

Full Assessment

Category	Impact	Description of Project Impact	Mitigation Measures	Mitigated Score	Procurement Action Required?	Proposed KPI/Measure
Buildings and Infrastructure	Construction	Minimal or no impact as the project does not involve any new construction.	N/A	8	No	N/A
	Use	Increased demand on office space for the Executor Services team as in-house services are expanded.	Use existing office space efficiently; remote working solutions to reduce additional space needs.	7	No	Workspace occupancy efficiency
	Land use in development	No impact	N/A	8	No	N/A
Transport	Demand Reduction	Not relevant to this project.	N/A	8	No	N/A
	Decarbonisation of Transport	Not relevant to this project.	N/A	8	No	N/A
	Public Transport	Not relevant to this project.	N/A	8	No	N/A
	Increasing Active Travel	Not relevant to this project.	N/A	8	No	N/A
Energy	Decarbonisation of Fuel	Not relevant	N/A	8	No	N/A
	Demand Reduction/Efficiency Improvements	Minor improvements through administrative efficiencies and potentially lower energy use.	Encourage energy-efficient practices, such as digitizing records and minimizing paper use.	7	No	Energy savings from reduced physical resource usage.
	Increasing infrastructure for renewables generation	Not relevant to this project.	N/A	8	No	N/A
Economy	Development of low carbon businesses	No direct relevance to low-carbon business development.	N/A	8	No	N/A
	Increase in low carbon skills/training	Not relevant	N/A	8	No	N/A
	Improved business sustainability	Bringing services in-house improves financial sustainability by reducing reliance on external, often more expensive, providers.	Ensure sufficient staffing and resources for Executor Services to handle the increased workload efficiently.	7	No	% of appointments handled in-house, cost savings achieved.

10	The project will significantly increase the amount of CO2e released compared to before.
9	The project will increase the amount of CO2e released compared to before.
8	The project will maintain similar levels of CO2e emissions compared to before.
7	The project will achieve a moderate decrease in CO2e emissions compared to before.
6	
5	
4	The project can be considered to achieve net zero CO2e emissions.
3	
2	The project will achieve a significant decrease in CO2e emissions compared to before.
1	The project can be considered to achieve net zero CO2e emissions.
0	
Carbon Negative	The project is actively removing CO2e from the atmosphere.
