Start With People South Yorkshire

Our approach to working with people and communities | May '22 - May '23

Page 2

Priorities for 2023/24 - See more detailed plan in appendix and on our website for more information

- **Put the voices of people and communities at the centre of decision-making.**

This includes: Working with system partners on a coordinated and where possible standardised approach to citizen **involvement**. Developing a 'start with people' minded workforce. Ensuring governance, assurance processes and systems all support this aim. Improving communication and feedback to our communities to build understanding and trust.

- **Embed mechanisms to enable citizen **involvement** to play a key role in the system focus on tackling health inequalities.**

This includes: Working with the VCSE, Healthwatch and partners on an approach for ongoing insight capturing, particularly from our underserved communities, to ensure we understand our communities' needs and empowering our people and communities. Ensuring systems and processes are in place for a continuous **involvement** cycle where citizens can talk to us at any point, in any way, and we will listen and gather their insights and use them to inform our work.

Developing opportunities for coproduction and working hand in hand with our communities to tackle system priorities.

- **Work with people and communities on the priorities identified within the Joint Forward Plan.**

This includes: Ensuring our future plans involve our citizens, using appropriate **involvement** levels and approaches, including coproduction and working in partnership with our communities.

As an example, programmes we are anticipating supporting in system or place include potential pathway redesign work for autism, dementia, end of life care, frailty, and cancer; and potential consultations around GP practice changes and improvements to primary care.

Healthwatch

Citizen response

“The above statements are all applicable to good PPI. However, you should probably prioritise them. There are a lot and if you try to achieve them all, you will probably end up not fully achieving any.”

“It is extremely difficult to get people from various ethnic groups to speak up and get involved . We need to encourage their involvement.”

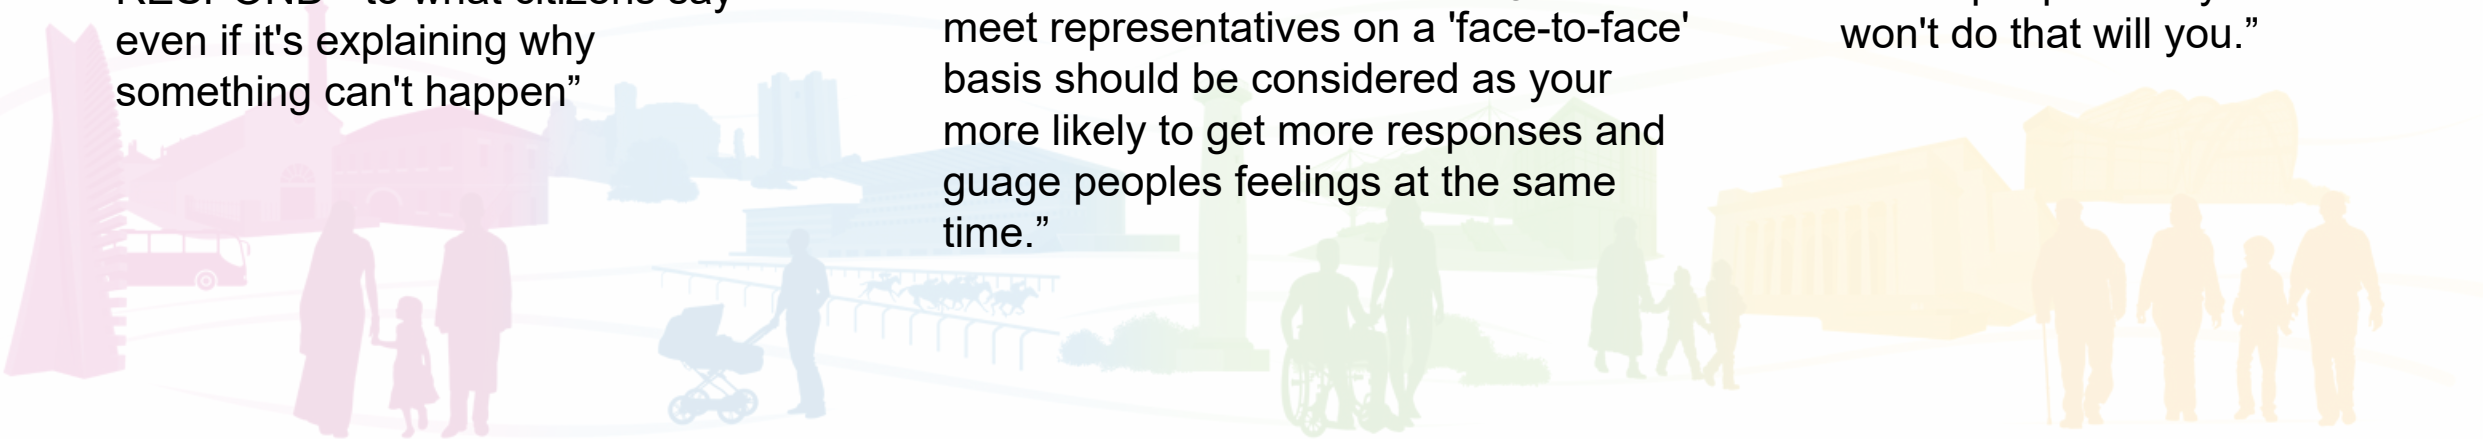

“Patient and Public involvement are essential to making the NHS continue the good work that it does.”

Page 6

“LISTEN - to what citizens say
EVALUATE - ideas/suggestions from citizens
RESPOND - to what citizens say - even if it's explaining why something can't happen”

“I believe the changes highlighted above are very positive if actioned and hopefully will have the desired effect - I also believe an aspect of being able to meet representatives on a 'face-to-face' basis should be considered as your more likely to get more responses and gauge peoples feelings at the same time.”

“I'll say it again. Get out of your offices and talk to real people. But you won't do that will you.”

Why get involved?

It has been four years since the publication of the Strategic Five-Year Plan for South Yorkshire. Since then, a lot has changed and we have made good progress in taking forward our ambitions, whilst also managing the impact.

It is within this challenging environment that we officially became an Integrated Care System, establishing our Integrated Care Board for South Yorkshire, followed by our Integrated Care Partnership, Chaired by our South Yorkshire Mayor.
