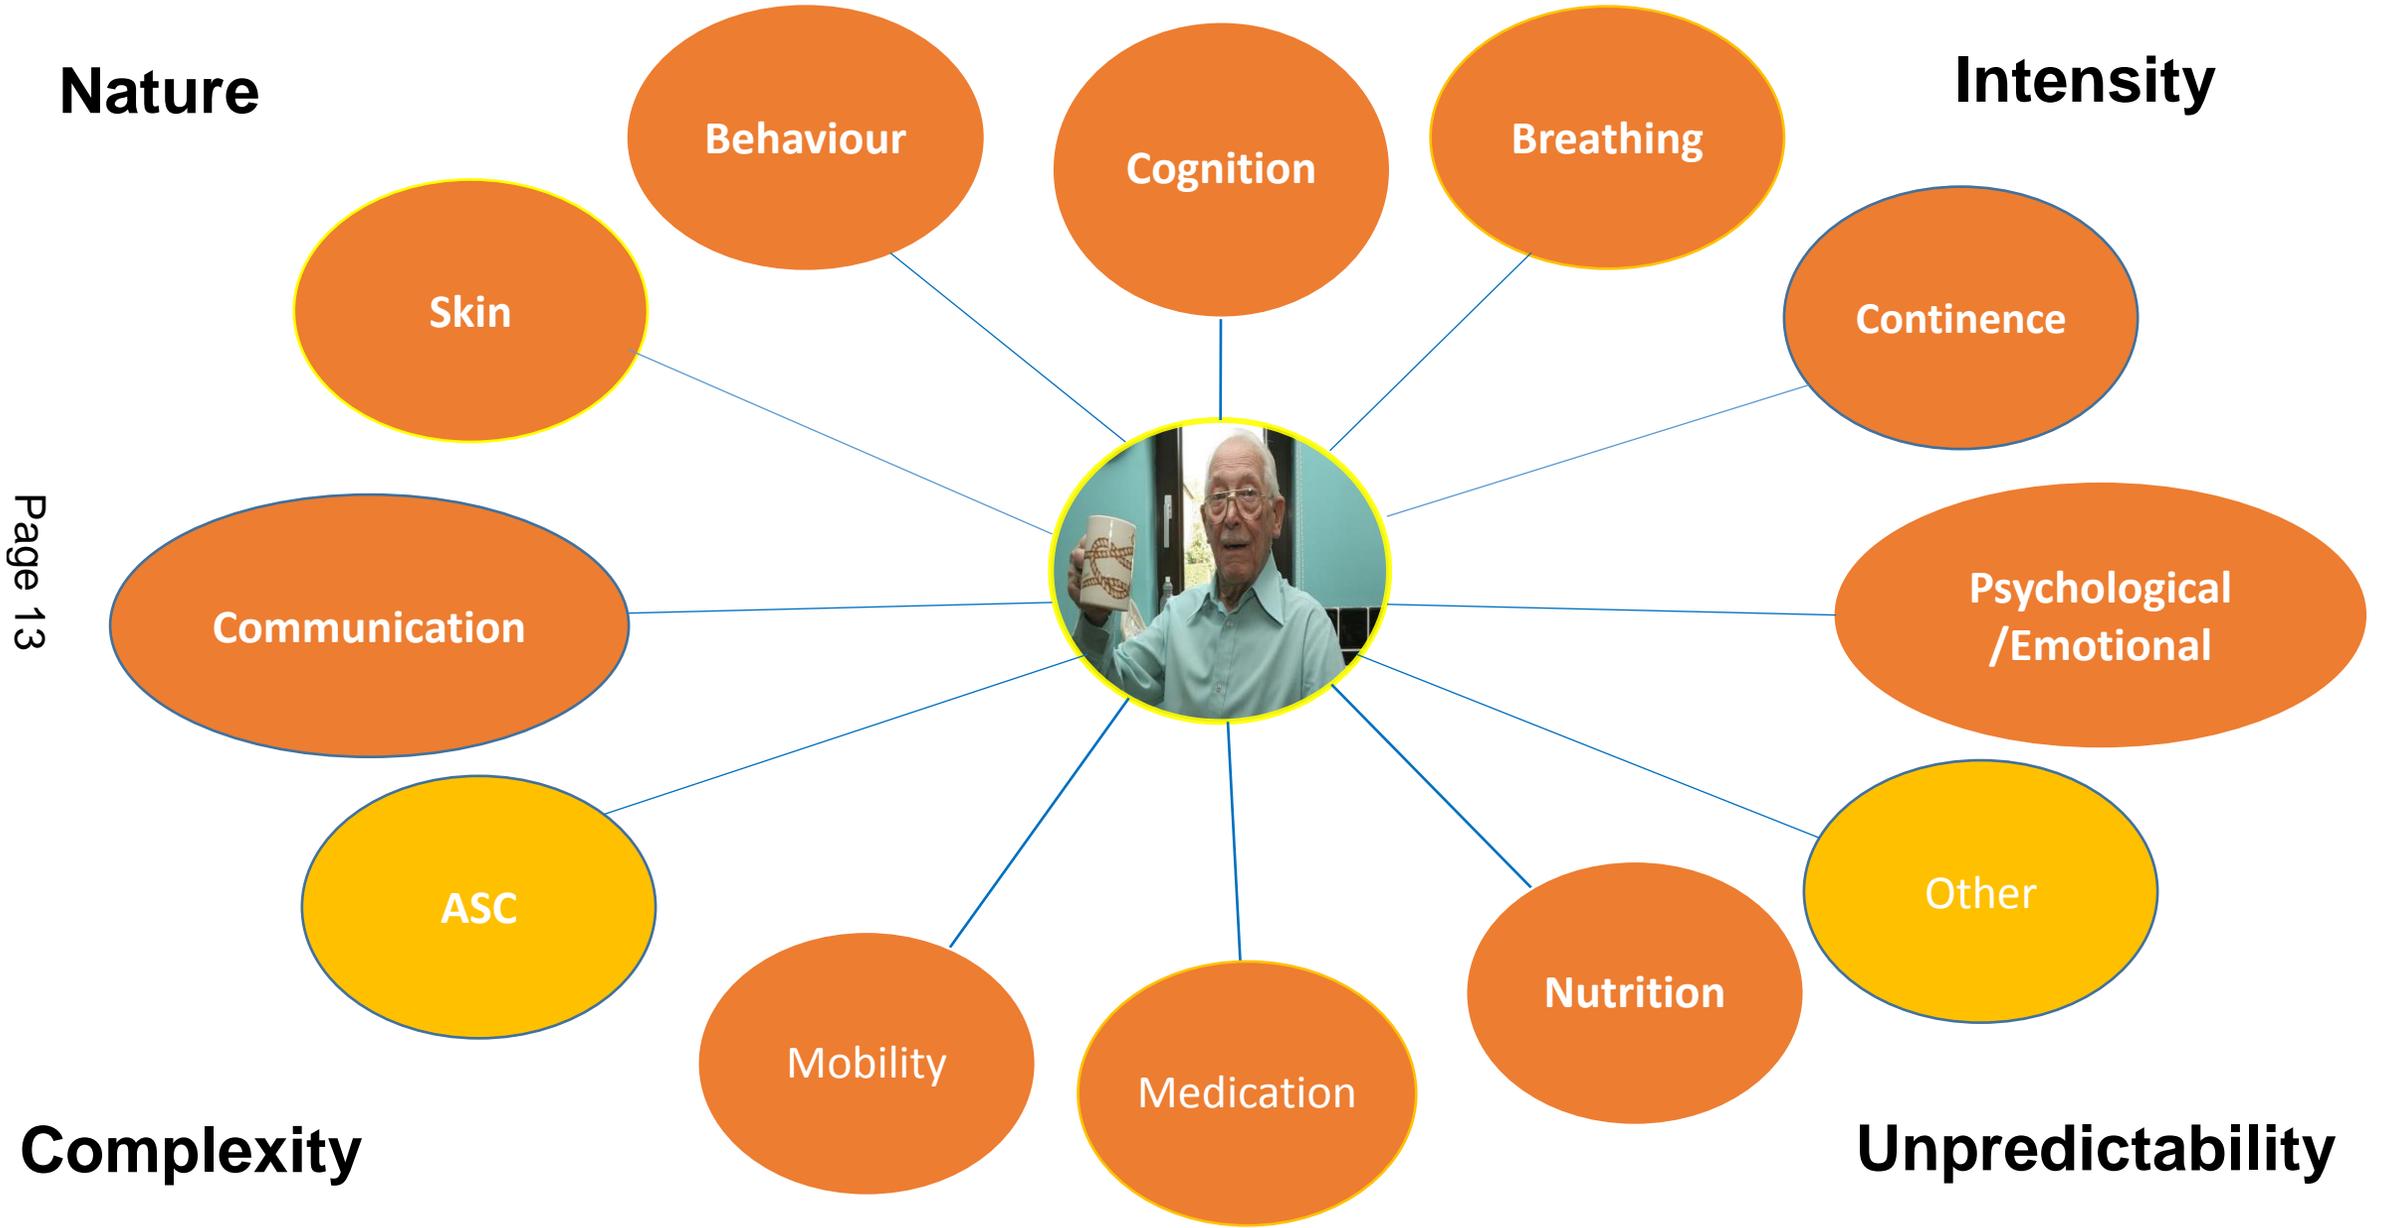

Mr P's memory worsened and the memory clinic diagnosed Mr P as having Dementia.

Mr P received a social care assessment which included a fairer charging assessment with Mr P paying a contribution towards a domiciliary care service

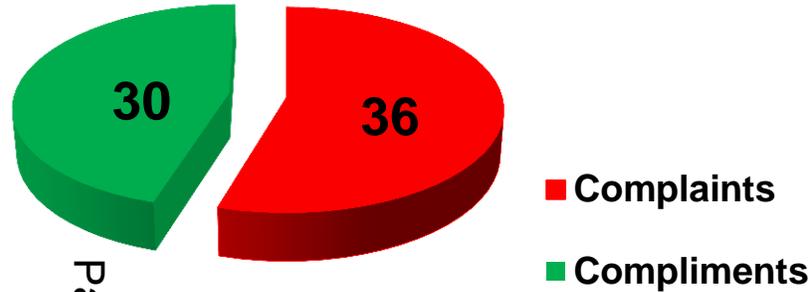

Mr P's CHC Decision Support Tool (DST) Domain needs

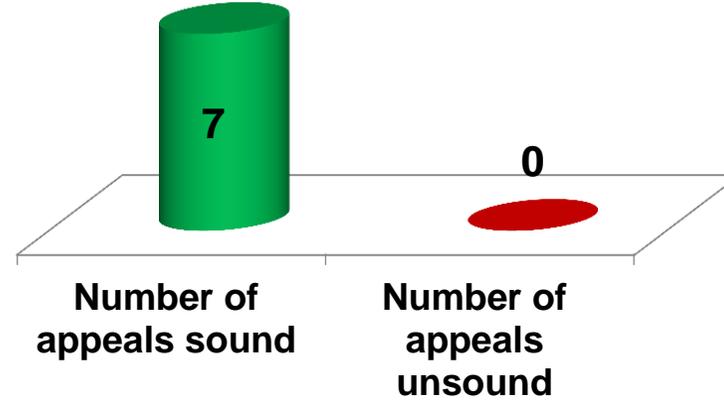

CHC service quality and timeliness – 1,900 individuals in receipt of services

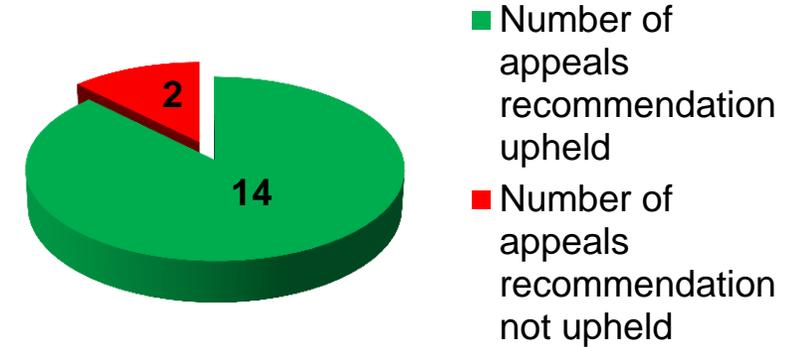

April 2017 to March 2018

NHS England Independent Review Panel
Appeals April 2016 to March 2018

Appeals Local Resolution
April 2016 to March 2018

Page 14

Complaint themes: 11 offer of care, 10 assessments, 4 communication, 5 process, 6 others.

NHS England Quality Standards

- Less than 15% of Decision Support Tools (DST) completed in hospital
 - 100%** of Sheffield's DSTs are completed outside of hospital settings
- 80% of Decision Support Tools (DST) are completed within 28 days
 - So far in 2018-19: **92%** of DSTs have been completed within 28 days

What have we heard?

CQC Inspection Sheffield's whole care system - feedback 2018

- Disjointed services which can cause anxiety
- Concerns over quality and accountability of the assessment process
- Services that are not always person centred
- No strong voice from individuals and their families in receipt of services
- The need for better use of digital technology
- Re-assessments and withdrawal of funding at specialist dementia homes

Page 15

Healthwatch engagement with individuals in receipt of services at Woodland View and Birch Avenue 2018 - Key themes

- Values and behaviours - some staff can lack empathy
- Need to move away from 'the professional knows best'
- Lack of transparency and openness in the process
- Families given short notice of Decision Support Tool assessments
- Lack of accessible information

What we are doing in response to improve services?

Report to Healthier Communities & Adult Social Care Scrutiny & Policy Development Committee 26 September 2018

Report of: Policy & Improvement Officer

Subject: Urgent Care Update

Author of Report: Emily.Standbrook-Shaw@Sheffield.gov.uk
0114 27 35065

Summary:

As per the Local Authority (Public Health, Health and Wellbeing Boards and Health Scrutiny) Regulations 2013, the Healthier Communities and Adult Social Care Scrutiny Committee responded formally to NHS Sheffield Clinical Commissioning Group's proposals to change Urgent Primary Care Services in Sheffield. The Committee's response is attached as appendix A.

The CCG has informed us that given the strength of feeling and some of the issues raised during the consultation, that they feel they need to look again at the proposals. The decision will be made by the Primary Care Commissioning Committee on the 20th September, and the paper is attached as appendix B. The paper recommends that the Primary Care Commissioning Committee reconsiders urgent care proposals for minor illness and minor injuries, agrees not to progress the proposed changes to urgent eye care, and receives a revised pre-consultation business case in summer 2019.

Urgent Care in Primary Care

F

Primary Care Commissioning Committee meeting

20 September 2018

Author(s)	Kate Gleave, Deputy Director of Commissioning Eleanor Nossiter, Communication and Engagement – Urgent Care
Sponsor Director	Brian Hughes, Director of Commissioning and Performance
Purpose of Paper	
<p>This paper brings together the work done to consider the feedback from the consultation on changes to urgent care services and other information required to decide whether to proceed with the proposed changes.</p> <p>Taking into account all the information set out in the paper, it recommends to PCCC members that the CCG reconsider the proposed changes and develops alternative options for the reconfiguration of minor illness and minor injury services.</p>	
Key Issues	
<ul style="list-style-type: none"> • The CCG has considered the consultation feedback, including the response from the scrutiny committee, and identified a number of actions to mitigate the issues raised. • It has also completed a review of all the alternative suggestions made during the consultation to identify any potential benefits. • The review of information relating to the public sector equality duty concludes that there is no specific impact for any protected group and that the CCG has met its statutory requirements. • The feedback relating to the proposed siting of the urgent treatment centres has raised some questions around whether there might be benefits in other approaches that would outweigh the benefits of co-location with A&E. • While it was concluded that any potential exacerbation of health inequalities could be mitigated, it was also noted that there could be opportunities to do more to reduce these. • The opportunity to work as a system to address the challenges facing urgent care is also recognised. • The recommendation to reconsider the options for the reconfiguration of minor illness and minor injury services would mean reviewing the proposed changes to increase urgent GP appointments as these were dependent on the funding released from changes to the minor injuries and walk-in services. • The CCG will work with partners and the public to develop a new set of options, taking into account the feedback and information from the consultation. • The recommendation also has a number of other implications which are set out in the paper • Work with eye care providers to review the feedback and alternative suggestions has led to the recommendation that the changes to urgent eye care services are not progressed but instead providers will work together to improve signposting to the most appropriate service. 	

Is your report for Approval / Consideration / Noting
Approval
Recommendations / Action Required by Primary Care Commissioning Committee
<p>The Primary Care Commissioning Committee is asked to:</p> <ul style="list-style-type: none"> i. Reconsider urgent care proposals for minor illness and minor injuries ii. Agree not to progress the proposed changes to urgent eye care iii. Receive a revised pre-consultation business case in summer 2019 <p>If PCCC approves the above three recommendations, Members are then asked to:</p> <ul style="list-style-type: none"> iv. Approve a 2 year contract extension for the walk-in centre v. Approve the re-procurement of extended access (hub) services with a 2 year contract term vi. Agree to receive proposals to maintain development of primary care as part of 2019/20 planning
Governing Body Assurance Framework
<p><i>Which of the CCG's objectives does this paper support?</i></p> <p>To improve patient experience and access to care To ensure there is a sustainable affordable healthcare system in Sheffield</p>
Are there any Resource Implications (including Financial, Staffing etc)?
Existing resources will need to be reviewed in order to ensure the relevant deadlines are achieved.
Have you carried out an Equality Impact Assessment and is it attached?
EIAs have been completed for the proposals that are the subject of the consultation and previously presented to the Committee
<i>Have you involved patients, carers and the public in the preparation of the report?</i>
The subject of this report is the feedback from consulting patients, carers and the Public

Recommendations for Urgent Primary Care

Primary Care Commissioning Committee meeting

20 September 2018

1. Introduction

1.1 The CCG held a public consultation on proposals to redesign the urgent care system in Sheffield between September 2017 and January 2018. The analysis of the feedback received was presented to Primary Care Commissioning Committee (PCCC) on 22nd March 2018, who noted the need for detailed consideration of the issues raised and alternative suggestions put forward. Further updates were brought to PCCC in May and August 2018 which described the work being undertaken to consider the feedback and progress made and it was agreed that a final report and recommendations would be brought to PCCC in September.

1.2 The decision required for any consultation is whether to:

- Proceed with one of the options consulted on, with suitable mitigations if required;
- Abandon proposals and continue with the status quo; or
- Reconsider the approach and develop alternative options.

1.3 This paper sets out the results of the work carried out to consider the consultation feedback and other information to enable PCCC to decide which course of action to take, including the implications of the recommended approach.

2. Background

2.1 The urgent care review was undertaken to meet a number of objectives including reducing duplication and simplifying access to urgent care services; improving access to urgent care in GP practices; and reducing the pressure on A&E. (For full details see Appendix 1).

2.2 The CCG's proposals to redesign urgent care services were informed by an extensive period of public engagement and were primarily designed to ensure that:

- Patients are signposted to the most appropriate service.
- Patients who need an urgent appointment receive one within 24 hours – and mostly the same day.
- Most of the time care is provided closer to home so that fewer people have to travel outside their local area to receive urgent care.

2.3 The changes proposed were to:

- Improve the way people access services so that they are assessed over the phone by their practice or NHS 111 and booked an appointment or signposted to the right place for the care they need.
- Change the way people get urgent GP appointments, with groups of GP practices (neighbourhoods) working together to offer urgent appointments within 24 hours.

- Change where people go for minor illness and injuries – creating two urgent treatment centres at the Northern General Hospital (adults) and Sheffield Children’s Hospital (for children). These would offer both booked and walk-in appointments and would replace the current walk-in centre (WIC) and minor injuries unit (MIU).
- Change where people go for urgent eye care, offering urgent appointments at locations across the city instead of the Emergency Eye Clinic at the Hallamshire, which would be for emergency (sight-threatening) conditions only.
- The improvements to signposting and access would be achieved by reinvesting the savings made from the changes to minor injuries and illness services into primary care services to create additional capacity.

2.4 A public consultation was held between 26 September and 31 January 2018. All the feedback was independently analysed and reports submitted to PCCC in March 2018. (These are available at www.sheffieldccg.nhs.uk/get-involved/urgent-care-consultation.htm)

2.5 As set out in reports to PCCC in May and August, the feedback has been fully considered by the CCG over the past few months, working with providers and members of the public through the Urgent Care Public Reference Group. In summary, work has focused on three main areas: reviewing the vision and objectives, considering the feedback in detail and exploring whether the issues raised in relation to the proposals can be mitigated and reviewing the alternative suggestions put forward through the consultation.

3. Information for consideration

3.1 Consultation feedback – key themes

3.1.1 As set out in previous reports to PCCC, there were significant differences in responses between the self-selecting responses to the consultation survey and those from the demographically representative telephone survey, with a more positive response overall from telephone survey participants.

3.1.2 Overall, the feedback indicated support for the CCG’s vision to ensure ‘the most appropriate response in the most appropriate setting that is easy to understand and access’ and the objectives of the programme. However, many did not agree with the way we were proposing to achieve them and some felt that they had not been communicated clearly enough. The majority of people were supportive of the principle of providing more urgent care in GP practices and there was also support for creating a children’s urgent treatment centre at Sheffield Children’s Hospital.

3.1.3 However, there was also considerable strength of feeling expressed against the proposals to replace the minor injuries unit and walk-in centre with an UTC for adults at the Northern General Hospital (NGH). This included six petitions submitted during the consultation period and two further petitions presented at subsequent PCCC meetings.

3.1.4 Across all sources of feedback there were a number of common concerns about the proposals. These have been reviewed by a variety of stakeholders to consider the issues raised in detail and potential mitigations. A summary of the actions identified to mitigate concerns is included at Appendix 2.

3.1.5 The table below details the main issues raised during the consultation and the CCG's response to these.

Issue raised in consultation	NHS Sheffield CCG Response
<p>Parking and Travelling.</p> <ul style="list-style-type: none"> • Lack of parking at the Northern General Hospital (NGH) • Difficulty in travelling to NGH from the city centre and from areas in the south/south west of the city. • Travel to other practices within neighbourhoods 	<ul style="list-style-type: none"> • The improved availability of urgent appointments in primary care would mean that far fewer people need to travel outside their local area to get the care they need. • However, we acknowledge the level of concern expressed regarding access to the NGH site and the need to look at how this could be improved. • The CCG has already committed to working with providers, South Yorkshire Transport Executive and community transport providers to consider how transport to the NGH site could be improved and would also work with Sheffield Teaching Hospitals to consider how parking could be improved. We recognise that any costs would need to be considered as part of the final business case. • We have undertaken work to identify travel times between practices in every neighbourhood by car and bus and will support neighbourhoods to take these into account in their planning.
<p>Potential exacerbation of health inequalities</p> <ul style="list-style-type: none"> • Detrimental impact on vulnerable groups from moving the walk-in-centre • Siting the Urgent Treatment Centre at the NGH, particularly for the homeless. 	<ul style="list-style-type: none"> • One of our main aims is to work with our partners to continue to reduce health inequalities and we have committed to tailoring services to support this. This aim is also a key principle of the neighbourhood approach, with GP practices working together to address inequalities and develop services to meet the needs of their communities. • Vulnerable groups such as the homeless, those affected by substance misuse or asylum seekers have more complex health needs, which are best supported by continuity of care from their GP. There are a number of practices that offer services tailored to the needs of specific vulnerable groups and increasing the availability of appointments at practices would benefit these groups and help make sure they are seen at the most appropriate place for their needs. • We recognise that access by telephone could be an issue for some of these groups and that different approaches would be required, as they are now, to ensure they were not disadvantaged.

	<ul style="list-style-type: none"> • We carried out extensive engagement with a range of vulnerable groups to inform the development of options for urgent care and ensure these did not exacerbate inequalities. However, the consultation feedback has raised some different views to those we heard in the engagement and issues that would need to be mitigated.
<p>Loss of services in city centre</p>	<ul style="list-style-type: none"> • We acknowledge the strength of feeling expressed in the consultation about wanting to retain some form of urgent care service in the city centre and the concerns raised that not having this could have a negative impact on certain groups. • For those living in the city centre, access to urgent care for minor illness would be improved with appointments within 24 hours guaranteed at the practices in the city centre. This would include the student communities who are served by a number of practices in the city centre. Similarly, more people would be able to get care closer to home and not need to come into the city centre for treatment. • The proposed increased investment in primary care would help to strengthen all practices, including those in the city centre, and improve services for patients where this is needed. • We recognise that for some people using public transport it may be easier to access services if they are based in the city centre. However, increasing the care available at GP practices would enable more people to get care without having to travel out of their local area. The majority of people with minor injuries access services by car or taxi but we recognise the need to consider measures to mitigate the issues raised for those using public transport.
<p>Do-ability re neighbourhoods/ primary care</p> <ul style="list-style-type: none"> • Resourcing (staff and financial) • Lack of detail around their design 	<ul style="list-style-type: none"> • We understand that many people were not aware of the neighbourhood approach, where groups of practices work together to coordinate health and social care, and deliver services to support the specific health and social needs of their area. However, this has been in place for the past two years and is already delivering a variety of improvements, including developing additional services to meet the needs of local communities. • We are continuing to invest in developing neighbourhoods and last year also embarked on a

	<p>large scale programme to support primary care resilience and sustainability. This has included investing in creating a more diverse workforce, schemes to improve access and quality, and developing a primary care estates strategy.</p> <ul style="list-style-type: none"> • Further assurance has been sought that practices would be able to manage the expected increase in patients. Discussions have also been held with the practices with the highest number of patients using the walk-in centre who are likely to be most affected to ascertain any support they would need to do this. • We are therefore confident that with the additional investment from the changes to minor illness and injuries services, primary care would be able to deliver the changes proposed. • We understand that people would have liked to have specific details of how each neighbourhood would work together to provide appointments within 24 hours. However, the basis of neighbourhood working is that practices determine appropriate solutions for their local communities so each neighbourhood would need to develop its own approach to urgent care appointments.
--	---

3.2 Consultation feedback - alternative suggestions

3.2.1 The consultation feedback also included a total of 17 alternative suggestions for how services could be configured. Full details of the approach taken to consider these was set out in the report to PCCC in August, along with six of the suggestions which initial assessment had shown would not be viable.

3.2.2 Work has continued to explore the feasibility of the remaining suggestions and any potential benefits or negative consequences. A summary of the conclusions reached is included at Appendix 3.

3.3 Response from Scrutiny Committee

3.3.1 As well as the duty to involve the public and consult on changes to services, CCGs have a legal duty to consult the local authority on any major changes to services and take account of its response when making a decision.

3.3.2 NHS Sheffield CCG has attended meetings of the Healthier Communities & Adult Social Care Scrutiny Committee to explain the proposals and share the findings of the public consultation, as well as providing updates during the consultation process. The Committee submitted its formal response to the CCG on 21 August, which is attached as Appendix 4. While the Committee said it was supportive of the ambition to provide

more urgent care in GP practices, it felt it needed more detail to be confident this was achievable and raised a number of other issues, namely concerns regarding:

- the similarity of the three options for the urgent treatment centre
- siting the adult UTC at NGH, as was felt to be difficult to access by public transport for those in the south of the city, including students
- closing the walk-in centre and minor injuries unit may affect people in the city disproportionately and exacerbate health inequalities
- the impact on vulnerable groups who use the walk-in centre, particularly those who may find it difficult to access appointments via a telephone triage system

The Committee also highlighted a number of areas where they felt they needed further information, including data on patient flow and traffic modelling, evidence that siting UTC at NGH is viable, clarity of the national guidance requirements and details of how neighbourhoods would work together.

- 3.3.3 These points reflect some of those raised in the consultation feedback, as set out in section 3.1. They have been reviewed by the Urgent Care Programme Board and taken into account in reaching the conclusions set out in section 4.

3.4 Equality

- 3.4.1 The Public Sector Equality Duty (PSED) set out in the Equality Act 2010 requires public bodies to have due regard to the need to eliminate discrimination, advance equality of opportunity and foster good relations between people with and without protected characteristics.

- 3.4.2 In order to understand any specific impact on these groups, the analysis of the consultation feedback and telephone surveys included a breakdown by protected characteristics. The demographics of people responding to the consultation survey was broadly consistent with the overall population demographics although those aged 16-21, Asian and Black ethnic groups, and gypsy and travellers were under-represented. 15% of respondents identified as disabled (cf 18% of the overall Sheffield population), and 24% identified themselves as carers, although there are no Sheffield-wide figures available for comparison. Additional meetings and focus groups were held to get views from the under-represented groups and their feedback, which is included in the qualitative analysis.

- 3.4.3 The report on the consultation feedback showed there were very few significant differences in responses from people with protected characteristics from the responses overall. The only significant differences were that those between 16-30 and over 80 were more likely to agree that providing more care in communities would make it easier to access urgent care, and that women were more likely to be happy to be seen at a different practice, while carers were less likely to want this. In terms of the options for the UTCs, respondents from Asian or Asian British Chinese backgrounds were more likely to pick option 3 and Asian British Pakistani respondents were more likely to select option 2.

- 3.4.4 The city-wide telephone survey was demographically representative of the Sheffield population and again showed very few differences in responses from people with protected characteristics. The only significant differences were that people under 31 and over 72 were more likely to agree they would be seen at a different practice compared

to those over 72 (70% compared to 42%), and disabled people with an older profile were 19% less likely to say yes. Those aged 62-71 were more likely to want to go to a GP practice than a UTC – 76% compared to 61% overall.

- 3.4.5 In addition, the consultation survey included a specific question to draw out any issues for different groups (Q7: Is there anything about the proposal that you feel would have a more positive or negative impact on you and if so why?). The analysis found that there were no significant differences to responses between those with and without protected characteristics, although carers were slightly more likely to refer to desire for central-based services.
- 3.4.6 To provide additional assurance, the CCG has looked at the how services are used by different groups to identify any potential impact on specific groups. This has predominantly focused on ethnicity, as services do not all collect data on other protected characteristics. The breakdown is attached at Appendix 5 and shows there are no specific groups that are more likely to be disproportionately affected based on their current use of services. However, it should be noted that there was a significant number of walk-in centre patients for whom this information was not recorded. Similarly, it is recognised that the walk-in centre has a high proportion of users from the student population. This is thought to be due to many students not registering with a local GP so addressing this issue would mitigate the potential impact on this group. This view is supported when services were analysed by age band (see Appendix 10).
- 3.4.7 The Strategic Patient Experience, Engagement and Equality Committee has delegated responsibility for ensuring the CCG meets its statutory equality duties. The Committee has received details of the information to be provided to PCCC and is assured that consideration of this will enable the CCG to meet its duties.
- 3.4.8 Taking all this information into account, we have concluded that there is no specific impact for any protected group that needs to be considered and that the issues raised reflect the main themes addressed elsewhere in this report.

3.5 Health inequalities

- 3.5.1 The analysis of the consultation feedback included a breakdown of feedback by vulnerable groups to support consideration of the potential impact on inequalities. A number of concerns were raised regarding the potential impact on the homeless and people with substance misuse concerns of moving services out of the city centre and siting the adult UTC at NGH. These included views that the distance and cost of travel could deter people from seeking help for health problems or increase inappropriate use of ambulance service. Concerns were also raised about barriers to accessing telephone triage, how people would get home from NGH, and having to walk through areas frequently used by drug dealers. This was different to the views heard in the engagement undertaken with vulnerable groups prior to the consultation, which indicated that these groups tended to go to A&E rather than the WIC and would rather see a GP if possible.
- 3.5.2 There were mixed responses from people for whom English is a second language, including refugees and asylum seekers. Many welcomed the idea of a UTC and felt the changes would improve how quickly people are seen and ensure they get an appropriate response. However, concerns were again expressed regarding the adult

UTC being sited at NGH and about the potential impact of losing the WIC on the vulnerable and elderly. There were also comments about the need to improve telephone triage and the need for interpretation services at GP.

- 3.5.3 Responses were also analysed by postcode, which has enabled consideration of the views from people living in areas of deprivation. This did not show any significant differences between those in the most deprived areas (including postcode areas S2, S3, S5, S9, S14) and the responses overall. There were lots of comments about needing better access to GPs and a positive response to making it easier to get urgent appointments at practices. Concerns related to the accessibility of NGH and closing the WIC but there were also some comments that NGH is more accessible and 'caters for more people than Hallamshire'.
- 3.5.4 Health inequalities was a key focus of discussions at the public reference group workshop that was held to discuss the consultation feedback and was rated as the most important of the options appraisal criteria. It was recognised that a lot of the concerns raised regarding access to NGH had come from people living in the south of the city, where there are fewer areas of deprivation and high levels of car ownership. However, the group highlighted the importance of considering and prioritising those in more deprived areas and the need to target services on areas of greatest need. The east of the city was mentioned specifically, where it was felt there are higher levels of deprivation and a greater concentration of carers.
- 3.5.5 To further understand the potential impact on health inequalities and explore the concerns raised regarding this, a wide variety of data has been considered, including information on car ownership, travel times to services from deprived areas and the methods of transport used to access current services.
- 3.5.6 Data on vehicle ownership (see Appendix 6) shows that the majority of areas of poor access to a vehicle are in the centre and east of the city, with a further pocket of low access in the far south. When mapped to the postcodes of attendees, the services most likely to be attended by people with poor access to a vehicle were A&E departments at NGH and Sheffield Children's Hospital, but there is also a small cohort of WIC attendees with low access to a vehicle. Access to a private vehicle for MIU attendees was high.
- 3.5.7 Data on journey times indicates that fewer people would potentially be able to access NGH within half an hour by public transport than could access the MIU/WIC sites. (See maps at Appendix 7). However, there is a higher proportion of people from deprived areas who are within 30 minutes of NGH by public transport. Similarly, more people from the most deprived areas in Sheffield can access NGH within 30 minutes by public transport compared to those who can get to the MIU within this time
- 3.5.8 Attendance data shows that more people live within a 30 minute journey to the WIC or MIU than NGH. However, this would be offset by the increased capacity in GP practices, which would reduce the number of people who would need to travel to NGH. Similarly, only 14% of people attending the MIU had used public transport and attendees tend to be from areas identified as having good access to a vehicle.
- 3.5.9 The correlation of the postcodes of attendees (where available) with deprivation data shows that the services used most frequently by people in the 3 areas of greatest deprivation are the A&E departments at SCH and NGH, with 40-45% of all attendances coming from this cohort. This indicates that the locations are accessible

for people in these areas and that the proposed changes would not exacerbate inequalities. 35% of attendances at the walk-in centre also come from these areas but the impact would be negated by improved primary care access for minor illness closer to home. These three areas account for approximately 20% of attendances at the MIU, while almost 40% are from the areas with least deprivation, suggesting that changes to this service would not have a disproportionate impact on health inequalities.

3.5.10 In addition, we have reviewed the data on which practice attendees are registered with to identify the practices that would potentially be most affected if the walk-in centre was closed (attached as Appendix 8). Previous assumptions that students were high users of the WIC due to geographical convenience were supported by the number of attendees from practices with high numbers of students on their lists. These practices have been actively engaged during the consultation and beyond to ensure the potential impact is understood and could be mitigated. A considerable number of attendees (6000) are registered outside of Sheffield, which again indicates a high proportion of student service users.

3.5.11 Taking all this into account, the conclusion reached is that the proposed changes would support a reduction in health inequalities as they will improve access to minor illness care and offer greater continuity of care for vulnerable groups. People in the most deprived areas of Sheffield are more likely to use A&E than the MIU and WIC, potentially reflecting their closer proximity to NGH, so siting the adult UTC at NGH should not deter them from accessing healthcare. However, it is recognised that there could be a detrimental impact on vulnerable groups in the city centre in terms of minor injury services, which would need to be addressed. Mitigations include the actions proposed in relation to travel and transport, as well as those specifically to address concerns regarding health inequalities, as outlined in Appendix 2. It is also recognised that there could be opportunities to reduce health inequalities further if alternative approaches are explored

3.6 GP views

3.6.1 GP views on the proposals and whether they are deliverable have been sought through a number of different mechanisms, both during the consultation and subsequently through follow up discussions with practices, neighbourhoods, localities and the Local Medical Committee. There were a limited number of formal responses to the consultation but a large number of discussions have taken place, both with individual practices and groups. Throughout conversations, there was consensus supporting the principle of investing in primary care to make it sustainable and improve access.

3.6.2 Discussions since the consultation have shown that while some practices want or need to work together as neighbourhoods to deliver the improvements, other practices feel that with additional investment they could meet the standards as individual practices and some said that they are already meeting them.

3.6.3 While some concerns have been raised over logistical issues, overall members are supportive of the proposed approach to invest in primary care to improve capacity for minor illness. However, it is clear that there is no single model that would be suitable for all practices or their patient populations and a more flexible approach is required.

3.7 System views

- 3.7.1 While work was undertaken to engage partners in the development of the urgent care proposals, some of the issues raised in the consultation underline the need for engagement at all levels within partner organisations to ensure a shared understanding and approach.
- 3.7.2 Discussions have taken place with providers regarding concerns raised and further work undertaken to provide assurance about the activity modelling and assumptions made. Providers have been very willing to work with the CCG to consider the feedback and determine the best approach for Sheffield, which has ensured input from a wide range of clinical and operational experts.
- 3.7.2 It is important to note that the environment in which the programme has operated has changed considerably since it started. The development of the CCG's Urgent Care Strategy and the resulting Urgent Care in Primary Care programme commenced prior to the establishment of the accountable care partnership for Sheffield, which is seeing providers and commissioners take a shared approach to planning and delivering all health, care and wellbeing services and outcomes for the city.
- 3.7.2 There is a willingness from all parties to work together as a system to address the challenges faced by the city. This therefore brings greater opportunities to work collectively to improve urgent care services and ensure the best solution for Sheffield.

3.8 National guidance

- 3.8.1 National guidance was published in April 2017 setting out the requirement for places to implement "standardised new Urgent Treatment Centres" by December 2019. These have to treat both minor illness and minor injuries and offer both pre-bookable and walk-in appointments. This was followed in July 2017 by a set of national principles and standards which CCGs are required to deliver ([available at www.england.nhs.uk/wp-content/uploads/2017/07/urgent-treatment-centres%E2%80%93principles-standards.pdf](http://www.england.nhs.uk/wp-content/uploads/2017/07/urgent-treatment-centres%E2%80%93principles-standards.pdf)) These were factored into the development of the options included within the consultation.
- 3.8.2 The guidance refers to the advantages of co-locating urgent treatment centres alongside A&E departments but does not mandate this. The proposals put forward were based on co-locating UTCs with A&E because of the benefits this offers for patients and to help reduce the pressure on Sheffield's A&E departments by making it as easy as possible to divert patients attending with non-emergency conditions to the UTC. These benefits need to be considered along with those from other approaches to determine the best solution for people in Sheffield.
- 3.8.2 The CCG has recently been advised that the national timescales for implementation of the UTCs will now be applied less stringently so the CCG can work to a local rather than national timescales for implementation of a revised configuration of services.

4. Conclusions

To decide on which course of action should be taken, each of the four elements of the proposals has been reviewed both individually and collectively, recognising that they are interdependent. The key points are set out below, along with the overall recommendations

4.1 Improve the way people access services

- 4.1.1 Consultation feedback included some concerns about the effectiveness of the current NHS 111 service and the difficulties some patients experienced contacting practices but there was also recognition of the need for and benefits of effective signposting, often achieved through clinical triage.
- 4.1.2 Most practices in Sheffield now have non-clinical signposting in place in the form of 'care navigation' and a number of practices have clinical models of triage or other systems which meet the needs of their population. Making this a requirement – as proposed - would ensure that all patients have equitable and consistent access to signposting services in the future.
- 4.1.3 The effectiveness of the NHS 111 service will improve in 2019 due to the implementation of a revised regional service specification which will significantly increase the number of patients who are clinically triaged. This is expected to increase the accuracy of signposting and thereby the confidence of patients to adhere to signposting advice.
- 4.1.4 The review of the feedback therefore concluded that there is no evidence to suggest that introducing an improved system where patients contact their practice or NHS 111 and are assessed over the phone would not be in the best interests of patients in Sheffield. It was, however, acknowledged that for some patient groups phone access was not appropriate and adaptations would be required to meet their needs.

4.2 Change the way people get urgent GP appointments

- 4.2.1 The consultation feedback identified widespread support for improving access to urgent same day GP appointments and the number of comments received about the current difficulties some patients encounter trying to obtain urgent appointments also suggests this is something people would like to see improved. It also showed that the majority of people were happy to be seen at a different practice if it meant they would be seen quicker and that people would rather be seen at a local practice than one of the proposed UTCs.
- 4.2.2 In addition, creating additional appointments in practices has clear benefits for those requiring continuity of care, including those in vulnerable groups.
- 4.2.3 However, as was highlighted in the response from the scrutiny committee, there have been a number of concerns raised about whether this could be delivered and people wanted more detail about exactly how it would work in each neighbourhood.
- 4.2.4 Further discussions have been held with practices to provide additional assurance about delivery. As set out in section 3.6, this has shown that some are confident that (with additional investment) they could deliver urgent appointments within 24 hours without needing to work with other practices, which suggests a more flexible approach may be beneficial.

4.2.5 In conclusion, the approach of increasing capacity for urgent appointments in practices would be beneficial for Sheffield. However, a more flexible approach is required to respond to the different positions of practices so that they are free to achieve the target of providing urgent appointments within 24 hours without working in neighbourhoods if they choose. Increasing capacity can only be achieved with additional investment so this would need to be reconsidered if the changes to the minor injuries unit and walk in centre are not progressed.

4.3 Change where people would go for minor illness and injuries

4.3.1 The review of feedback has concluded that there is no evidence to suggest that establishing a UTC would not be in the best interests of people in Sheffield and there was general support for establishing a separate UTC for children at Sheffield Children's Hospital.

4.3.2 The consultation feedback showed mixed views with those taking part in the representative telephone survey responding more positively to the proposals regarding the UTC than those who responded directly.

4.3.3 However, the CCG is very conscious of the strength of feeling from some members of the public and stakeholders about the adult UTC being sited at Northern General Hospital and the loss of the urgent care services for adults in the city centre.

4.3.4 One of the main drivers for proposing Northern General and Sheffield Children's Hospital as the sites for the UTCs was to co-locate them with A&E departments, which evidence shows provides significant benefits. The strength of feedback regarding access and our review of the alternative suggestions has indicated that there could be benefits from other approaches that should be understood fully to determine if they would outweigh those of co-location with A&E, including the potential to reduce health inequalities further. The CCG has also taken on board that people felt that the options consulted on for this element of the proposals were too similar.

4.3.5 Not proceeding with closing the minor injuries unit and walk-in centre would however impact on the proposed changes to increase urgent GP appointments, as this was to be achieved by re-investing the money saved into primary care.

4.4 Change where people go for urgent eye care

4.4.1 The consultation feedback showed mixed views about this proposal. Some people raised strong concerns about their desire for urgent eye treatment to continue to be provided at the Royal Hallamshire Hospital and/or the ability of optometrists to provide the same level of treatment as the hospital ophthalmology team. Other people indicated their preference to access urgent eye care in the community

4.4.2 No evidence was found to suggest that providing urgent eye care in community settings would not be beneficial. However, the providers have recently collectively suggested that they could work together over time to ensure that more patients are appropriately signposted into existing urgent or emergency services without the need to undertake the proposed service redesign.

4.5 In Summary

- 4.5.1 Taking into account all the information set out above, it is recommended that the CCG **reconsider the options for the reconfiguration of minor illness and minor injury services.**
- 4.5.2 This does not mean that we are recommending any of the alternative suggestions made in the consultation feedback as options at this time. We would work with partners and the public to develop a new set of options, taking into account the feedback and information from the consultation.
- 4.5.3 Although there was support for a children's UTC at Sheffield Children's Hospital this could not be progressed in isolation and will need to be considered as part of the overall approach to minor illness and minor injury services.
- 4.5.4 It would also mean reviewing the proposed changes to increase urgent GP appointments as these were dependent on the funding released from changes to the minor injuries and walk-in services. However, it is recommended that we still work towards providing appointments within 24 hours for all patients that need them.
- 4.5.5 The proposals regarding urgent eye care were not dependent on the other elements of the proposal. However, it is recommended that these are not progressed and instead providers will work together to improve signposting to the most appropriate service.

5. Practical implications if PCCC approves recommendations

5.1 Revised Programme Timescales

- 5.1.1 The recommendations above will result in significantly revised timescales for the mobilisation of any changes. This is to allow for the development of revised options in collaboration with partners and the public, the production of a new business case and the NHS England service change assurance process, which has to be completed before proceeding to consultation. A full timetable will be developed if the recommendation to reconsider is supported but it is unlikely that any agreed changes would be implemented before April 2020.

5.2 Contracts for current services

- 5.2.1 PCCC approved a nine month extension to both the walk-in centre and extended access (hub) services in December 2017 and unless existing contracts are extended or the services re-procured the services would cease on 31st March 2019.
- 5.2.2 **Walk-in Centre:** It is now unclear whether a walk-in centre service will continue to be required post winter 19/20 or whether the service offer would change to that of a UTC specification. It is therefore recommended that the contract for the walk-in centre is extended by a further 2 years to 31st March 2021.
- 5.2.5 The CCG will issue a Prior Information Notice (PIN) to explain to the market our reasons for the walk-in centre contract extension to mitigate any risk of challenge from bidders who previously missed out on the contract.
- 5.2.2 **Extended Access (hubs) Service:** There is a separate paper being presented to PCCC concerning the next steps that the CCG needs to take to ensure delivery of extended access in line with NHS England requirements. To align with this paper, it

will be recommending that the Extended Access (Hub) service is re-procured over the next six months with the successful provider commencing service provision from 1st April 2019. It is proposed that the contract runs for 2 years to tie in with any potential changes to the other services that may emerge post reconsideration and further consultation.

5.2.6 At this stage, it is anticipated that the existing rolling contracts for the Minor Injuries Unit and the GP Collaborative would continue to 31st March 2021 to enable a full revised configuration of services, if necessary, at the same time.

5.3 Primary Care

5.3.1 The CCG's Primary Care Strategy sets out the need to invest differentially in order to improve health outcomes and that successful delivery of its ambitions depends upon the level of investment achieved. As part of the GP Five Year Forward View national strategy, non-recurrent funding is available to invest in primary care to deliver improvements during 2018/19 but further investment will be necessary to sustain improvements in access in the longer term.

5.3.2 The options proposed in the consultation would have provided additional recurrent resources to invest in primary care. Until the approach to urgent care is determined, the CCG will need to look at how to maintain momentum in improvements in primary care as part of 2019/20 planning process.

5.4 Public involvement and consultation

5.4.1 In line with our legal duties, we will work with our partners and the public to develop revised options. This will also involve reviewing the criteria used to assess how options meet the agreed objectives, which again will be done in collaboration with our stakeholders. A formal consultation will be held on the revised options in 2019.

6. Recommendations

The Primary Care Commissioning Committee is asked to:

- i. Reconsider urgent care proposals for minor illness and minor injuries
- ii. Agree not to progress the proposed changes to urgent eye care
- iii. Receive a revised pre-consultation business case in summer 2019

If PCCC approves the above 3 recommendations, Members are then asked to:

- iv. Approve a 2 year contract extension for the walk-in centre
- v. Approve the re-procurement of extended access (hub) services with a 2 year contract term
- vi. Agree to receive proposals to maintain development of primary care as part of 2019/20 planning

Paper prepared by: Kate Gleave, Rachel Dillon and Eleanor Nossiter
On behalf of: Brian Hughes, Director of Commissioning & Performance
13 September 2018

Vision for urgent care

Page 38

Our new model of urgent care will provide the most appropriate response where needed in the most appropriate setting that is easy to understand and to access for both patients and clinicians

Pre-consultation Objective	Rationale
Reduce Duplication and simplify access Reduce inequalities	Patient feedback from Urgent Care Strategy and Vulnerable Groups engagement said this was key as current system is confusing and hard to navigate Patients are not accessing the current services based on levels of need. Some groups of patients are encountering barriers to access e.g. cost of public transport, access to a phone, interpreter requirements
Improve access to Primary Care services	Several primary care services are currently provided within secondary care. The range of primary care services also creates confusion and duplication. The improvement in access includes ensuring patients are signposted to most appropriate service and that all primary care services have access to the patient's record (if consent given)
Improve access to urgent care provided by GP practices (without detrimentally affecting waiting times for planned care)	Access to urgent appointments within practices varies significantly across Sheffield, as does the length of wait for a planned appointment. This creates further inequalities across the city. Signposting included as part of improving access will reduce inappropriate demand and help to manage patients' expectations
Support a sustainably resourced primary care	Primary Care within Sheffield needs further investment in order to provide a sustained service. This involves sustaining both the workforce and financial investment into practices
Encourage and support self care	Empowering patients to self care where appropriate encourages them to take responsibility and positive action for their health and wellbeing and reduces unnecessary interactions with urgent care services. It will include patient education and will help to reduce inappropriate demand and manage patients' expectations
Provide value for money	The CCG has a duty to ensure that it commissions services which provide value for money (spending less, spending well and spending wisely)
Deliver care locally and appropriately	Patient feedback had indicated that being able to access care locally is important but this has to be balanced to ensure that care is also appropriate for the population
Reduce pressure in Emergency Departments	Over the last year, STHFT have struggled to achieve the four hour A&E target. This is in part because of the volume of attendances, a proportion of which could have been managed within primary care
Contribute to or enable delivery of the national requirements	As stated in section 4 above, the system has to incorporate a number of national requirements into the services provided within Sheffield. The health and social care organisations within Sheffield have agreed to work in partnership as an ACP. The final model must enable partnership working.

Appendix 2: Summary of actions identified to mitigate key issues from the consultation

Issue	Actions to mitigate
Parking and travel to NGH	<p>Considerations</p> <ul style="list-style-type: none"> • Increased availability of urgent appointments in primary care will mean fewer people need to travel • Majority travel by car <p>Actions</p> <ul style="list-style-type: none"> • Explore ideas for providing transport for those without easy access to transport and factor costs into business case (eg shuttle bus between city centre and NGH, park and ride facility) • Explore potential for using technology to reduce need for face-to-face appointments • Provide information on travel to NGH site (bus routes /frequency) • Discuss parking capacity at NGH with STH • Discuss how could improve transport to NGH site with providers, South Yorkshire Transport Executive and community transport providers (NB – already
Potential exacerbation of health inequalities	<ul style="list-style-type: none"> • Disproportionately invest our effort and resources into those communities with most need • Address registration issues for homeless and other vulnerable groups • Maintain approaches being used successfully for non-English speaking patients and share best practice with all practices in Sheffield • Link in with the ongoing work on digital literacy taking place in city to address digital exclusion. • Run targeted education / awareness campaigns to increase understanding of services available and how to access, including signposting and self-care • Consider skill mix of workforce, including mental health, in the UTC and extended access hubs
Loss of services in city centre	<ul style="list-style-type: none"> • Redistribution of resources and investment into primary care to allow access through local services • Improved signposting/triage to local services

	<ul style="list-style-type: none"> • Ongoing support in place to support practices, including those in city centre, to ensure sustainability and resilience • Review GP services for homeless to ensure sufficient capacity • Review the extended access (hub) provision • Work with city centre practices to encourage more students to register with a GP in Sheffield.
<p>Do-ability re neighbourhoods/ primary care</p>	<ul style="list-style-type: none"> • Ongoing use of non-recurrent funding to develop practices, increase sustainability and resilience and improve access • Share work already taking place to improve access, quality and sustainability to increase general awareness and confidence • Explore different contractual mechanisms to support practices to deliver our commissioning intentions • Invest in estate development in line with the CCG's primary care estates strategy • Continue work with practices to support signposting and increase awareness of local services to help reduce demand on practices • Continue work re workforce development and skill mix in practices/neighbourhoods • Continue to support neighbourhoods to introduce governance frameworks • Continue work to deploy new technologies to support practices, including city-wide Wi-Fi and e-consultations

Appendix 3: Alternative Suggestions

The following summaries detail the outputs of the work done to review the alternative suggestions made in the consultation, including workshops held with providers and commissioners and the urgent care public reference group.

For the provider and commissioner workshops the suggestions were grouped under common themes, as several of the suggestions were similar and likely to have the same advantages and disadvantages. A summary has been produced for each group and details of which suggestions the group includes are included in the heading. As no details were provided for any of the suggestions, the summaries also set out how the CCG interpreted the way each suggestion would work.

Although consideration has been given to whether these could potentially be viable approaches, the main focus has been on understanding the potential benefits and consequences and whether these should be explored further. The conclusions for six of the 17 suggestions were presented to PCCC in August and these are the summaries for the remaining suggestions, which detail the conclusions reached under the following categories:

- Sustainable activity levels - whether numbers of patients will mean services are to be too small to be economically viable or too large to be delivered safely
- Right Thing First Time – whether the approach would enable patients to get the care they need at the first place they go
- Logistical Feasibility – including staffing requirements, compliance with national guidance, and building capacity
- Benefits
- Disadvantages
- View – the conclusion reached by the CCG about each suggestion

UTC at Northern General, plus additional service in city centre

Suggestion 1 - Keep the Walk In Centre open (and shut the Minor Injuries Unit)

Suggestion 2 - Keep the Minor Injuries Unit open (and shut the Walk In Centre)

This is based on having an adult UTC at NGH, children being seen at SC(NHS)FT and the continuation of one of the centrally located minor illness or injury services in its current form.

The GP Collaborative service would be decommissioned and the functions incorporated into or co-located with the NGH UTC in line with the Integrated Urgent Care specification.

The majority of adults and children with minor illness symptoms would be seen in their own practice or neighbourhood during core hours. During evenings and weekends patients needing urgent same day care (and those needing planned care) would be seen in a practice within their locality. A minority of adults and children with minor illness symptoms and all those with minor injuries would be seen at their respective UTC during core hours, evenings and weekends. Overnight, adults and children with minor illness symptoms would only be seen via an appointment booked through 111 at the NGH Urgent Treatment Centre. Any patients requiring treatment for minor injuries overnight would be seen in the relevant ED.

Future State System Summary			
Weekdays 08:00 – 18:30	Weekends 08:00 – 18:30	Twilight 18:30 – 22:00 (7 Days)	Overnight 22:00 – 08:00 (7 Days)
Patients who need continuity of care seen within practice	Patients seen in a practice within their locality (service also provides planned care)	Patients seen in a practice within their locality (service also provides planned care)	Adults and children with illness symptoms seen within NGH Urgent Treatment Centre booked appointments only
Patients who do not need continuity of care seen within their practice or neighbourhood			
Adults at NGH UTC (illness symptoms and minor injuries)	Adults at NGH UTC (illness symptoms and minor injuries)	Adults at NGH UTC (illness symptoms and minor injuries)	Adults and children with injury symptoms seen within their respective EDs (walk in only)
Children at SC(NHS)FT	Children at SC(NHS)FT	Children at SC(NHS)FT	
Adult minor injury service in a central location OR	Adult minor injury service in a central location OR	Adult minor injury service in a central location OR	
Adult minor illness service in a central location	Adult minor illness service in a central location	Adult minor illness service in a central location	
Key	Minor Illness Service ■	Minor Injury Service ■	Minor Illness & Injury Service ■
Option Viability Assessment			
Sustainable Activity Levels	<ul style="list-style-type: none"> Initial indication is that that activity levels sustainable for a UTC and one of the current services, however full feasibility modelling required 		
Right Thing First Time	<ul style="list-style-type: none"> UTC and co-location with A&E allows patients to receive the most appropriate care expediently. However, would not eliminate confusion over which service to use 		
Logistical Feasibility	<ul style="list-style-type: none"> Complies with national UTC guidance 		
Benefits	<ul style="list-style-type: none"> Provides a secondary point of access in city centre negating some concerns about access to NGH site Retains a city centre service, which was highlighted as desirable in consultation feedback 		
Disadvantages	<ul style="list-style-type: none"> Concerns raised re access to both Broad Lane (transport) and RHH sites (parking) Duplication of services/resource, especially for minor illness Could present with emergency complaint that requires transfer to A&E Will not release (as much) money to reinvest in primary care Lose opportunity to encourage continuity of care through GP 		
View	Could be benefits in retaining a service for injuries – less benefit in retaining illness service as preferable to provide in practice		

UTC at Northern General, plus additional service in city centre

Suggestion 12 Provide an enhanced minor ailments Walk In Centre staffed by prescribing nurses and prescribing pharmacists at the Wicker Pharmacy and Mobility shop

This consists of an adult UTC at NGH **plus a minor ailments service somewhere central**. The ailments service would be staffed by prescribing pharmacists and prescribing nurses but would not include GPs and would not have any diagnostic facilities. Children would be seen at SC(NHS)FT.

The GP Collaborative service would be decommissioned and the functions incorporated into or co-located with the NGH UTC in line with the Integrated Urgent Care specification.

The majority of adults and children with minor illness symptoms would be seen in their own practice or neighbourhood during core hours. During evenings and weekends patients needing urgent same day care (and those needing planned care) would be seen in a practice within their locality. A minority of adults and children with minor illness symptoms and all those with minor injuries would be seen at their respective UTC during core hours, evenings and weekends. Overnight, adults and children with minor illness symptoms would only be seen via an appointment booked through 111 at the NGH Urgent Treatment Centre. Any patients requiring treatment for minor injuries overnight would be seen in the relevant ED.

Future State System Summary			
Weekdays 08:00 – 18:30	Weekends 08:00 – 18:30	Twilight 18:30 – 22:00 (7 Days)	Overnight 22:00 – 08:00 (7 Days)
Patients who need continuity of care seen within practice	Patients seen in a practice within their locality (service also provides planned care)	Patients seen in a practice within their locality (service also provides planned care)	Adults and children with illness symptoms seen within NGH Urgent Treatment Centre (booked appointments only)
Patients who do not need continuity of care seen within their practice or neighbourhood			
Adults at NGH UTC (illness symptoms and minor injuries)	Adults at NGH UTC (illness symptoms and minor injuries)	Adults at NGH UTC (illness symptoms and minor injuries)	
Children at SC(NHS)FT	Children at SC(NHS)FT	Children at SC(NHS)FT	Adults and children with injury symptoms seen within their respective EDs (walk in only)
Adult minor ailments service somewhere central	Adult minor ailments service somewhere central	Adult minor ailments service somewhere central	
Key	Minor Illness Service ■	Minor Injury Service ■	Minor Illness & Injury Service ■
Option Viability Assessment			
Sustainable Activity Levels	<ul style="list-style-type: none"> Further work required to assess whether minor ailment activity levels sustainable 		
Right Thing First Time	<ul style="list-style-type: none"> UTC treating both minor illness and minor injury, plus co-location with A&E, allows most patients to receive the most appropriate care expediently However, likely to create confusion over which service to use / when to use minor ailments service 		
Logistical Feasibility	<ul style="list-style-type: none"> Complies with national UTC guidance 		
Benefits	<ul style="list-style-type: none"> Provides a secondary point of access in city centre negating some concerns about access to NGH site Use knowledge and skills of pharmacists 		
Disadvantages	<ul style="list-style-type: none"> Not able to cover all minor illness and minor injuries Unlikely to be seen as an alternative to WIC or MIU by public Poor parking 		
View	Unlikely to add sufficient value to justify cost. Work already taking place to consider development of minor ailments services in city so may be progressed through that if there is found to be a need. 8		

One Central UTC

Suggestion 5 Site the UTC at the Walk In Centre (instead of NGH)
Suggestion 7 Site the UTC at the Royal Hallamshire Hospital (instead of NGH)

This proposes commissioning 1 adult UTC for the city **somewhere central** that would provide a minor illness and injury service to adults. Children would be seen at SC(NHS)FT.

The GP Collaborative service would be decommissioned and would either be combined into any UTC service specification (minor illness service overnight) based in the central location. Otherwise a new service would be commissioned and based in the current location at NGH.

The majority of adults and children with minor illness symptoms would be seen in their own practice or neighbourhood during core hours. During evenings and weekends patients needing urgent same day care (and those needing planned care) would be seen in a practice within their locality. A minority of adults and children with minor illness symptoms and all those with minor injuries would be seen at their respective UTC during core hours, evenings and weekends. Overnight, adults and children with minor illness symptoms would only be seen via an appointment booked through 111 at the overnight illness service. **Further consideration would be needed to decide whether to keep this service sited at the NGH or move it to the central UTC** Any patients requiring treatment for minor injuries overnight would be seen in the relevant ED.

Future State System Summary			
Weekdays 08:00 – 18:30	Weekends 08:00 – 18:30	Twilight 18:30 – 22:00 (7 Days)	Overnight 22:00 – 08:00 (7 Days)
Patients who need continuity of care seen within practice	Patients seen in a practice within their locality (service also provides planned care)	Patients seen in a practice within their locality (service also provides planned care)	Adults and children at central Urgent Treatment Centre (illness symptoms and booked appointments only) OR Leave location at NGH
Patients who do not need continuity of care seen within their practice or neighbourhood			
Adults at centrally located UTC (illness symptoms and minor injuries)	Adults at centrally located UTC (illness symptoms and minor injuries)	Adults at centrally located UTC (illness symptoms and minor injuries)	Adults and children with injury symptoms seen within their respective EDs (walk in only)
Children at SC(NHS)FT	Children at SC(NHS)FT	Children at SC(NHS)FT	
Key Minor Illness Service ■ Minor Injury Service ■ Minor Illness & Injury Service ■			
Option Viability Assessment			
Sustainable Activity Levels	<ul style="list-style-type: none"> Activity levels sustainable (based on pre-consultation modelling) 		
Right Thing First Time	<ul style="list-style-type: none"> Combines minor injuries and illness so more people will get right care first time. However not co-located with A&E so risk of needing to travel if more complex care required. 		
Logistical Feasibility	<ul style="list-style-type: none"> Complies with national UTC guidance Would require further assessment to determine whether there is sufficient space to create a UTC in current MIU area 		
Benefits	<ul style="list-style-type: none"> More central location allows for easier access by public transport Would be more accessible for people living in the south of the city 		
Disadvantages	<ul style="list-style-type: none"> Not co-located with A&E so people presenting with emergency needs will have to be transferred Concerns raised re access to both Broad Lane (public transport) and RHH sites (parking) Limits the no of staff that could be redeployed into primary care/ED Splits urgent and emergency care expertise across 2 sites Negative impact on ability to staff other primary care services May encourage duplication re minor illness Loss of opportunity to encourage continuity of care through GP 		
View	Needs to be fully modelled to determine costs and workforce implications. Need to determine potential impact on reducing health inequalities and if this and other benefits outweigh the benefits of co-location with A&E.		

2 UTCs 1 at NGH plus 1 somewhere central

Suggestion 6 Have a UTC in the south as well as one in the north
Suggestion 8 Option 1 plus a second UTC at the RHH

This would require the CCG to commission 2 adults UTCs, one at the Northern General site and one somewhere central. Both services would see adults with minor illness and injury symptoms. Children would be seen at SC(NHS)FT.

The GP Collaborative service would be decommissioned and the functions incorporated into or co-located with one of the adult UTCs in line with the Integrated Urgent Care specification

The majority of adults and children with minor illness symptoms would be seen in their own practice or neighbourhood during core hours. During evenings and weekends patients needing urgent same day care (and those needing planned care) would be seen within their locality. Overnight, adults and children with minor illness symptoms would only be seen via an appointment booked through 111. **Further consideration would be needed to decide whether to keep this service sited at the NGH UTC or move it the central Urgent Treatment Centre service.** Insufficient staff are likely to be available to staff the overnight service at 2 UTC locations within the city.

Future State System Summary			
Weekdays 08:00 – 18:30	Weekends 08:00 – 18:30	Twilight 18:30 – 22:00 (7 Days)	Overnight 22:00 – 08:00 (7 Days)
Patients who need continuity of care seen within practice	Patients seen in a practice within their locality (service also provides planned care)	Patients seen in a practice within their locality (service also provides planned care)	Adults and children at NGH Urgent Treatment Centre or at the central UTC location (illness symptoms and booked appointments only)
Patients who do not need continuity of care seen within their practice or neighbourhood			
Adults at NGH UTC OR centrally located UTC (illness symptoms and minor injuries)	Adults at NGH UTC OR centrally located UTC (illness symptoms and minor injuries)	Adults at NGH UTC OR centrally located UTC (illness symptoms and minor injuries)	Adults and children with injury symptoms seen within their respective EDs (walk in only)
Children at SC(NHS)FT	Children at SC(NHS)FT	Children at SC(NHS)FT	
Key Minor Illness Service ■ Minor Injury Service ■ Minor Illness & Injury Service ■			
Option Viability Assessment			
Sustainable Activity Levels	<ul style="list-style-type: none"> Initial indication that activity levels sustainable, requires full feasibility modelling to confirm 		
Right Thing First Time	<ul style="list-style-type: none"> Combining minor illness and minor injury in both services, plus co-location of 1 UTC with A&E, allows more patients to receive the most appropriate care expediently 		
Logistical Feasibility	<ul style="list-style-type: none"> Complies with national UTC guidance Query over workforce sustainability and implications on wider system - need to fully model Would require further assessment to determine whether there is sufficient space to create a UTC in current MIU area 		
Benefits	<ul style="list-style-type: none"> More central location allows for easier access by public transport Improved access for people in South Consistent approach – combines minor illness and minor injury 		
Disadvantages	<ul style="list-style-type: none"> Not support best use of resources Will incur capital costs The south is not the area with the greatest health needs Does not promote GP access / continuity of care 		
View	Needs to be fully modelled to determine costs and workforce implications. Could be opportunity ¹⁰ for greater reduction in health inequalities if second UTC sited to support greatest need. Could have implications re investment in primary care / other areas.		

Urgent Eye Care No Change

Suggestion 15 Keep the Emergency Eye Clinic open

This would see no changes to the current system with both urgent and emergency eye care being seen via a combination of EEC/ED and PEARs. Eye care overnight would be provided solely within ED.

Future State System Summary			
Weekdays 08:00 – 18:30	Weekends 08:00 – 18:30	Twilight 18:30 – 22:00 (7 Days)	Overnight 22:00 – 08:00 (7 Days)
Urgent eye care seen at EEC/ED/PEARs*	Urgent eye care seen at EEC/ED/PEARs*	Urgent eye care seen at EEC/ED/PEARs*	Urgent eye care seen at ED
Option Viability Assessment			
Sustainable Activity Levels	<ul style="list-style-type: none"> • Current service has sustainable activity volumes 		
Right Thing First Time	<ul style="list-style-type: none"> • No secondary referrals required as all conditions (including sight-threatening) can be treated 		
Logistical Feasibility	<ul style="list-style-type: none"> • Current service is feasible 		
Benefits	<ul style="list-style-type: none"> • Only requires high cost equipment at one site • No variation in quality of care • Good links to central public transport • Is recognised/trusted service 		
Disadvantages	<ul style="list-style-type: none"> • Access inequitable – depends on where people live • Does not use resources to best effect • Does not decrease geographical inequalities • Does not offer care closer to home • Poor parking at RHH 		
View	No change would not deliver the objectives of making more care available closer to home and making best use of resources. However, since the consultation providers have indicated they could now work together to meet these objectives through improved signposting rather than reconfiguring services.		

Urgent Eye Care provided in 'Optometry Cluster Locations'

- Suggestion 16 Scale up the existing PEARs service (to accommodate urgent eye conditions)
 Suggestion 17 Use optometrists working in clusters similar to neighbourhoods

This is similar to the CCG's proposed community-based option but would instead see optometrists operating in clusters similar to primary care neighbourhoods.

Future State System Summary			
Weekdays 08:00 – 18:30	Weekends 08:00 – 18:30	Twilight 18:30 – 22:00 (7 Days)	Overnight 22:00 – 08:00 (7 Days)
Urgent eye care is undertaken in the community across a number of sites			Urgent eye care seen at ED
Option Viability Assessment			
Sustainable Activity Levels	Based on the modelling for the proposed option, activity levels could be sustainable		
Right Thing First Time	This would be the case for those sent by NHS 111. However, patients self-referring would need to be able to determine whether their condition needed urgent or emergency care which could delay treatment if judgement is incorrect.		
Logistical Feasibility	<ul style="list-style-type: none"> This is very similar to the proposed option so assumption is that this would be feasible Potential capital costs for equipment required to set up 		
Benefits	<ul style="list-style-type: none"> Providing in local areas / closer to home improves ease of access (which is particularly important given age profile and nature of conditions) Able to influence geographical spread of locations across city to ensure equity of access Integration of optometry and ophthalmology – city-wide solution Longer opening hours 		
Disadvantages	<ul style="list-style-type: none"> Cluster approach is less close to home than proposed dispersed model Potential risk of service variation 		
View	This is very similar to the option proposed, however offers fewer benefits as would mean services not as close to home if in clusters and would be more complicated to implement		

Appendix 4: Response from Scrutiny Committee

SENT BY EMAIL ONLY

Dear Tim

Re: Urgent Primary Care Proposals

I am writing to you as Chair of Sheffield City Council's Healthier Communities and Adult Social Care Scrutiny Committee, to give you our formal response to your proposals for changing Urgent Primary Care Services in Sheffield.

1 Consultation Process

From the start of the consultation process, we were disappointed that the three options presented were very similar, all involving the closure of the Broad Lane Walk in Centre and the Minor Injuries Unit. For many, this was frustrating, and gave the impression that the consultation was a paper exercise. We were also disappointed at the lack of early public engagement in drawing up the proposals for consultation, and echo HealthWatch's concern that the public and statutory stakeholders were involved at a late stage and with limited opportunities to share their views.

We feel that it's really important that big changes to health services are done with people, not 'to' people – the overwhelmingly negative tone of the responses to the consultation suggest that on this occasion, the engagement process hasn't been effective in bringing the public on board with the proposals. We understand that during the public consultation, alternative options were suggested. We are keen to

understand how the CCG has considered these alternatives, and whether any of them, or elements of them are feasible.

Key Issues

Do any of the suggestions raised through the consultation process provide feasible alternatives to the proposals that were consulted on, and how are they being considered by the CCG?

2 Proposed siting of the Urgent Treatment Centre at the Northern General

Concerns about access and capacity at the Northern General Campus are well known. Parking is a long-standing problem, and air quality has been highlighted as an issue. It is expensive and difficult to access by public transport for those in the south of the City, including our significant student population – and for many in the city would require 2 bus rides and a journey time of over an hour. The site is difficult to navigate once you are there, and Councillors have heard concerns from people who feel unsafe in the areas surrounding the Northern General, particularly at night.

We fear that this will deter people from seeking medical treatment at the appropriate time, which could lead to worse outcomes for patients, and higher costs for the health and social care system.

We also have concerns that the impact of these proposals may cross over into other health service areas –for example, people in the south of the City may choose to use services outside of Sheffield rather than face a difficult journey to the Northern General.

Whilst we recognise that the aim of the proposal is to create more capacity within urgent primary care so people who currently use the Walk in Centre will not need to travel to the UTC (our concerns about this part of the proposal are set out in the next section), current users of the Minor Injuries Unit – 18,000 per year, will in all likelihood need to be treated at the UTC. We have not yet seen any information about expected patient flow or traffic modelling to demonstrate the likely impact of the proposals on the Northern General site and surrounding area, or what might be done to mitigate this.

We were alarmed to see in the consultation report that senior managers at the Northern General raised concerns about their ability to accommodate the service. Overall, this leaves us unconvinced that siting a UTC at the Northern General is a viable proposal.

We recognise that there are national expectations around establishing Urgent Treatment Centres, but we are not clear how much these guidelines are driving the proposals. We would be interested to understand what would happen if Sheffield chose not to set up an Urgent Treatment Centre, or if current arrangements could satisfy the UTC guidelines. We'd also be interesting in any learning from other areas who have gone through similar changes – what has been the impact in other areas where walk in centres and minor injuries units have been closed.

Key Issues

Is there evidence available to demonstrate that siting a UTC at the Northern General is viable in terms of capacity and appropriateness of the site?

What would the impact of siting the UTC at the NGH be – in terms of patient flow, increased number of journeys, traffic modelling etc

How can access to services be improved for people in the south of the city, and those who would find it difficult to get to the NGH?

Are there repercussions to not following the national guidelines on Urgent Treatment Centres? Can the guidelines be met by retaining current arrangements? What have other areas done?

3 Increasing capacity within Urgent Primary Care

We know from talking to our residents that access to GP services is a really important issue in the city. We support the ambition to provide more urgent care in GP practices, however without any detail available about additional investment or how practices will work together in neighbourhoods to provide these additional appointments, we don't have confidence that the proposals will work.

For us, the detail of how far residents might have to travel to get to a GP practice in their 'local area' is incredibly important. It can be easier to travel all the way into the city by public transport than across a neighbourhood. We know that neighbourhoods vary in size, population, number of practices and how well developed they are in terms of working together – which leaves us with concerns that residents in some neighbourhoods might find it harder to access the additional appointments made available –resulting in a greater number of trips to the Northern General, with all the difficulties that entails, or not getting treatment. That the impact of closing the Walk-in Centre and Minor Injuries Unit may affect people in the city disproportionately is of great concern to us – we want to be sure that any changes to health services reduce health inequalities, not make them worse.

We understand that of the 60,000 walk-in centre appointments per year, users tend to come disproportionately from certain postcodes and certain practices – but we have not seen any projected patient flow analysis, and it has not been made clear to us how many additional appointments need to be created through these proposals, and in which parts of the city they need to be.

We understand that students are frequent users of the walk-in centre – and we would like to know if any specific work is being done to encourage students to register with GP practices, and whether there is enough capacity within the primary care system to accommodate them if they do.

We are concerned that some groups of vulnerable people who currently use the Walk in Centre – for example, people with mental illness, people with English as a second language, homeless people, will find it difficult to access the additional appointments via a telephone triage system – and we would like to understand the potential impact of the proposals on these groups, and any mitigations that are being considered.

The minutes from the Health and Wellbeing Board’s consideration of Urgent Care in July 2017 supported proportionate re-investment into the areas of greatest need, but we have not been given any information about how the financial side of the proposals will work. We’ve been informed that the provision of additional urgent appointments in primary care is dependent upon investment that would come from closing the Walk in Centre and Minor Injuries Unit, however we would like to understand this in more detail. How much money will closing the Walk in Centre and Minor Injuries Unit free up? How much will it cost to establish the UTC? How much will be invested in primary care in the city, and in which parts of the city?

We are concerned about the capacity of the Primary Care system to make these proposals work. We are aware that practices find it difficult to recruit enough GPs, and whilst the CCG seemed confident that increasing the use of prescribing pharmacists and nurse practitioners will deliver the required number of additional appointments, we have not seen any workforce analysis to demonstrate what the workforce requirements of the proposals are, and whether that workforce is available in Sheffield.

We were also concerned to note that the consultation responses from primary care providers were not positive, leading us to question whether there is the willingness within the primary care system to make these proposals work.

Key Issues

How will the Neighbourhoods work together to provide additional appointments, is there evidence to demonstrate that this approach will work?

How many additional appointments are needed and in which parts of the city? Which groups and communities will be most affected by the proposals and what are the mitigations?

What are the workforce requirements and is the workforce available in Sheffield?

Is there evidence available to demonstrate that the primary care system is willing and able to make these proposals work?

How will the finances work? How much will it cost to create an Urgent Treatment Centre? How much will be invested in Primary Care, and in which areas/practices in the city?

Through our work as a Scrutiny Committee, we want to support and improve the NHS in Sheffield, and our aim has been to engage constructively with the CCG on these proposals. Overall however, we don't feel that we have seen sufficient evidence to assure us that the proposals are in the best interests of Sheffield people. We look forward to receiving your response to the issues we have raised, and trust that you will seriously consider our concerns as part of your decision making process.

Yours sincerely

A handwritten signature in black ink that reads "Pat Midgley". The signature is written in a cursive style with a large initial 'P'.

Pat Midgley

Chair, Healthier Communities and Adult Social Care Scrutiny Committee.

Appendix 5: Ethnic Origin of Attendees by Service

Figure 5-1

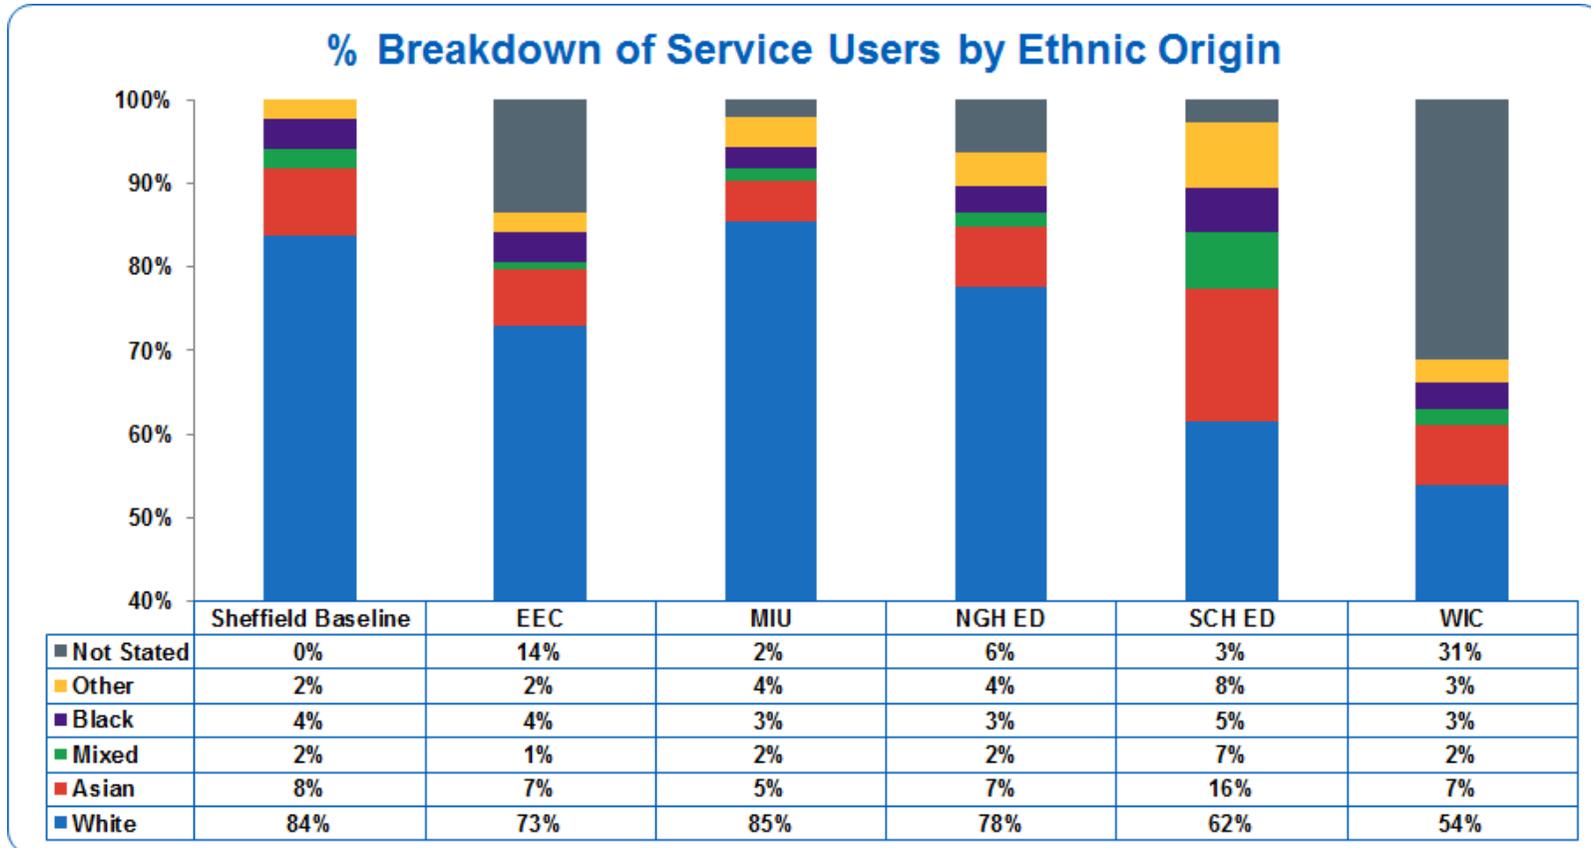

Figure 5-1 above shows a graphical representation of the ethnic origin recorded for services attendees compared to the breakdown of the entire Sheffield population. The only service that showed a substantially different demographic to the Sheffield population was SCH's ED which showed a much higher proportion of attendees from Asian/Mixed/Other ethnic origins. However as there is no proposed change to this service there should be no impact. It should also be noted that 31% of WIC attendees did not have their ethnic origin recorded.

Appendix 6: Vehicle Ownership

Figure 6-1

Households with no car or van in the household (Census 2011)

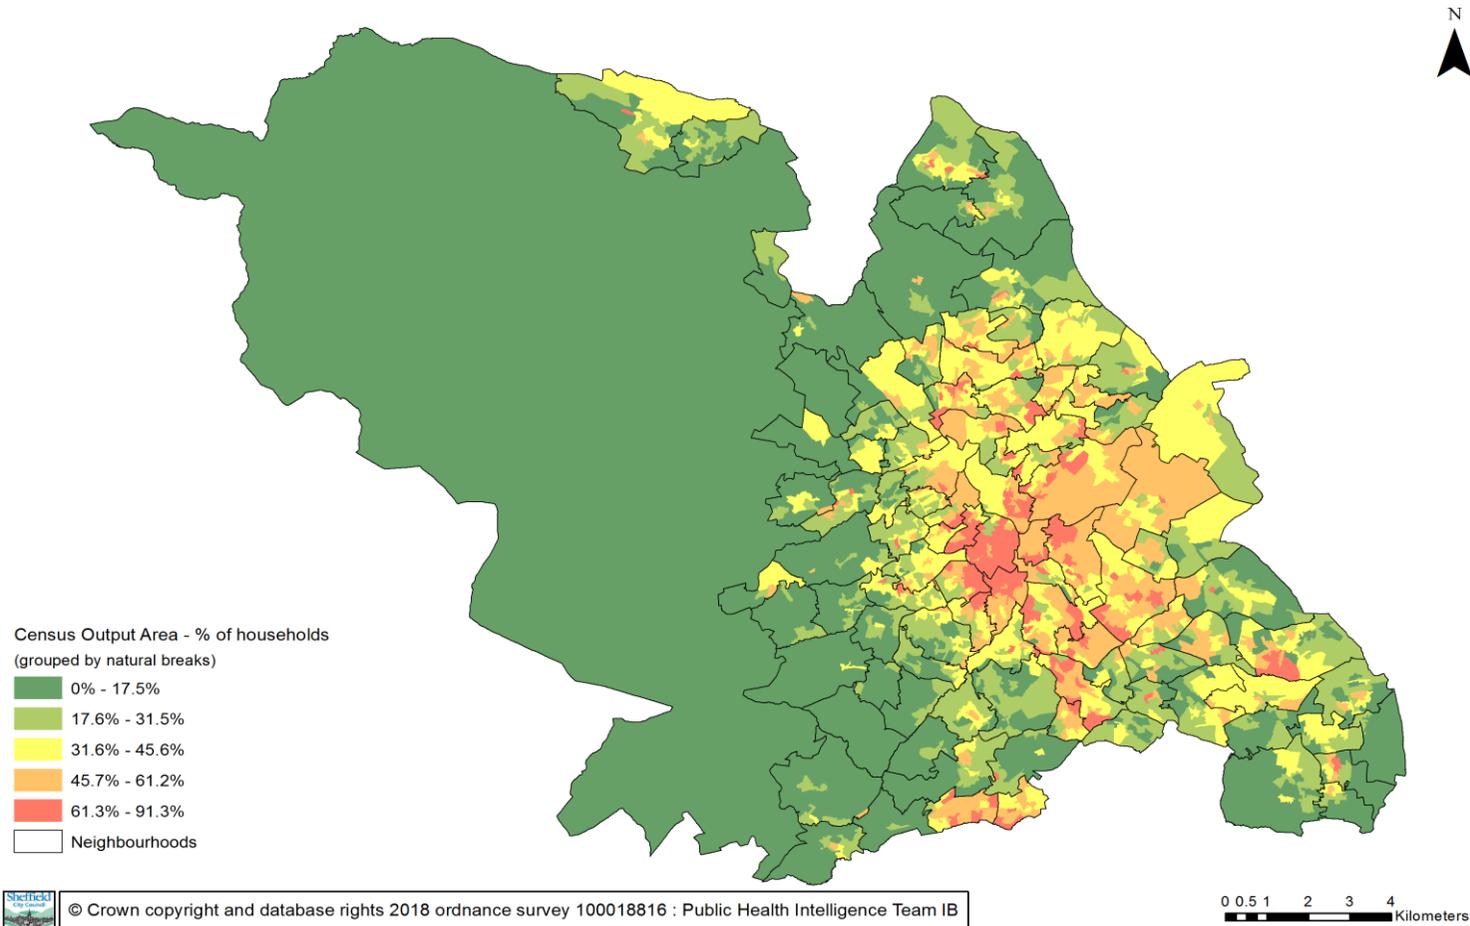

Figure 6-1 above shows a geographical heat map of areas of the % of households without access to a car/van in a Lower Super Output Area (LSOA). A higher percentage indicates lower access to a private vehicle in that area.

Figure 6-2

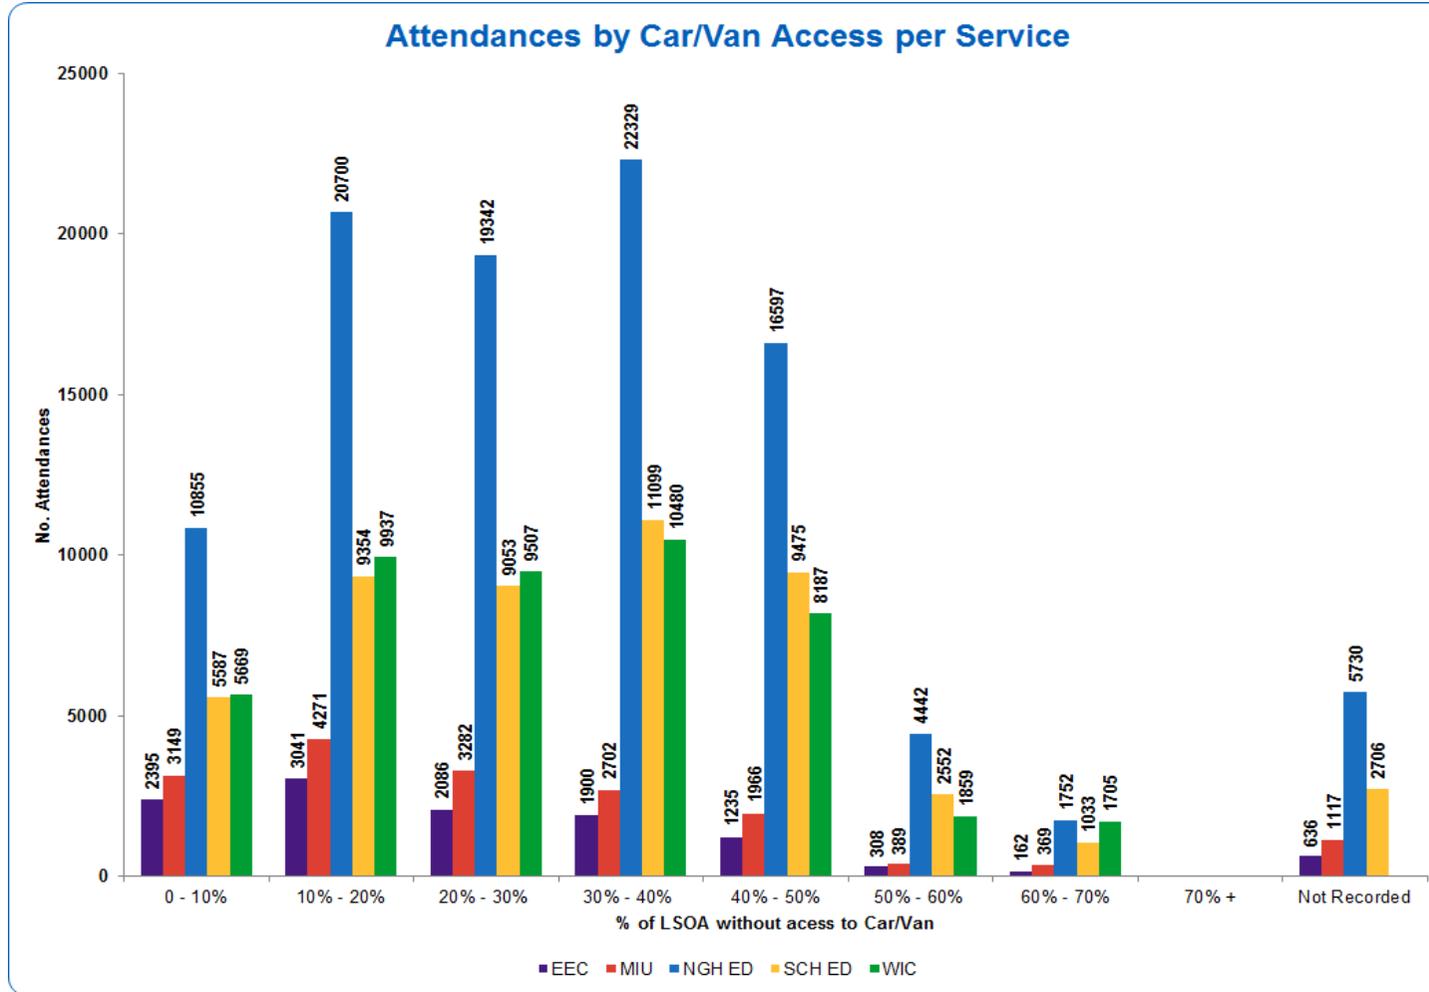

Figure 6-2 above shows the breakdown of the volume of attendances per service split into percentage bands of not having access to a private vehicle based on the attendees' LSOA. Access to a private vehicle tended to be good for all services with the majority of attendees coming from areas where 70% or greater of the population had access to a private vehicle. This was especially true of MIU where 62% of attendees were from such areas.

Appendix 7: Travel Times

Figure 7-1

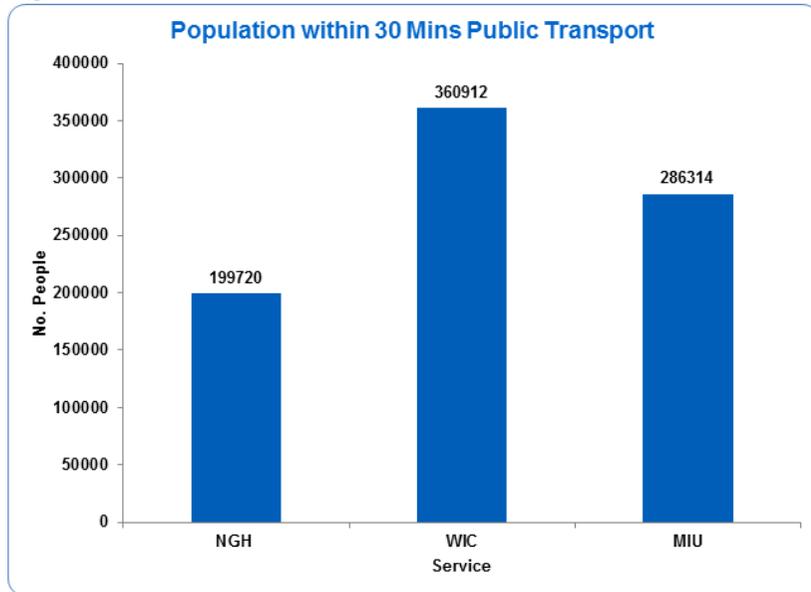

Figure 7-2

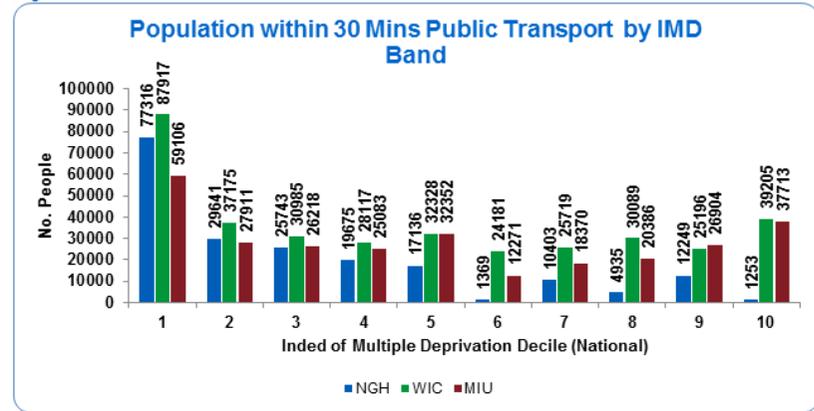

Figure 7-3

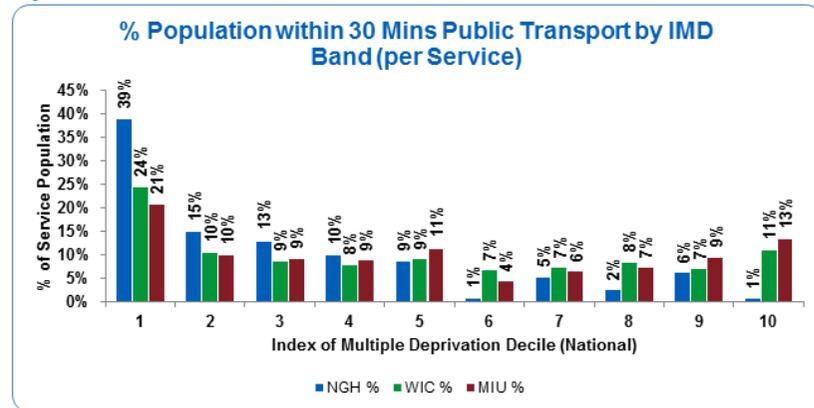

Figure 7-1 shows a graph detailing the volume of population within 30 minutes of the NGH/MIU/WIC sites via public transport, i.e. the volume of the population who could potentially travel to these sites via public transport. The data has been taken from Public Health’s “SHAPE” tool. Figure 8-1 shows the raw total volume demonstrating that less people have access to the NGH site via public transport. However figures 7-2/7-3 to right show the data broken down by the Index of Multiple Deprivation (IMD) showing that those who do have access to NGH tend to be from more deprived backgrounds compared to the other two services.

Figure 7-4

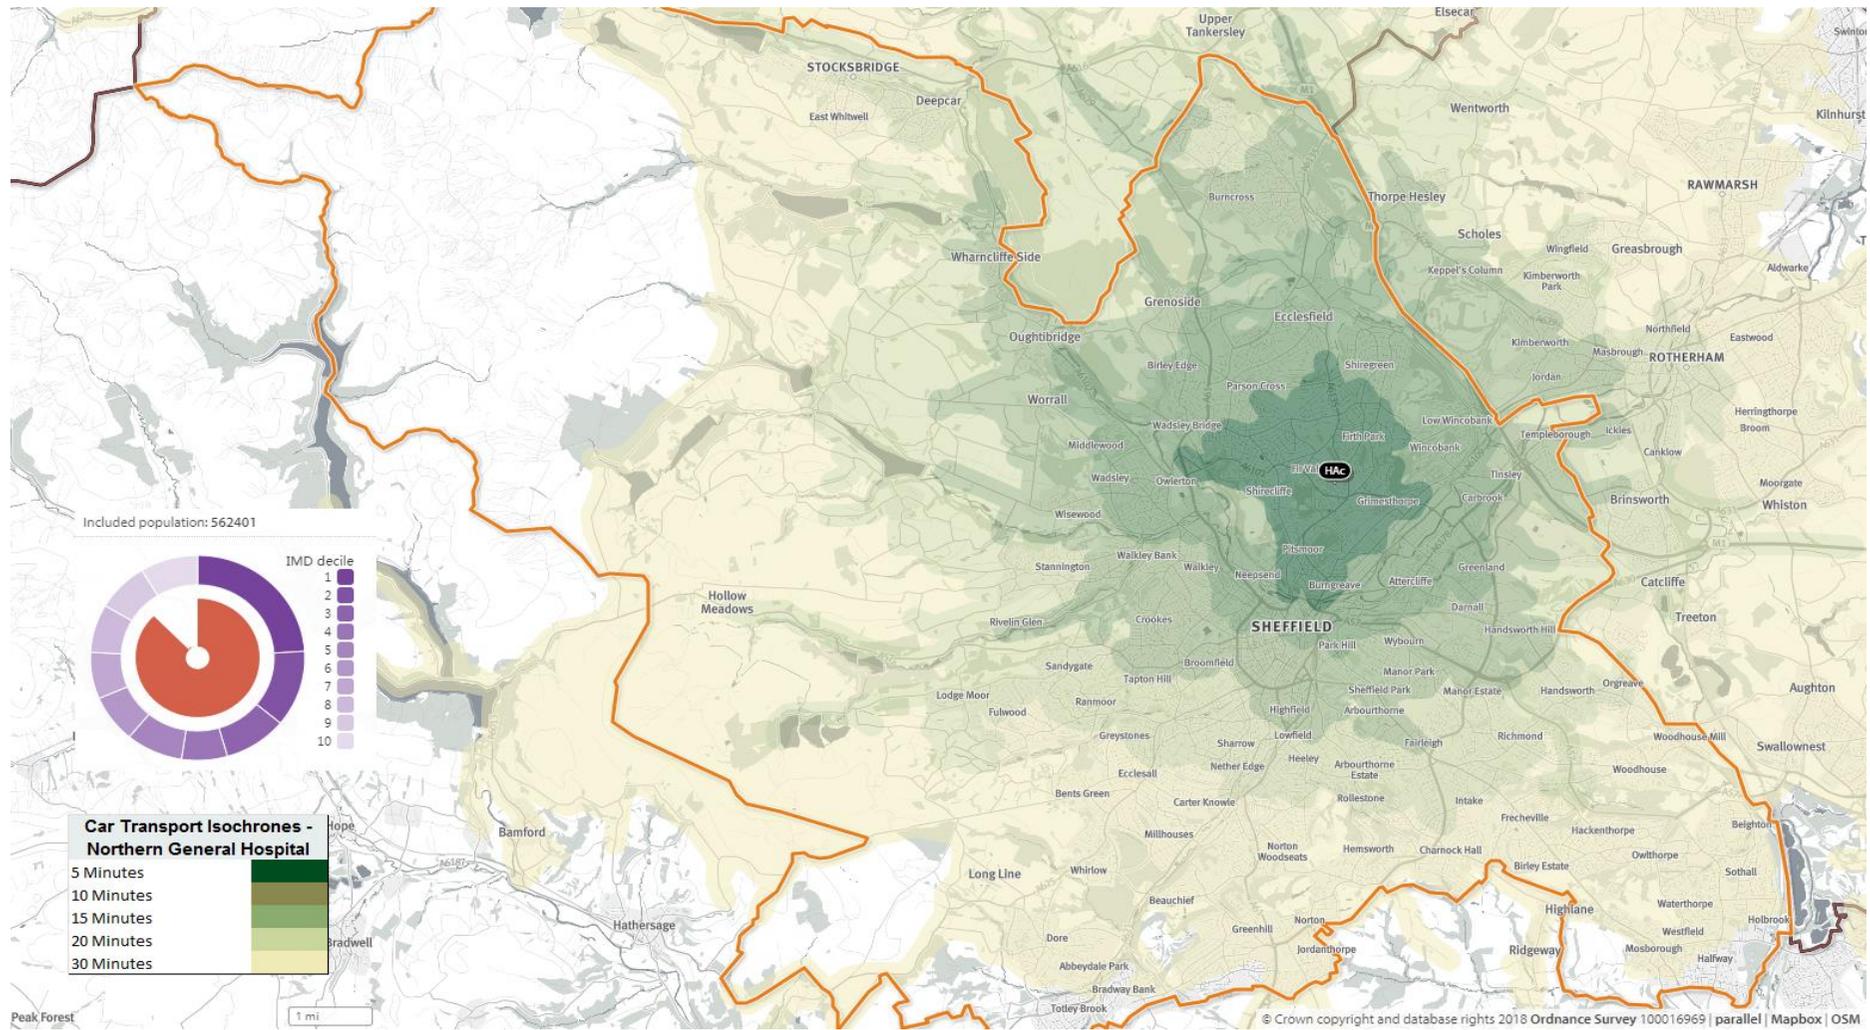

Figure 7-4 shows the areas of Sheffield that are within 5/10/15/20/30 minutes travel by car from the Northern General Hospital and details the total population (within the Sheffield LA Boundary) living in those areas (purple pie chart).

Figure 7-5

Figure 7-5 shows the areas of Sheffield that are within 5/10/15/20/30 minutes travel by public transport from the Northern General Hospital and details the total population (within the Sheffield LA Boundary) living in those areas (purple pie chart).

Figure 7-6

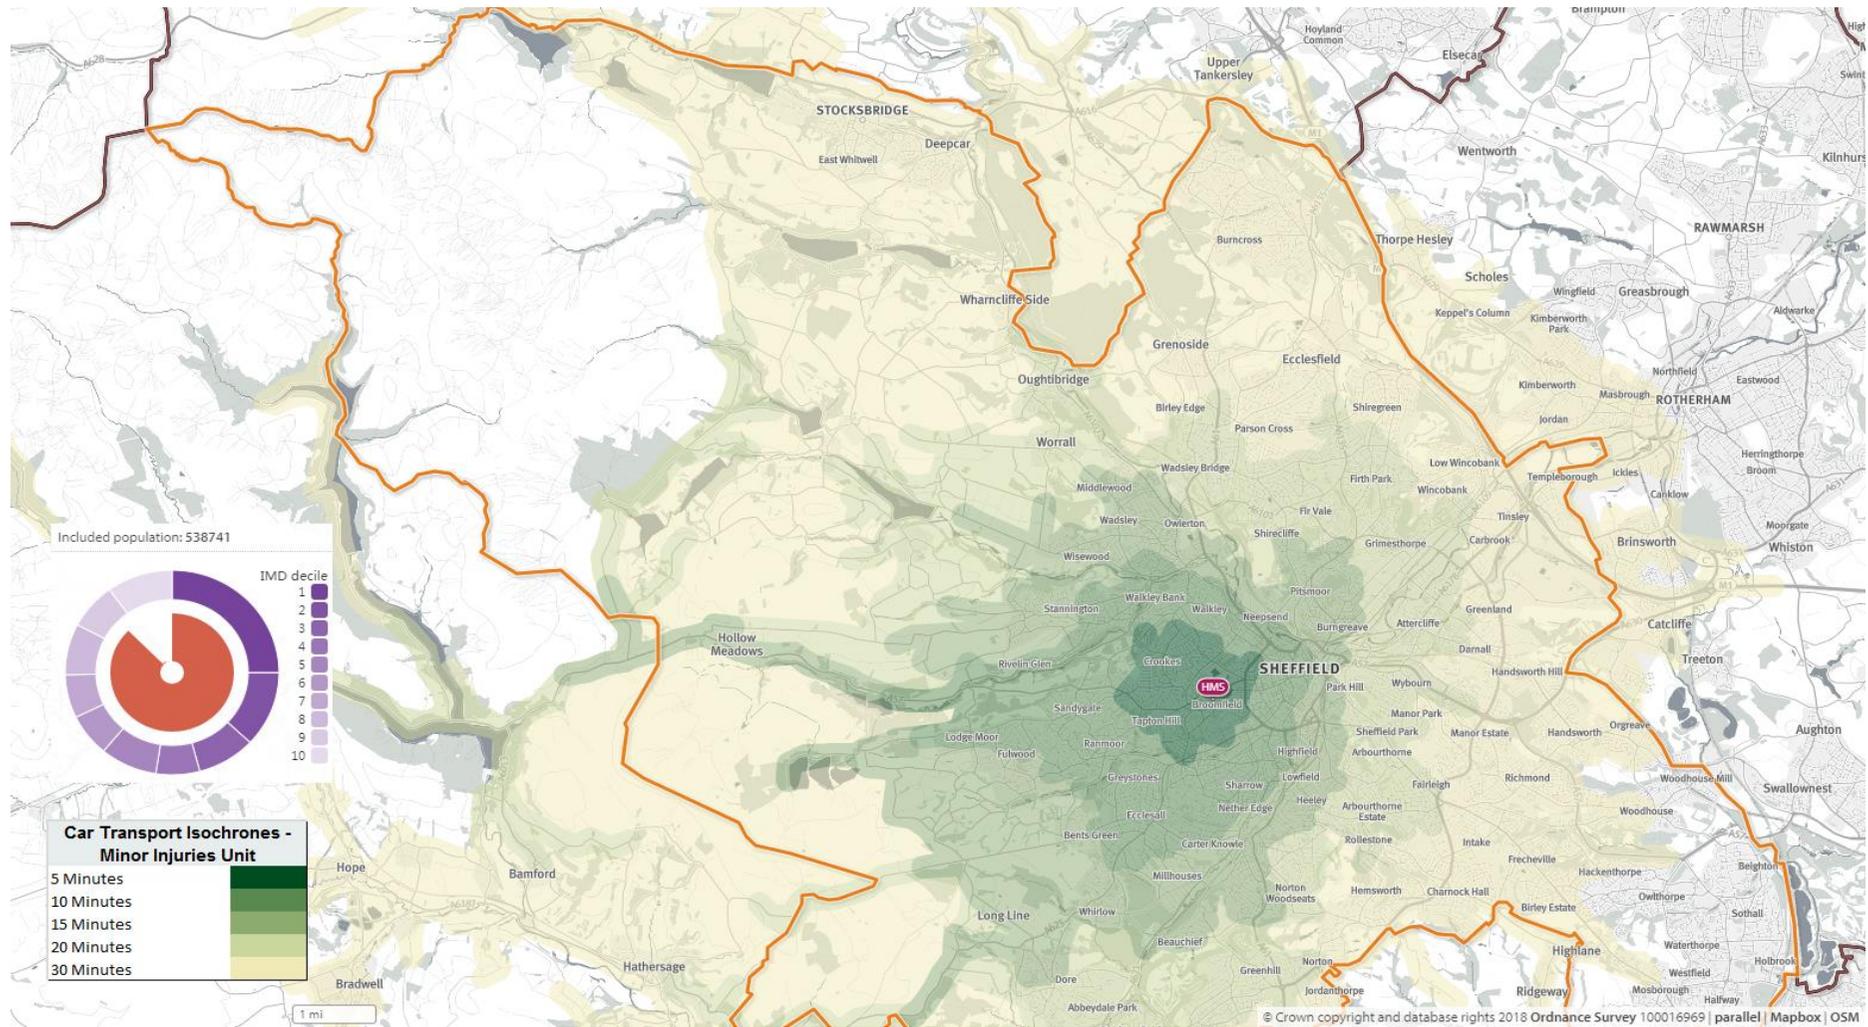

Figure 7-6 shows the areas of Sheffield that are within 5/10/15/20/30 minutes travel by car from the Minor Injuries Unit and details the total population (within the Sheffield LA Boundary) living in those areas (purple pie chart).

Figure 7-7

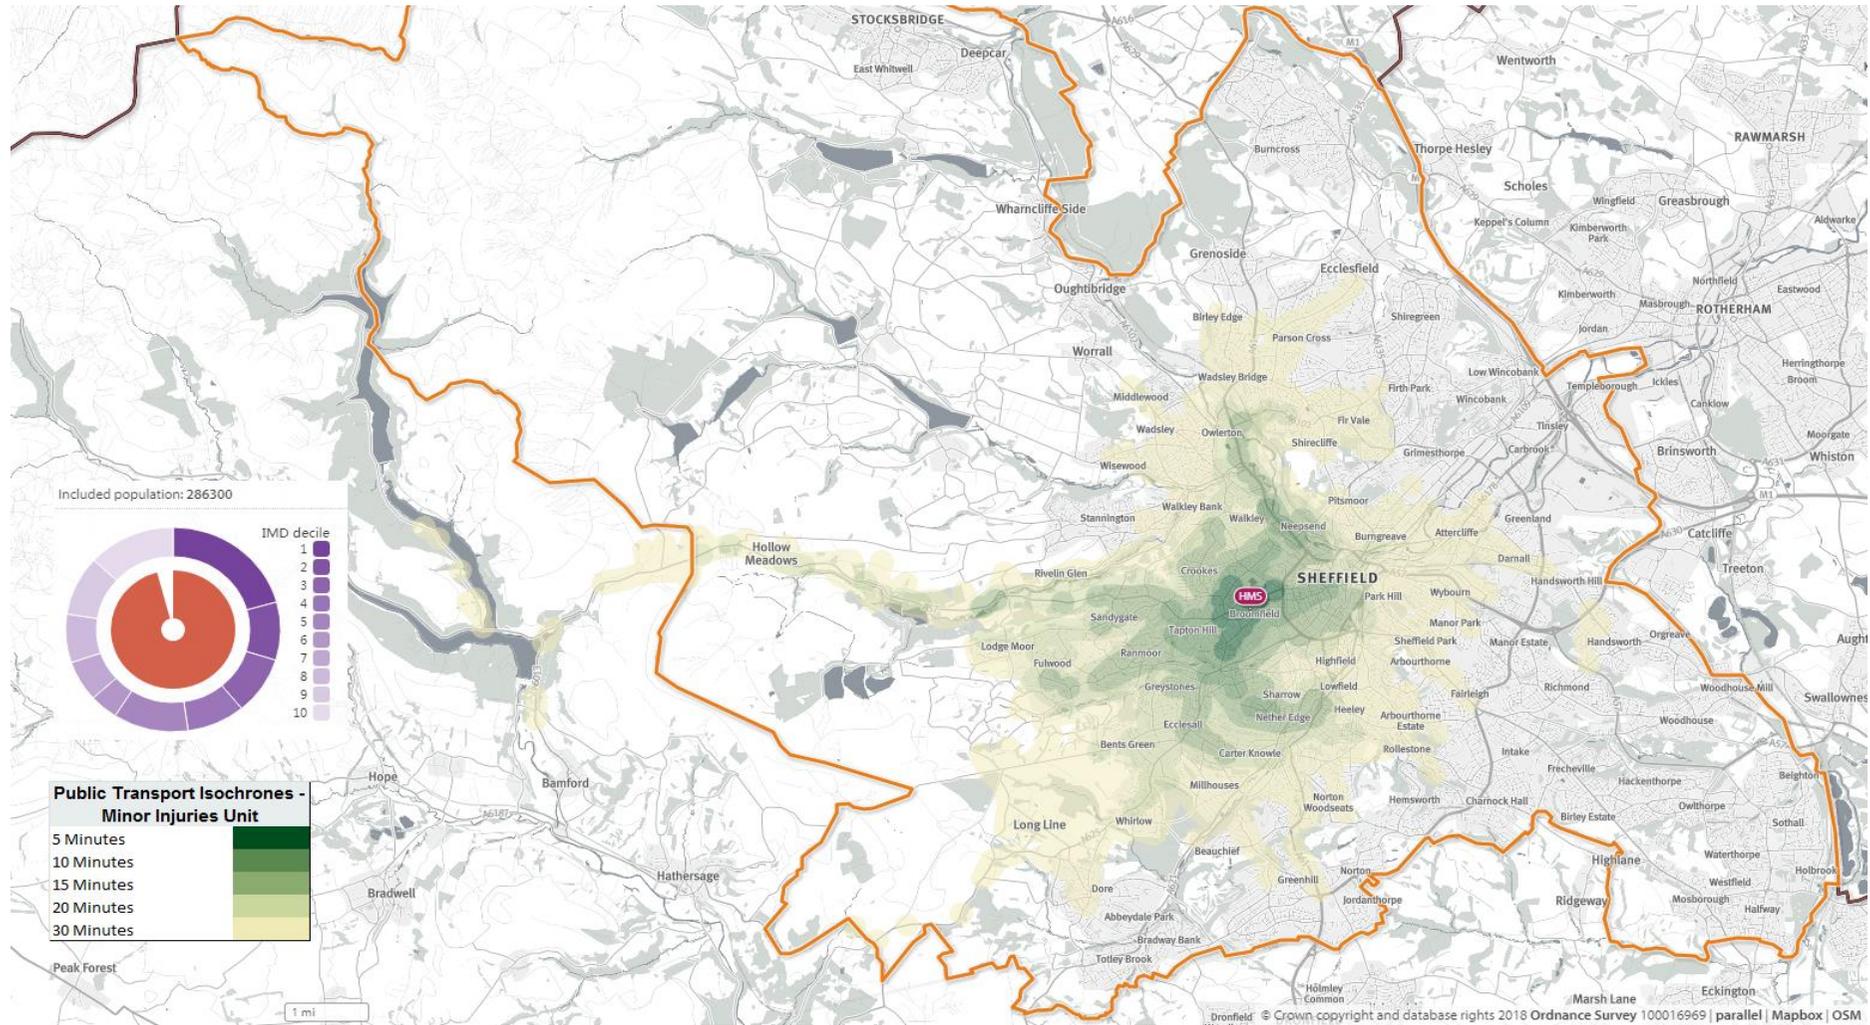

Figure 7-7 shows the areas of Sheffield that are within 5/10/15/20/30 minutes travel by public transport from the Minor Injuries Unit and details the total population (within the Sheffield LA Boundary) living in those areas (purple pie chart).

Figure 7-8

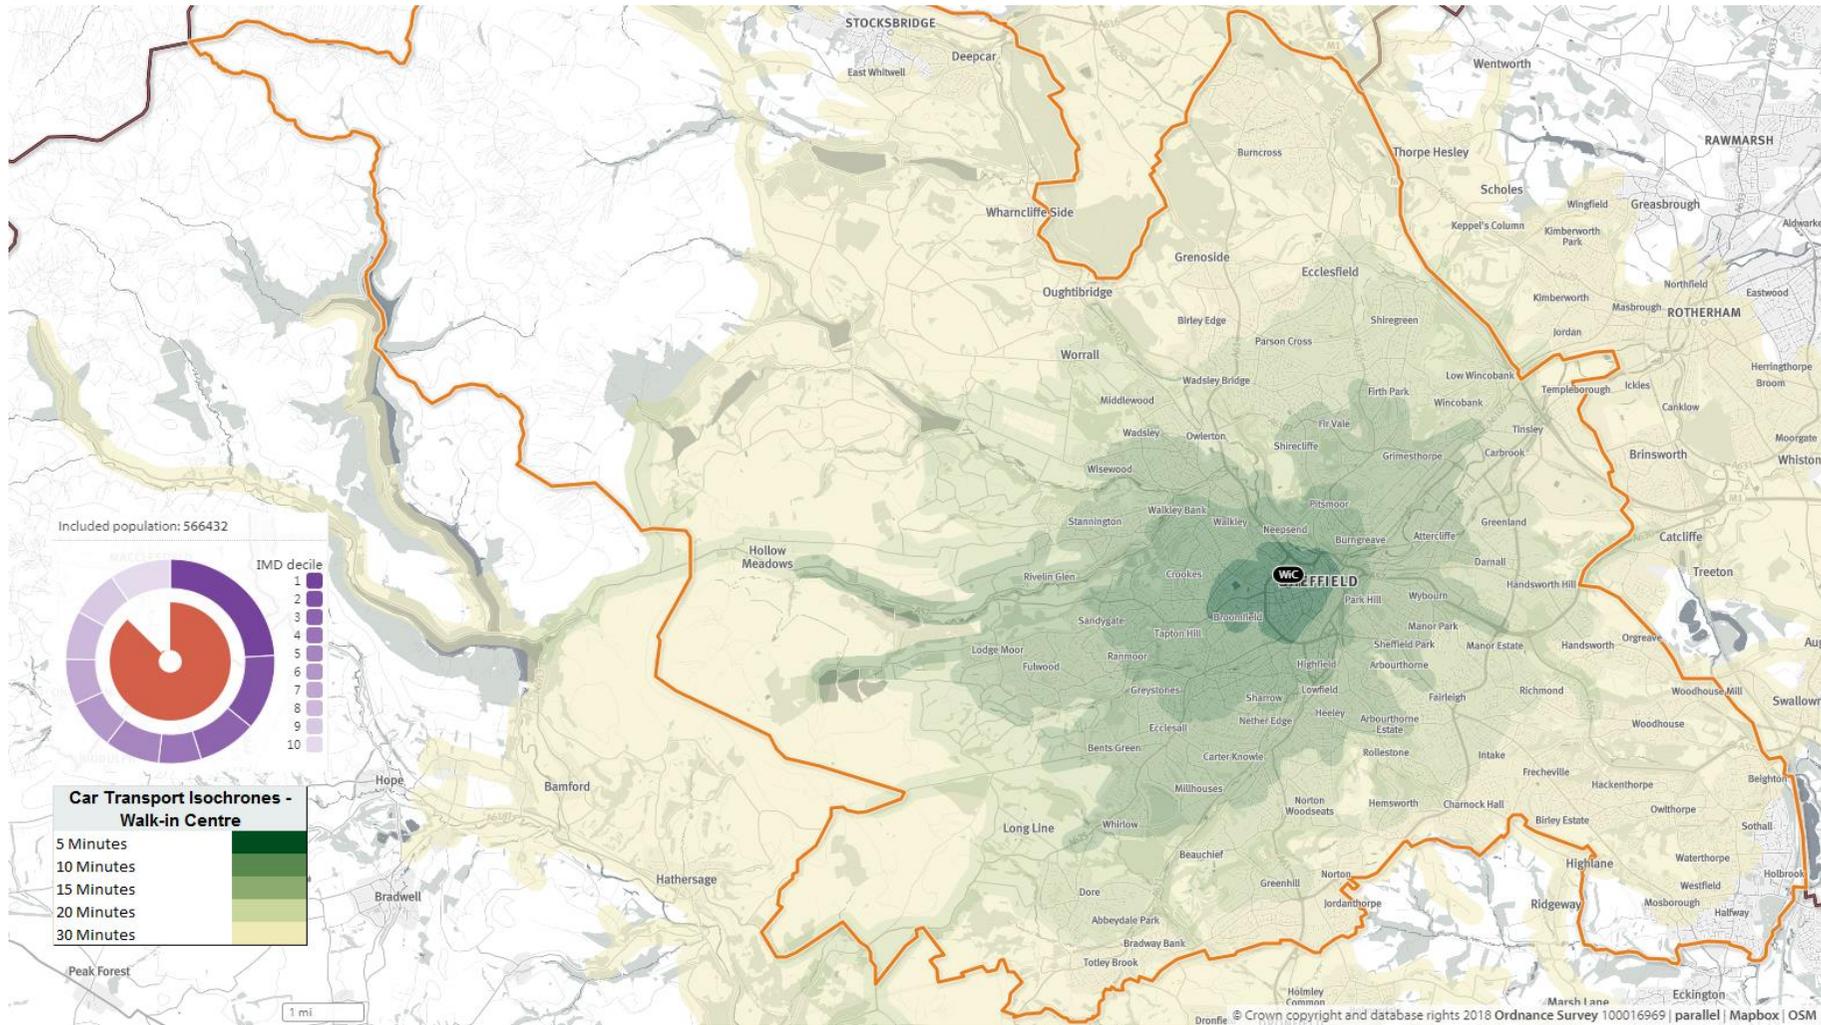

Figure 7-8 shows the areas of Sheffield that are within 5/10/15/20/30 minutes travel by car from the Walk-In Centre and details the total population (within the Sheffield LA Boundary) living in those areas (purple pie chart).

Figure 7-9

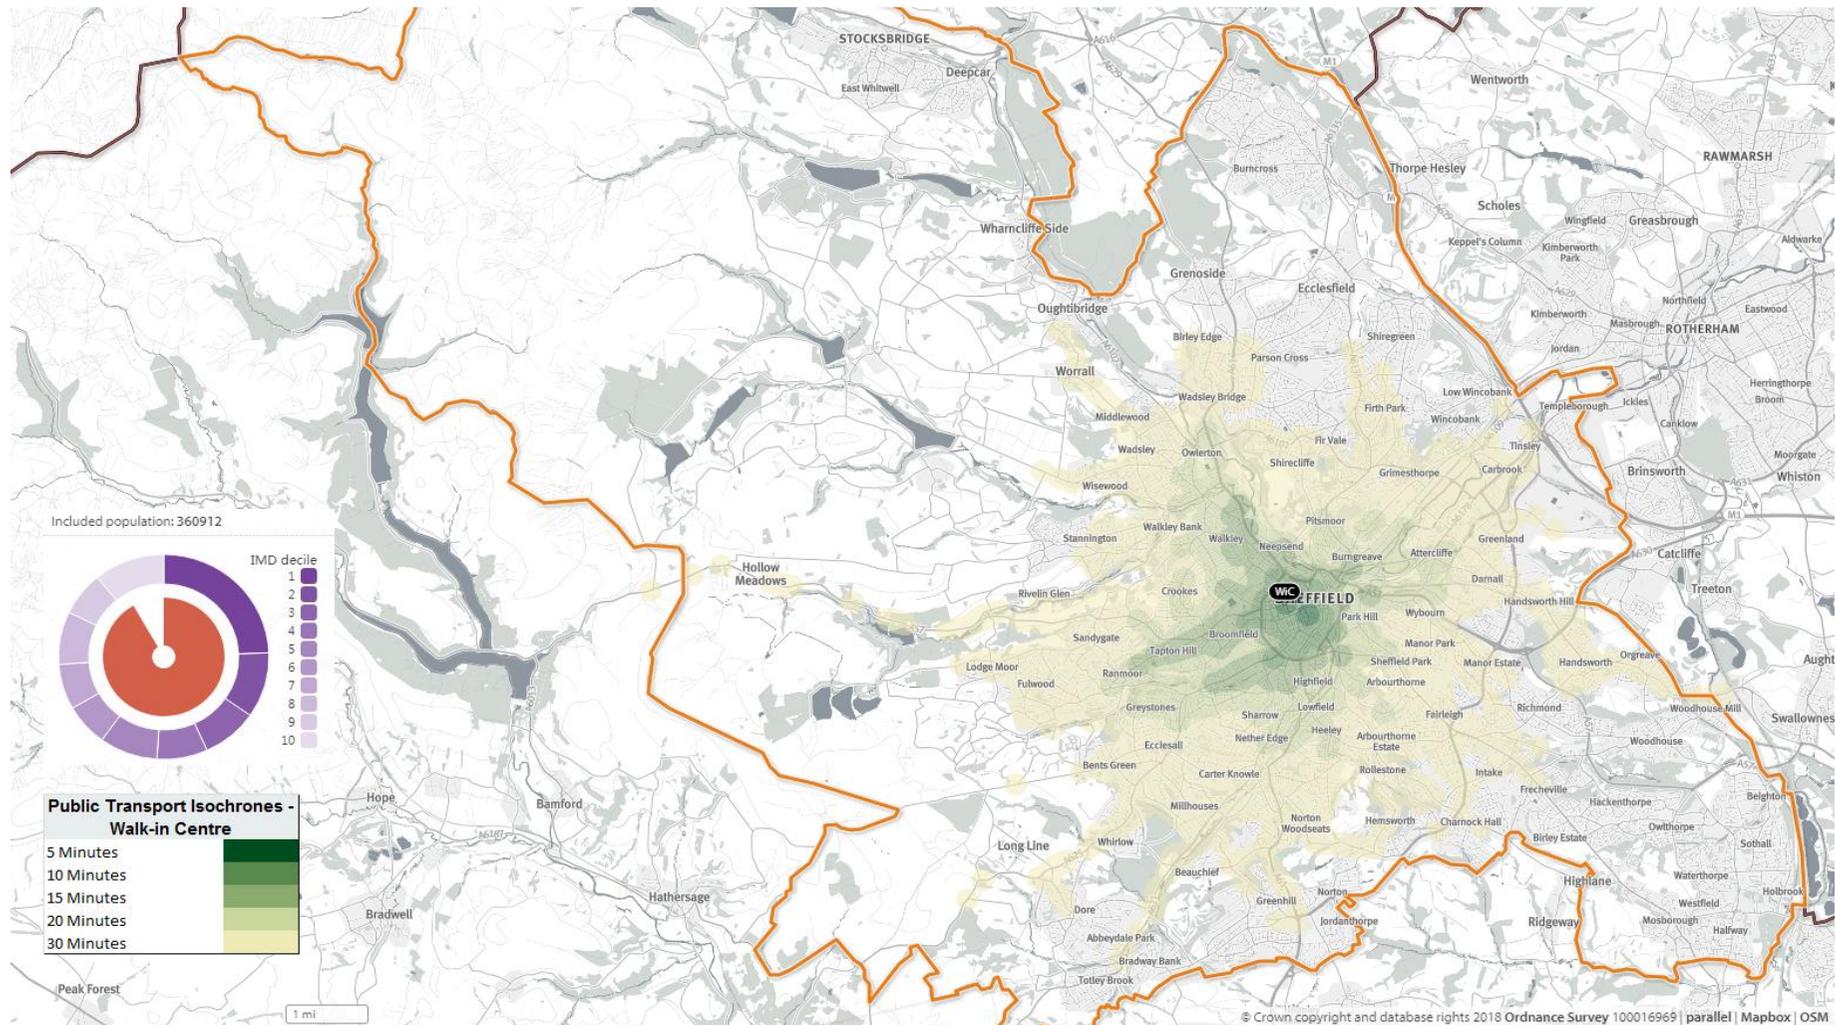

Figure 7-9 shows the areas of Sheffield that are within 5/10/15/20/30 minutes travel by public transport from the Walk-In Centre and details the total population (within the Sheffield LA Boundary) living in those areas (purple pie chart).

Figure 7-10

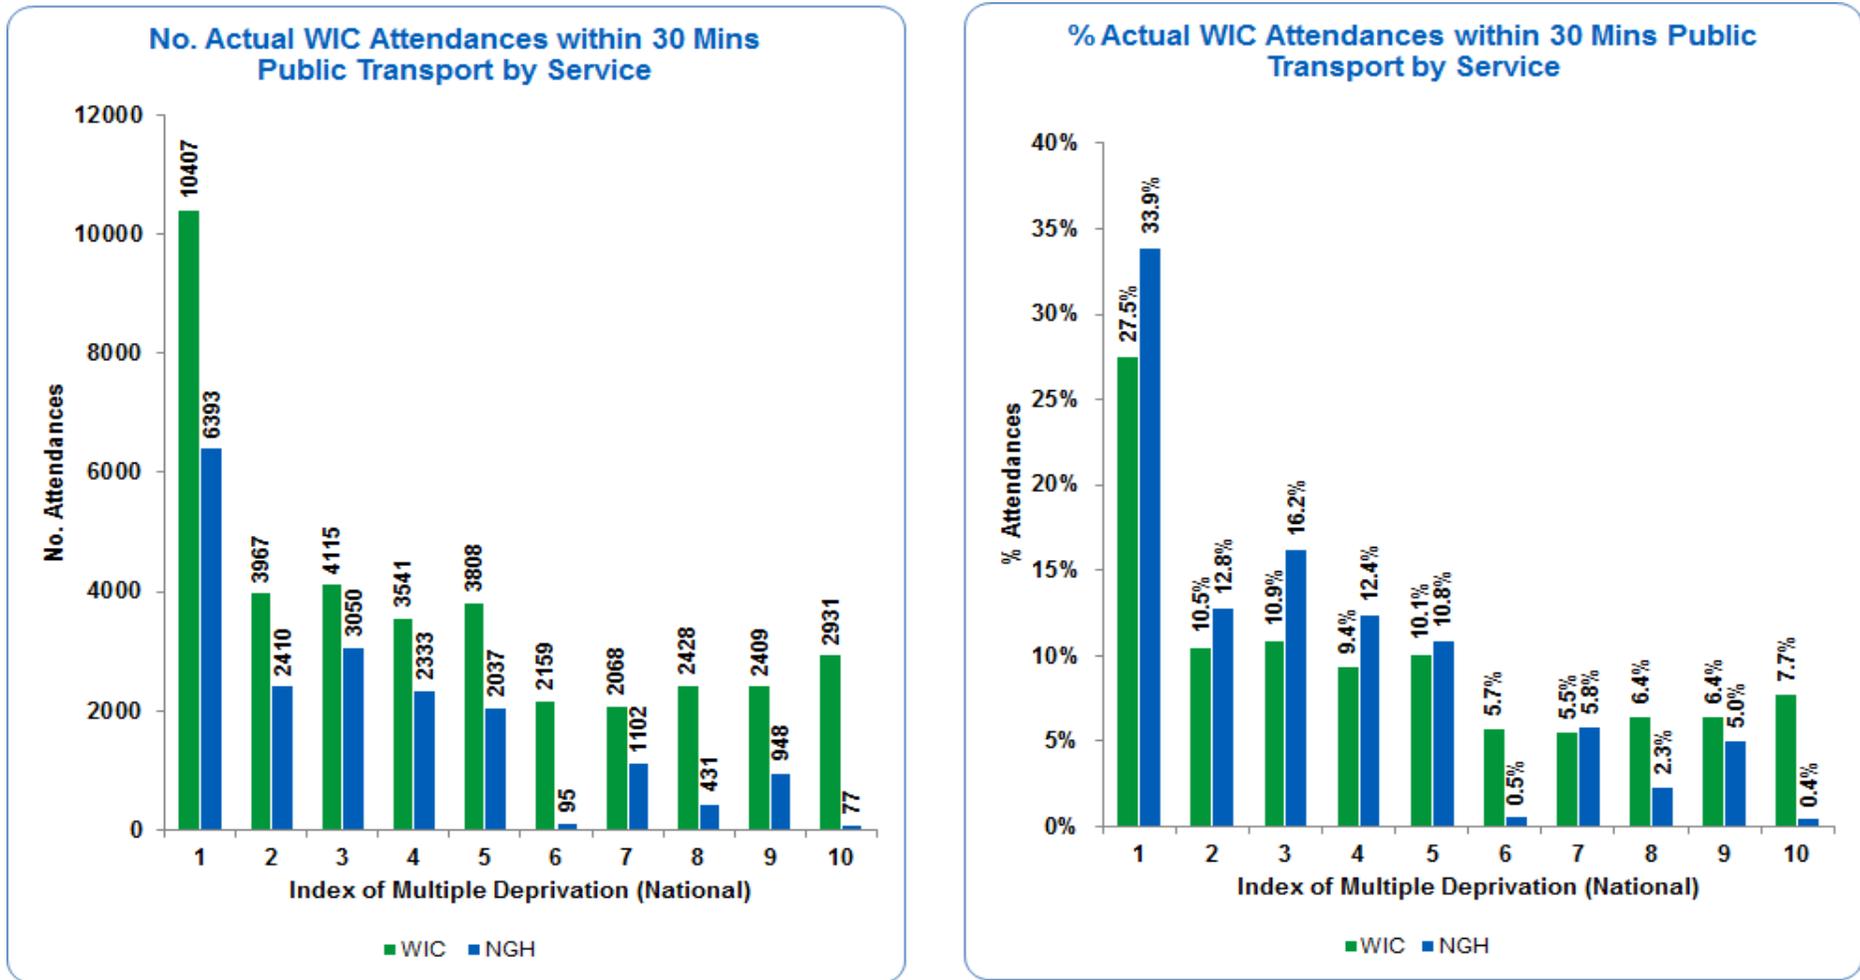

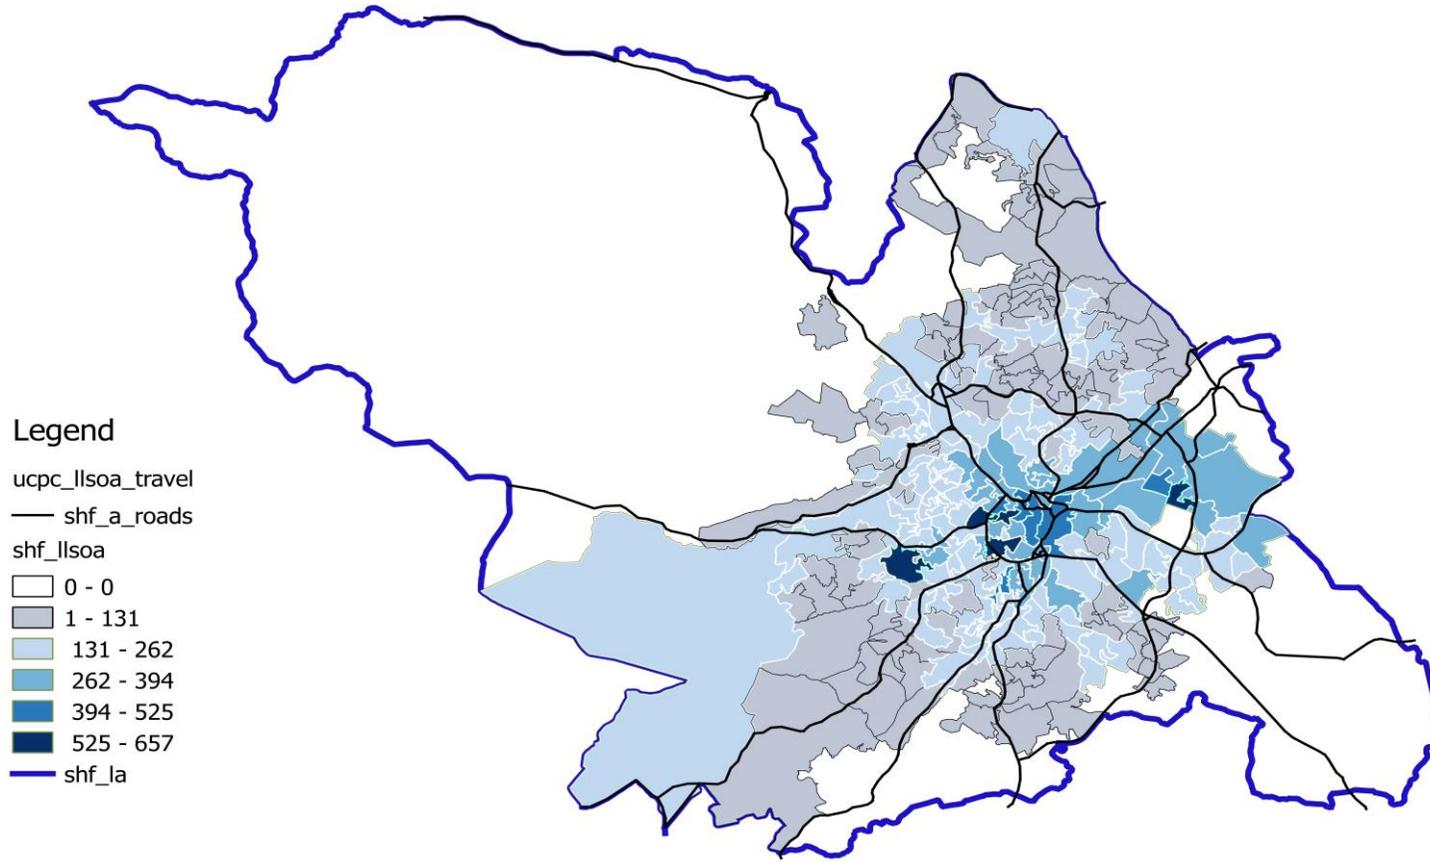

Figure 7-10 shows the dataset of actual WIC attendances filtered by those that fit within the 30 minute public transport footprints for both the WIC and NGH sites to allow for comparison. As per the overall trend there would be less public transport access to the NGH but those from more deprived areas would be less affected.

Figure 7-11

WIC activity : 30 min Travel times

Contains OS data © Crown copyright and database right 2017

Figure 7-11 shows a heat map of the origin of those WIC attendees who fit within the 30 minute public transport footprint with the largest concentration of attendees tending to come from central and eastern parts of the city.

Figure 7-12

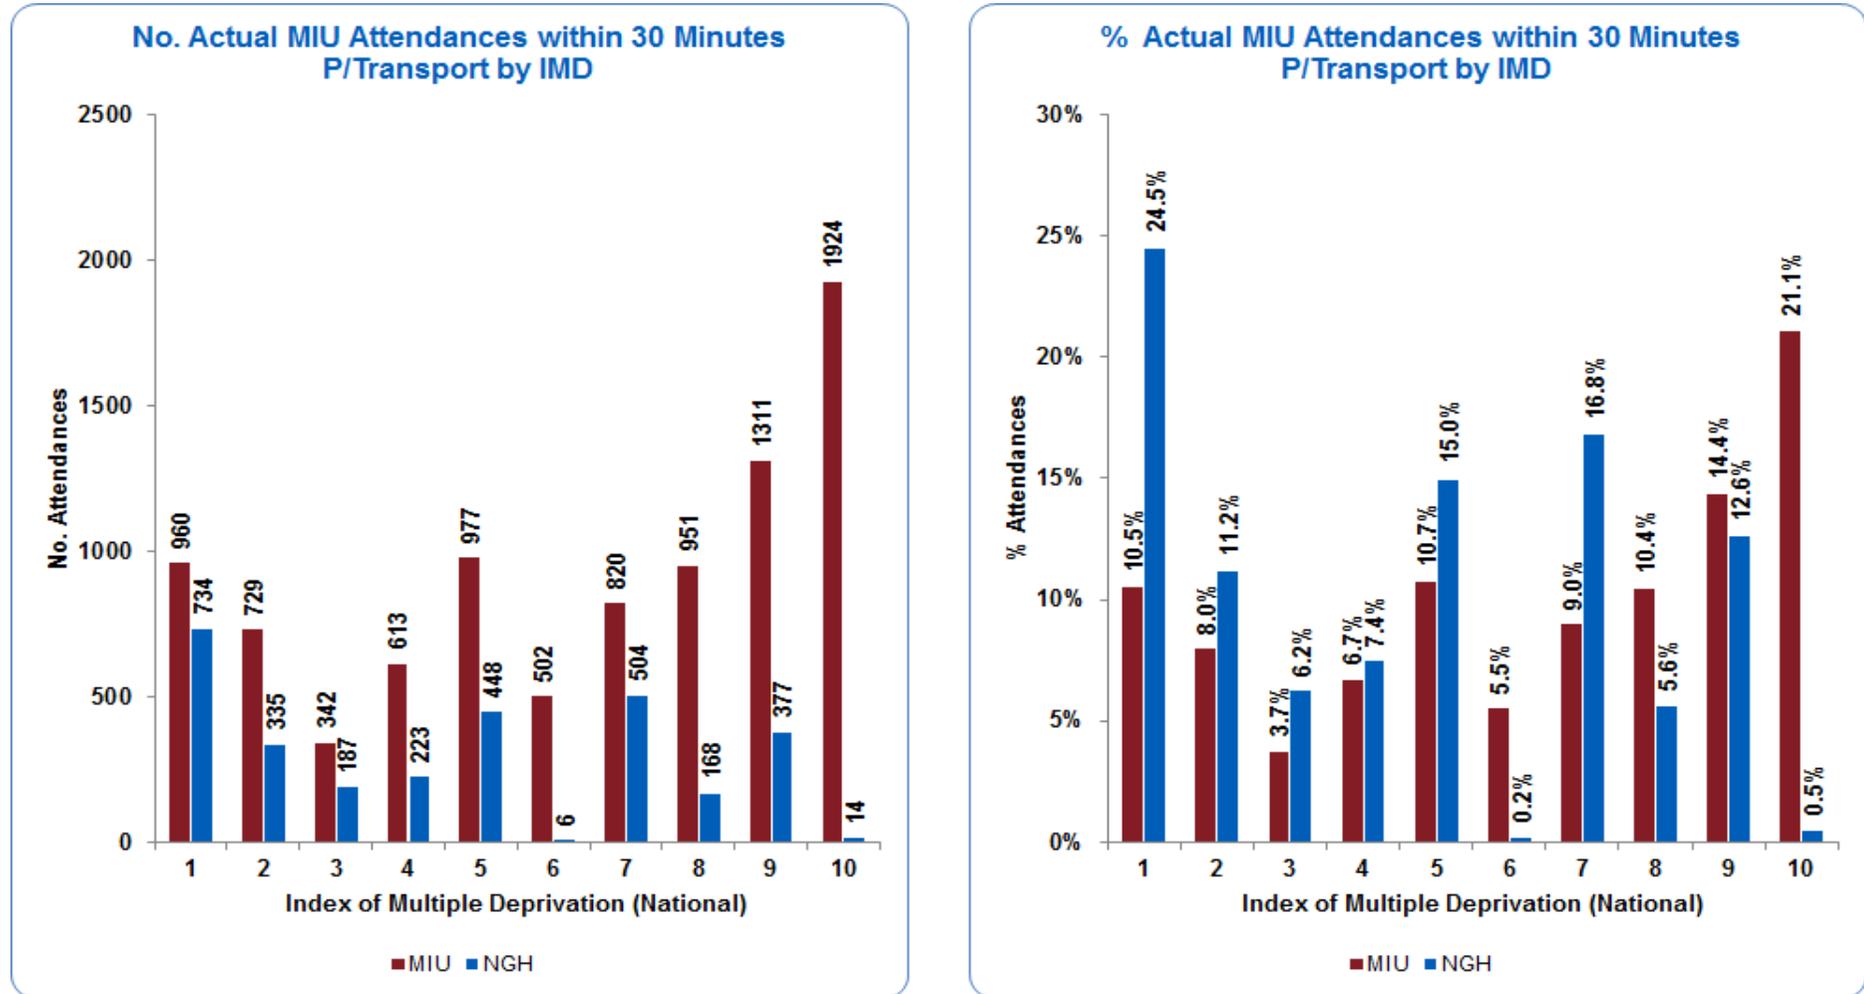

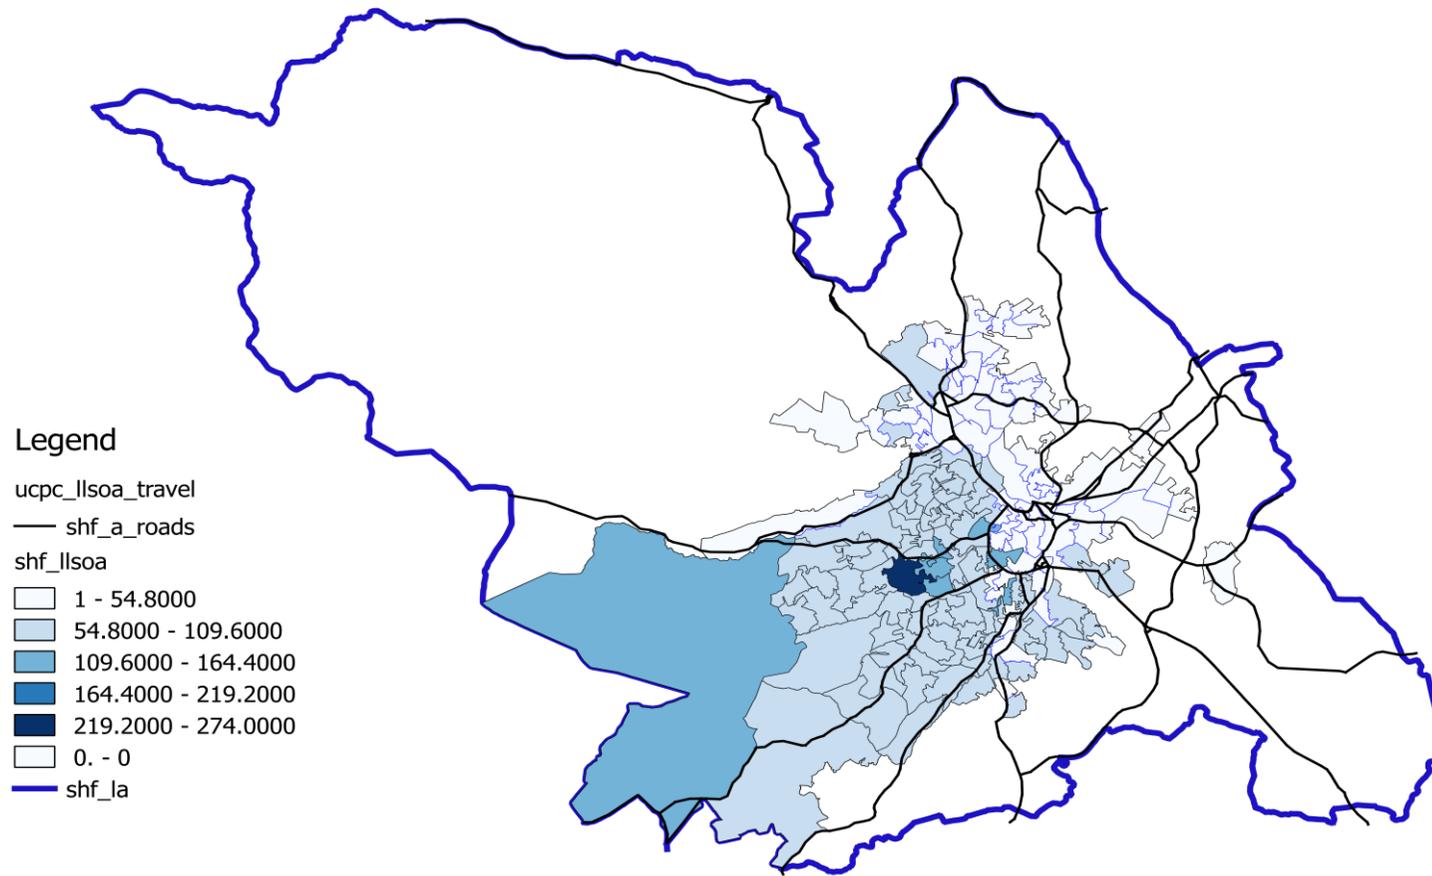

Figure 7-12 shows the dataset of actual MIU attendances filtered by those that fit within the 30 minute public transport footprints for both the MIU and NGH sites to allow for comparison. As per the overall trend there would be less public transport access to the NGH but those from more deprived areas would be less affected.

Figure 7-13

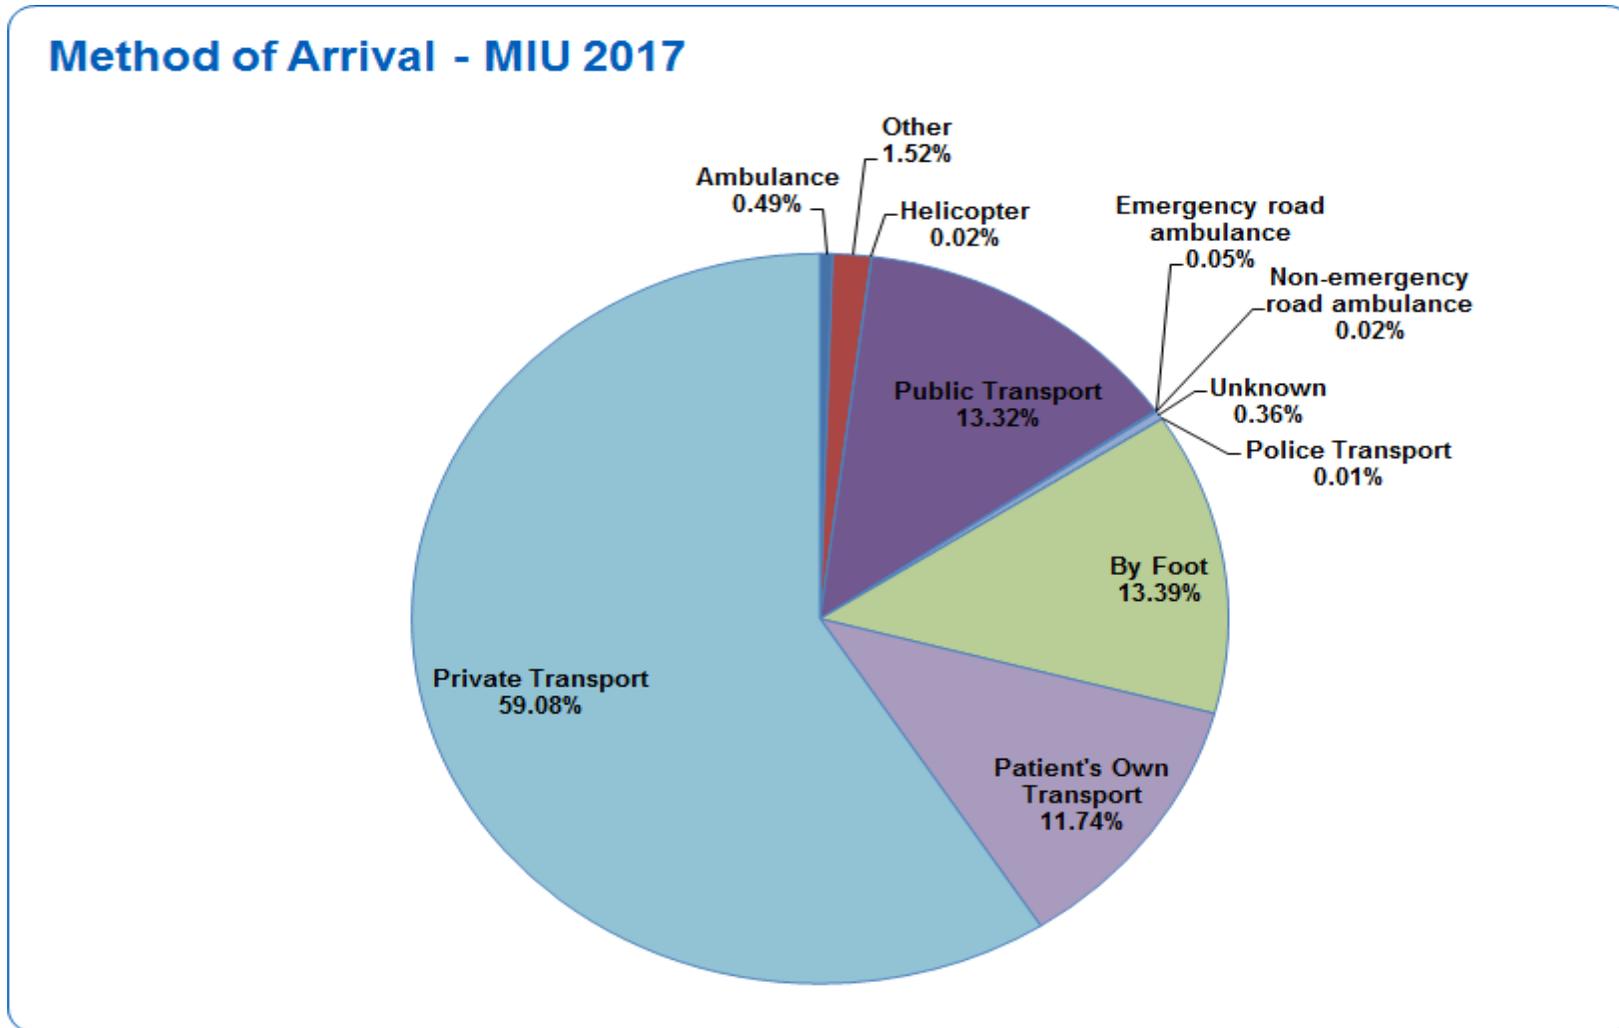

MIU activity : 30 min Travel times

Contains National Statistics data © Crown copyright and database right 2017
Contains OS data © Crown copyright and database right 2017

Figure 7-13 shows a heat map of the origin of those MIU attendees who fit within the 30 minute public transport footprint with the largest concentration of attendees tending to come from the southwest of the city. When compared to the heat map of access to a private vehicle these tend to be areas of high access.

Figure 7-14

Page 68

Figure 7-14 shows the breakdown of how people travelled to the MIU showing that over 70% travel via private transport which would be concordant with figure 7-13 showing that attendees tended to come from areas of high access to private vehicles.

Appendix 8 - WIC Attendances by Practice

The table below shows the number of WIC attendances per each practice within Sheffield ranked by total number of attendances. It also shows the list size for each practice and the attendance rate per 10,000 population.

Practice Name	WIC Attendances	List Size	Rate per 10,000 Pop
University Health Service Health Centre	3543	31961	1108.54
Porterbrook Medical Centre	2921	27747	1052.73
Clover Practice	2514	16471	1526.32
Baslow Rd	1783	12633	1411.38
Upperthorpe Medical Centre	1409	11471	1228.31

Appendix 9: Deprivation

Figure 9-1

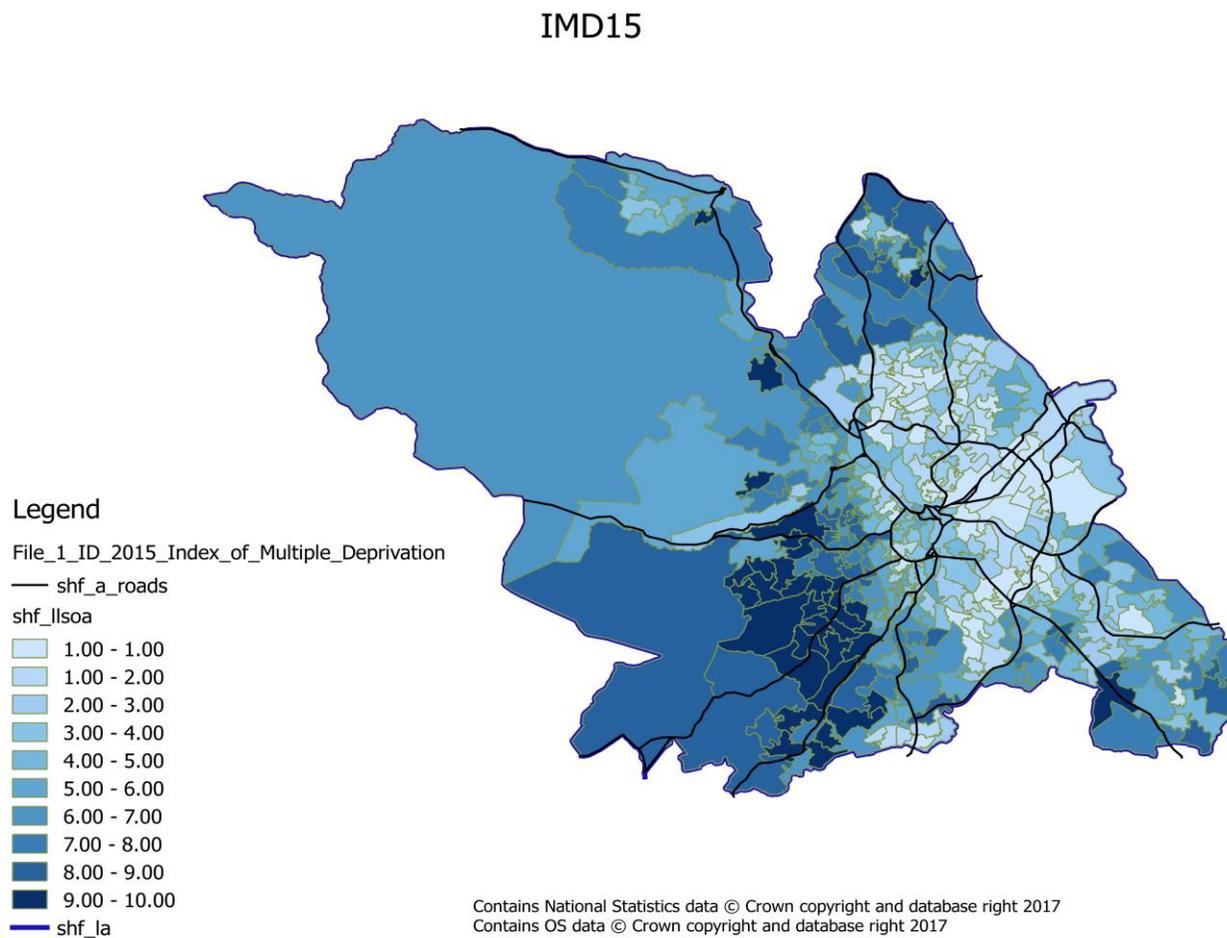

Figure 9-1 shows a heat map of deprivation within Sheffield using a local decile scale with lower numbers indicating areas of greater deprivation. The areas of most deprivation tend to be located in the north and east of the city while the southwestern parts tend to be the least deprived.

Figure 9-2

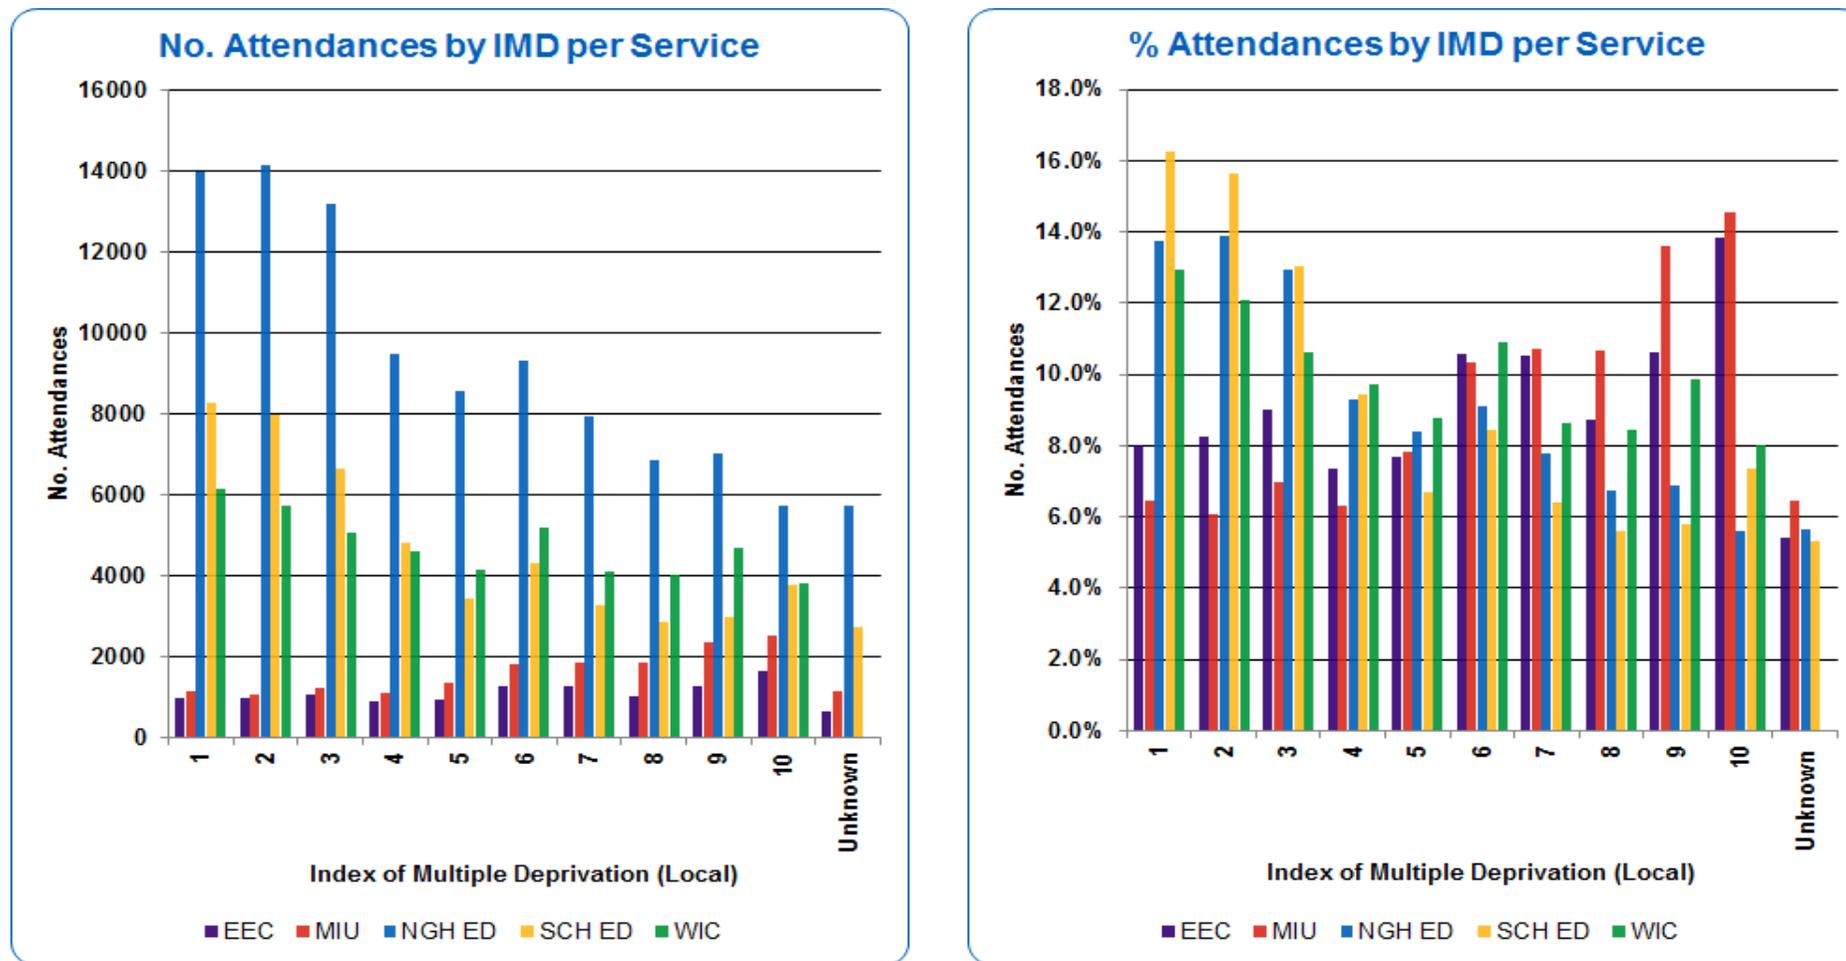

Figure 9-2 shows the attendances to each service broken by Index of Multiple Deprivation based on the attendees' LSOA. It shows that there is a disproportionate use of ED (both adults and children) by those from areas of higher deprivation with over 40% of all attendances for these services coming from areas in the top 3 deciles of deprivation. Conversely it shows that nearly 40% of all MIU attendees are from areas within the 3 deciles of least deprivation.

Appendix 10: Age

Figure 10-1

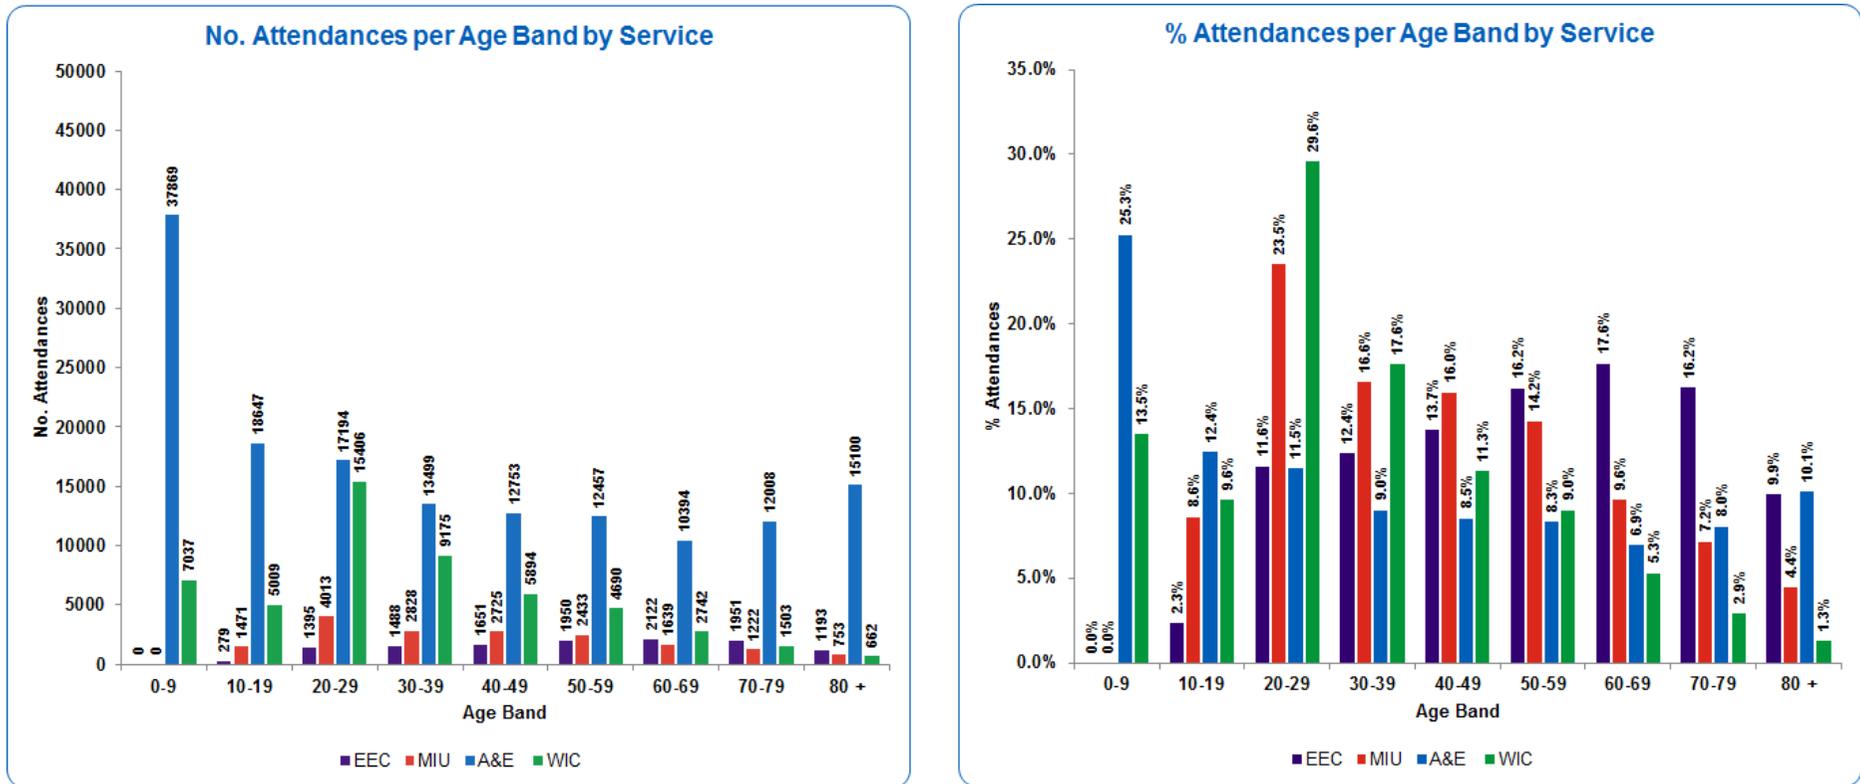

Figure 10-1 shows attendances to the services broken down via age band (A&E is both Adults/Children combined) both by total volume and by percentage. It shows that both the MIU and WIC are disproportionately utilised by the 20-29 age band, possibly due to the higher student population in Sheffield and the proximity of these services to areas with high student populations.

Figure 10-2

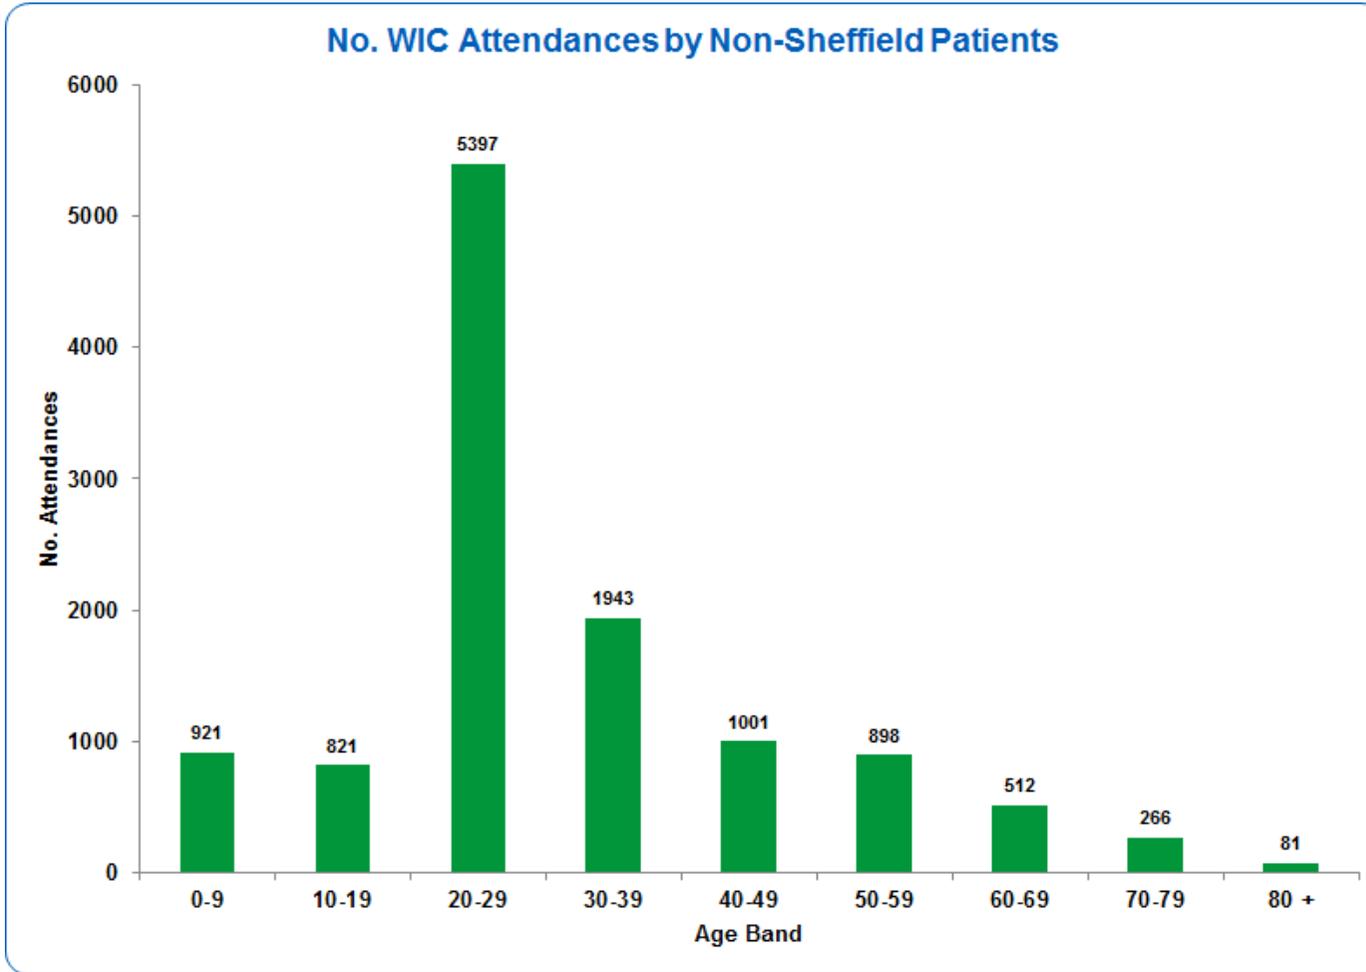

Figure 10-2 shows the number of WIC attendances per age band by patients who are not registered with a Sheffield GP. Similarly to figure 10-1 it shows disproportionate use by the 20-29 age band which could be indicative of high student usage.

Dear Tim

Re: Urgent Primary Care Proposals

I am writing to you as Chair of Sheffield City Council's Healthier Communities and Adult Social Care Scrutiny Committee, to give you our formal response to your proposals for changing Urgent Primary Care Services in Sheffield.

1 Consultation Process

From the start of the consultation process, we were disappointed that the three options presented were very similar, all involving the closure of the Broad Lane Walk in Centre and the Minor Injuries Unit. For many, this was frustrating, and gave the impression that the consultation was a paper exercise. We were also disappointed at the lack of early public engagement in drawing up the proposals for consultation, and echo HealthWatch's concern that the public and statutory stakeholders were involved at a late stage and with limited opportunities to share their views.

We feel that it's really important that big changes to health services are done with people, not 'to' people – the overwhelmingly negative tone of the responses to the consultation suggest that on this occasion, the engagement process hasn't been effective in bringing the public on board with the proposals. We understand that during the public consultation, alternative options were suggested. We are keen to understand how the CCG has considered these alternatives, and whether any of them, or elements of them are feasible.

Key Issues

Do any of the suggestions raised through the consultation process provide feasible alternatives to the proposals that were consulted on, and how are they being considered by the CCG?

2 Proposed siting of the Urgent Treatment Centre at the Northern General

Concerns about access and capacity at the Northern General Campus are well known. Parking is a long-standing problem, and air quality has been highlighted as an issue. It is expensive and difficult to access by public transport for those in the south of the City, including our significant student population – and for many in the city would require 2 bus rides and a journey time of over an hour. The site is difficult to navigate once you are there, and Councillors have heard concerns from people who feel unsafe in the areas surrounding the Northern General, particularly at night.

We fear that this will deter people from seeking medical treatment at the appropriate time, which could lead to worse outcomes for patients, and higher costs for the health and social care system.

We also have concerns that the impact of these proposals may cross over into other health service areas –for example, people in the south of the City may choose to use services outside of Sheffield rather than face a difficult journey to the Northern General.

Whilst we recognise that the aim of the proposal is to create more capacity within urgent primary care so people who currently use the Walk in Centre will not need to travel to the UTC (our concerns about this part of the proposal are set out in the next section), current users of the Minor Injuries Unit – 18,000 per year, will in all likelihood need to be treated at the UTC. We have not yet seen any information about expected patient flow or traffic modelling to demonstrate the likely impact of the proposals on the Northern General site and surrounding area, or what might be done to mitigate this.

We were alarmed to see in the consultation report that senior managers at the Northern General raised concerns about their ability to accommodate the service. Overall, this leaves us unconvinced that siting a UTC at the Northern General is a viable proposal.

We recognise that there are national expectations around establishing Urgent Treatment Centres, but we are not clear how much these guidelines are driving the proposals. We would be interested to understand what would happen if Sheffield chose not to set up an Urgent Treatment Centre, or if current arrangements could satisfy the UTC guidelines. We'd also be interesting in any learning from other areas who have gone through similar changes – what has been the impact in other areas where walk in centres and minor injuries units have been closed.

Key Issues

Is there evidence available to demonstrate that siting a UTC at the Northern General is viable in terms of capacity and appropriateness of the site?

What would the impact of siting the UTC at the NGH be – in terms of patient flow, increased number of journeys, traffic modelling etc

How can access to services be improved for people in the south of the city, and those who would find it difficult to get to the NGH?

Are there repercussions to not following the national guidelines on Urgent Treatment Centres? Can the guidelines be met by retaining current arrangements? What have other areas done?

3 Increasing capacity within Urgent Primary Care

We know from talking to our residents that access to GP services is a really important issue in the city. We support the ambition to provide more urgent care in GP practices, however without any detail available about additional investment or how practices will work together in neighbourhoods to provide these additional appointments, we don't have confidence that the proposals will work.

For us, the detail of how far residents might have to travel to get to a GP practice in their 'local area' is incredibly important. It can be easier to travel all the way into the city by public transport than across a neighbourhood. We know that neighbourhoods vary in size, population, number of practices and how well developed they are in terms of working together – which leaves us with concerns that residents in some neighbourhoods might find it harder to access the additional appointments made available –resulting in a greater number of trips to the Northern General, with all the difficulties that entails, or not getting treatment. That the impact of closing the Walk-in Centre and Minor Injuries Unit may affect people in the city disproportionately is of great concern to us – we want to be sure that any changes to health services reduce health inequalities, not make them worse.

We understand that of the 60,000 walk-in centre appointments per year, users tend to come disproportionately from certain postcodes and certain practices – but we have not seen any projected patient flow analysis, and it has not been made clear to us how many additional appointments need to be created through these proposals, and in which parts of the city they need to be.

We understand that students are frequent users of the walk-in centre – and we would like to know if any specific work is being done to encourage students to register with GP practices, and whether there is enough capacity within the primary care system to accommodate them if they do.

We are concerned that some groups of vulnerable people who currently use the Walk in Centre – for example, people with mental illness, people with English as a second language, homeless people, will find it difficult to access the additional appointments via a telephone triage system – and we would like to understand the potential impact of the proposals on these groups, and any mitigations that are being considered.

The minutes from the Health and Wellbeing Board's consideration of Urgent Care in July 2017 supported proportionate re-investment into the areas of greatest need, but we have not been given any information about how the financial side of the proposals will work. We've been informed that the provision of additional urgent appointments in primary care is dependent upon investment that would come from closing the Walk in Centre and Minor Injuries Unit, however we would like to understand this in more detail. How much money will closing the Walk in Centre and Minor Injuries Unit free up? How much will it cost to establish the UTC? How much will be invested in primary care in the city, and in which parts of the city?

We are concerned about the capacity of the Primary Care system to make these proposals work. We are aware that practices find it difficult to recruit enough GPs, and whilst the CCG seemed confident that increasing the use of prescribing pharmacists and nurse practitioners will deliver the required number of additional appointments, we have not seen any workforce analysis to demonstrate what the workforce requirements of the proposals are, and whether that workforce is available in Sheffield.

We were also concerned to note that the consultation responses from primary care providers were not positive, leading us to question whether there is the willingness within the primary care system to make these proposals work.

Key Issues

How will the Neighbourhoods work together to provide additional appointments, is there evidence to demonstrate that this approach will work?

How many additional appointments are needed and in which parts of the city? Which groups and communities will be most affected by the proposals and what are the mitigations?

What are the workforce requirements and is the workforce available in Sheffield?

Is there evidence available to demonstrate that the primary care system is willing and able to make these proposals work?

How will the finances work? How much will it cost to create an Urgent Treatment Centre? How much will be invested in Primary Care, and in which areas/practices in the city?

Through our work as a Scrutiny Committee, we want to support and improve the NHS in Sheffield, and our aim has been to engage constructively with the CCG on these proposals. Overall however, we don't feel that we have seen sufficient evidence to assure us that the proposals are in the best interests of Sheffield people. We look forward to receiving your response to the issues we have raised, and trust that you will seriously consider our concerns as part of your decision making process.

Yours sincerely

Report to Healthier Communities and Adult Social Care Scrutiny and Policy Development Committee Wednesday 26th September 2018

Report of: Policy and Improvement Officer

Subject: Draft Work Programme 2018/19

Author of Report: Emily Standbrook-Shaw, Policy and Improvement Officer
Emily.Standbrook-Shaw@sheffield.gov.uk
 0114 273 5065

The attached report aims to assist the Healthier Communities and Adult Social Care Scrutiny Committee to develop its work programme for 2018/19.

It covers the role and purpose of scrutiny, an overview of how the 'long list' draft work programme has been drawn up to date, and a draft work programme for the Committee's consideration and discussion.

Type of item: The report author should tick the appropriate box

Reviewing of existing policy	
Informing the development of new policy	
Statutory consultation	
Performance / budget monitoring report	
Cabinet request for scrutiny	
Full Council request for scrutiny	
Call-in of Cabinet decision	
Briefing paper for the Scrutiny Committee	
Other	X

The Scrutiny Committee is being asked to:

- Consider and comment on the draft work programme for 2018/19

Category of Report: OPEN

1 What is the role of Scrutiny?

1.1 Scrutiny Committees exist to hold decision makers to account, investigate issues of local concern, and make recommendations for improvement. The Centre for Public Scrutiny has identified that effective scrutiny:

- Provides 'Critical Friend' challenge to executive policy makers and decision makers
- Enables the voice and concern of the public and its communities
- Is carried out by independent minded governors who lead and own the scrutiny process
- Drives improvement in public services and finds efficiencies and new ways of delivering services

1.2 Scrutiny Committees can operate in a number of ways – through formal meetings with several agenda items, single item 'select committee' style meetings, task and finish groups, and informal visits and meetings to gather evidence to inform scrutiny work. Committees can hear from Council Officers, Cabinet Members, partner organisations, expert witnesses, members of the public – and has a link to patient and public voice through observer members from HealthWatch sitting on the Committee. Scrutiny Committees are not decision making bodies, but can make recommendations to decision makers.

1.3 This Committee has additional powers and responsibilities in relation to scrutinising NHS services. The Committee can scrutinise the planning, provision and operation of any NHS services, and where a 'substantial variation' to NHS services is planned, the NHS is required to discuss this with the Scrutiny Committee. If the Committee considers that the proposed change is not in the best interests of the local area, or that consultation on the proposal has been inadequate, it can refer the proposal to the Secretary of State for Health for reconsideration. Department for Health Guidance for health scrutiny can be found [here](#) – and has already been circulated to Members of the Committee.

2 Developing the Scrutiny Work Programme

2.1 Attached to this report is a draft work programme for 2018/19. The Chair has had discussions with a range of organisations, Council Officers and Cabinet Members to come up with a 'long list' of topics. There are also some issues carried over from last year's work programme.

2.2 It is important the work programme reflects the principles of effective scrutiny, outlined above at 1.1, and so the Committee has a vital role in ensuring that the work programme is looking at issues that concern local people, and looking at issues where scrutiny can influence decision makers. The work programme remains a live document, and there will be an opportunity for the Committee to discuss it at every Committee meeting, this might include:

- Prioritising issues for inclusion on a meeting agenda
- Identifying new issues for scrutiny
- Determining the appropriate approach for an issue – eg select committee style single item agenda vs task and finish group
- Identifying appropriate witnesses and sources of evidence to inform scrutiny discussions
- Identifying key lines of enquiry and specific issues that should be addressed through scrutiny of any given issue.

Members of the Committee can also raise any issues for the work programme via the Chair or Policy and Improvement Officer at any time.

3 The Draft Scrutiny Work Programme 2018/19

3.1 Attached is the draft work programme for 2018/19. Members are asked to consider it and reflect on questions such as:-

- Are there any gaps?
- Are there any issues on the list that don't feel appropriate for scrutiny?
- What are the priority issues?
- What approach should the Committee take for each item, what are the key lines of enquiry, and who is it important to hear from?

4 Recommendations

The Committee is asked to:

- Consider and comment on the draft work programme for 2018/19

Healthier Communities & Adult Social Care Scrutiny and Policy Development Committee

Draft Work Programme 2018-19

Topic	Reasons for selecting topic	Lead Officer/s	Approach
Wednesday 26th September 4-7pm			
Continuing Health Care	To consider how the CHC process is working in Sheffield to ensure that people are receiving the appropriate support.	Mandy Philbin Chief Nurse, NHS Sheffield CCG	Agenda Item
CCG Local System Review Action Plan	To consider the findings of the CQC Local System Review, which was undertaken earlier this year, and to understand how the Sheffield Health and Care system is addressing the issues raised.	Phil Holmes SCC David Throssell, STH Becky Joyce, ACP Programme Director.	Agenda Item
Urgent Care Update	To formally note the Scrutiny Committee's response to the CCG's proposals to change Urgent Primary Care services, and to note recent developments in the process.	Emily Standbrook-Shaw Policy & Improvement Officer	Agenda Item
Wednesday 10th October 4pm			
Urgent Care	To consider the CCG's response to the Scrutiny Committee's comments on the Urgent Care proposals, and to understand the process going forwards.	Brian Hughes, Director of Commissioning and Performance, NHS Sheffield CCG	Agenda item

Wednesday 14th November 4-7pm

Prevention	To consider the Council's approach to prevention, understand the range of prevention activity currently going on in the city, and hear from a range of people and organisations about their experiences of prevention, As part of this, there will be opportunities for members to visit projects across the city.	Nicola Shearstone Greg Fell	Single Item Agenda - 'Select Committee' Style
------------	---	--------------------------------	---

Wednesday 23rd January 4-7pm

Wednesday 27th February 4-7pm

Wednesday 20th March 4-7pm

Possible future items - scope to be determined			
Adult Social Care			
Quality in Adult Social Care	To consider the approach and progress that SCC is taking to improve quality in adult social care services - to include information about Home Care services (inc service user view from HealthWatch), and how SCC and the organisations it deals with deal with complaints.	Phil Holmes, SCC	
Adult Social Care Improvement and Recovery Plan	Progress report - is the plan working?	Phil Holmes, SCC	
Adult Safeguarding	To continue to develop a relationship with the Customer Forum, and receive the 2018/19 Annual Report	Simon Richards, Gillian Hallas SCC	
Performance - Adult Social Care	To consider the adult social care performance indicators and seek assurance that performance is improving, and where it isn't, adequate plans are in place to address this.	Phil Holmes, SCC	
NHS Services			
Joint Strategic Hospital Services Review	To consider the outcome of the review and the potential impact on Sheffield	NHS Sheffield CCG	

Moving Services into Primary Care	Suggested as possible area of interest by CCG, as this work will be increasing in pace.	Nicki Doherty, NHS Sheffied CCG	
Quality in Primary Care	Detailed consideration of how NHS CCG is driving up quality in Primary Care. Inequality in access and services across the city has been raised by Councillors.	Mandy Philbin, Chief Nurse NHS CCG, Dr Anthony Gore, Clinical Lead, NHS CCG	
Health and Wellbeing			
Mental Health - Joint Session	Dedicated session for HCASC and CYPFS Scrutiny Committees to consider mental health in the round - scope and fomate to be determined.		
Oral and Dental Health	Keep updated re recommendations made during 2017/18 - particularly the potential consideration of fluoridation	Greg Fell, Director of Public Health	
Health in All Policies	To consider how well the Public Health Strategy is being embedded across all areas of Council activity	Greg Fell, Director of Public Health	Agenda Item

Health and Employment	To consider activity and programmes aimed at supporting people with health conditions into work. What's working well, what can we do more of?		
Dementia Strategy	To consider latest approach to refreshing the strategy	Nicola Shearstone SCC	
Social Prescribing	What is Sheffield's approach? Is it working?		
Joint Working, systems and structures			
Accountable Care Partnership Board	To understand how the Accountable Care Partnership works, what its aims are, how it plans to achieve them and the role of the Accountable Care Partnership in the wider health and social care landscape, particularly in relation to the Health and Wellbeing Board.	Chris Peace, Tim Moorhead – co-Chairs of ACP Board Becky Joyce, ACP Director	
Delayed Transfers of Care	Update following consideration in 2017/18		
Transforming Care Programme	To seek assurance that the Council and NHS are working together to deliver the Transforming Care Programme.	Phil Holmes SCC	
Mental Health Transformation Programme	Update following consideration in 2017/18 - with a focus on savings and investment	Jim Millns, Dawn Walton	

Adult Short Breaks	To consider work being undertaken by CCG and City Council on Short Breaks.	Debbie Morton, NHS Sheffield CCG Phil Holmes, SCC	
Joint Overview and Scrutiny Committees			
South Yorkshire, Derbyshire, Nottinghamshire and Wakefield Joint Health Scrutiny Committee	This Committee meets in relation to Health Service Change across the geographical footprint. Focussing on NHS service reconfigurations - Hyper Acute Stroke Services; Children's Surgery and Anaesthesia; Joint Hospital Services Review	(Next meeting scheduled for 22 nd October 2018)
