

### 1) What do you love about where you live?

- Rivelin Valley!
- Hillsborough Park – simple walks in a green, lovely space
- Fine collection of charity shops. But is this a good thing?
- Green spaces, parks, close to countryside yet excellent transport links
- It is very green and not too far to go for a walk and other family activities
- Range of facilities
- Amenities – library, park, shops etc.

### 2) What can be improved in your area?

- Fast cars! Worried about kids, cats, foxes and hedgehogs!
- Interested in the wasteland near Cuthbert Bank that is always deep in litter – but would be an excellent inner city nature reserve/park/city farm
- Park lake is a mess. Fisherman overnight using illegal rods – fishing line affecting wildlife
- What was so wrong about turning right outside Morrisons? Current situation is 3 traffic lights, kilometre longer. TRAFFIC/AIR QUALITY.
- Use of non-car transport – preventing air pollution. Need to discourage car use e.g. cycle lanes
- Help in Hillsborough used to provide basic services. Need systems for volunteering, advertising community groups & growing what's there.
- Open Rivelin Splash regularly. Currently on sunny days children are taking a running jump off the footpath.
- Research should be done – lessons to be learnt regarding good multiagency work during COVID
- Traffic calming measures urgently needed
- RH slip downhill on Penistone Rd after Sainsbury's makes Penistone Rd one lane in the peak because RH light change is too long. TRAFFIC/AIR QUALITY.

- Traffic turning right off Holme Lane through to North West Sheffield avoiding tram gates creates massive issues – congestion, air quality, unsafe streets
- Developing infrastructure and supporting existing groups
- Ward forums – still need these, LACs shouldn't replace them

### 3) What are your three most important priorities?

- Hillsborough corner could be so amazing yet it is disgusting with litter. Loxley River has several feet of litter – we are lucky and should celebrate the river.
- AIR QUALITY – because of the traffic
- Would like a community hall – first place I have lived without one – is one in Morrisons community room but can't use for charging for activities
- TRAFFIC! Hillsborough corner/Penistone Road is unusable for hours in the peak
- Hillsborough Park is coated in goose poop. At least clean it!
- Social housing. Mainly extra care for older people.
- Better maintenance and upkeep of public walking routes and paths (club mill road)
- Monitor planning applications – make sure green space and biodiversity isn't lost
- Park wildlife signs – to identify birds, trees etc and story of the park – history signs
- Building closer bonds between neighbours on the street.
- Greater appreciation of our industrial heritage. Don't flood it!
- Sustainability in all decisions
- Affordable housing as Kelham expands
- Access for local SME's (small, medium enterprises) to all procurement

# Walkley

## 1) What do you love about where you live?

- Close to the city centre
- Hills
- Diverse architecture
- Community groups
- Green spaces
- Trees
- Bolehills

## 2) What can be improved in your area?

- Reinstate local bus
- Increase car-free zone around schools
- Pedestrianisation
- Don't sell off or lease any green spaces
- Cycle-ways to make it safe for children to cycle to school
- Stop people parking on pavements
- More frequent street bin collections

## 3) What are your three most important priorities?

- Housing development only happens on brown field sites
- Support with green waste disposal for community garden support groups – like good gym
- Protection of all green spaces in perpetuity

# City

City

Page 5

## 1) What do you love about where you live?

- Lots of activities/events within reach
- Walking the streets
- It's convenient to live in. It's lively.
- Access to local facilities/activities
- Lots of stuff to do
- CONVENIENCE!!
- City centre gardens – some really lovely planting

## 2) What can be improved in your area

- More options for homelessness
- Reduce traffic noise
- Public art
- Removal of graffiti
- Publish info about where CIL/s106 money is coming in and where it gets spent
- Keep maintaining Gell Street park – it's a vital community facility
- Lack of accessible green space (i.e. Parkwood Springs is nice but hard to access)
- Open up the rivers
- Cleaner city
- Improve E.V. network & encourage electric vehicles
- Low traffic neighbourhoods around all residential areas
- More CCTV cameras monitoring ASB
- Change the crazy Glossop Road bus-gate to allow local access
- Public toilets
- More for kids to do
- Need to talk to groups we don't already (i.e. rough sleepers in city centre)
- Allow residents and visitors access through the Glossop Road tram gates
- More green space
- Overnight noise from students returning home drunk needs dealing with
- Central facility for LGB
- Remove zero rating for CIL on all city centre development
- All procurement for LAC/Projects to be sustainable and open to local SMEs
- We need a centralised facility for all – but especially over 50s LGBT people. There are estimated 32000 over 50 LGBT people with no facility to get help, advise, friendship. Isolation and loneliness is their life. Help is out there for other equality groups but no investment for this group of people.

### 3) What are your three most important priorities?

- Scrap HS2
- Support for unpaid carers i.e. a day off
- Be open and honest about what needs doing – we're all on the same side
- Need to keep the cycling friendly roads! And not bring back the cars.
- Policing, petty vandalism, traffic infringements
- Road cleaning, gutters
- Parking on pavements
- Create a community hub in the city centre
- (1) Recognise the city centre as a community. (2) Facilitate the key representatives to be able to meet and discuss priorities. (3) Stop ignoring issues raised by the city centre community.
- Engage meaningfully with partners to bring in expertise and money that SCC do not have.
- Traffic flows – reassess to cut bottlenecks
- Remove cars
- Affordable new housing!
- Flood protection
- Make it safe to walk around!!
- Embed sustainability in every council decision
- Public toilets – there aren't any. Where do desperate people go?
- Cladding
- Trauma informed outreach to street communities involved in ASB (street drug & alcohol use/acquisitive crime/begging)

## Broomhill & Sharrow Vale

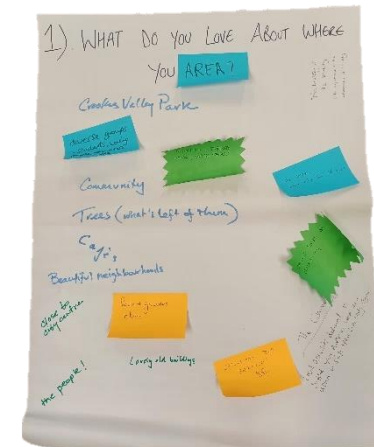

Broomhill & Sharrow Vale

### 1) What do you love about where you live?

- Crookes Valley Park
- Diverse groups – students, working people, volunteers etc.
- Diversity – students, locals, older people
- Community
- The trees especially the old ones
- Trees (what's left of them)
- Café's
- Beautiful neighbourhoods
- Close to city centre
- Parks and gardens and trees

Broomhill & Sharrow Vale

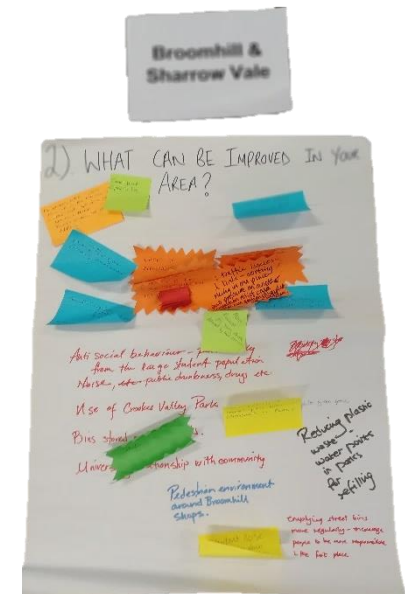

- The people!
- Lovely old buildings
- Excellent bus service! 52
- Strong sense of community
- The community. Local activities delivered to support young people to keep them active in safe space like Unity Gym
- The history of the locality – its importance in the development of the city

## 2) What can be improved in your area?

- Hunters bar traffic – transport plan for area to alleviate pressure?
- Employment opportunities
- Lack of affordable housing
- As someone who tries to do a lot in the community = less red tape from our council please. Things shouldn't be so difficult.
- More provision for young people delivered by local organisations
- E.V. charging for public spaces
- More local control over planning developments
- Student noise, rubbish at end of year, to let signs all year round. A ban on to let signs and protocol like Leeds please.
- Access to green space
- Traffic and pollution is the single most important issue in B & S
- What has happened to the traffic plan for Sharrow Vale Road (pedestrianisation)
- The traffic issues all link – sorting parking in one place puts pressure on another. Congestion relief in one place can cause congestion elsewhere. Need an overall plan.
- Antisocial behaviour – particularly from the large student population. Noise, public drunkenness, drugs etc.
- Use of Crookes Valley Park
- Bins stored on pavements
- University relationship with community

- Access to green space
- Reducing plastic waste – water points in parks for refilling
- Stop! Parking on pavements!! Cannot pass with wheelchair or prams
- Pedestrian environment around Broomhill shops
- Student noise – walking down from union
- Emptying street bins more regularly – encourage people to be more responsible in the first place
- More pedestrianisation and improving traffic – doing both without making the other worse

### 3) What are your three most important priorities?

- Preserving Sheffield's heritage
- Needed: cheaper and more frequent public transport – more smaller shuttlebuses. Need docking bikes. No CAZ (Clean Air Zone) – unless you want to kill the city centre even more!
- The Neighbourhood Planning Forum for Broomhill has a vision statement developed with the city – it is a starting point for priorities regarding planning.
- Small shuttlebuses to district centres i.e. centre to S. Vale, SV – Fulwood. Current big buses are not fit for purpose
- The right development in the right place with community informed and involved
- Pedestrianisation!
- Traffic calming/semi pedestrianisation -> total rethink and redraw up of parking in Sharrow Vale to suit all
- Monitoring planning applications
- Youth services
- More greenery
- To walk the streets safely – don't like the new street lights
- An accessible library for all users
- Late-night noise, mis-use of parks
- Trees = cross group coordination i.e. Env agency/Parks. Blue Loop: all seem to be having a toll on trees – where is a replacement programme for non-street trees?
- Action on the climate disaster

- Parking for permanent residents
- (1) Traffic (2) Pollution from traffic (3) Traffic & Pollution
- Active travel. Heritage MGMT/conservation. Habitat/natural environment. Community.
- (1) Finding agreed ways of dealing with traffic/pedestrian access/public transport
- (2) Better litter removal/bins being emptied
- (3) Arts and culture being part of neighbourhood planning
