

## Appendix 1b – Fire Risk Assessment Measured Term Contract Priority List & Nominal Budget Allocations

The sites below were prioritised from findings in the FRA as to the level of protection required to achieve compliance. Areas to consider that may raise a site's risk level, are if the building is 2/3 storey, if it is 'Listed', its construction type (Clasp), and if its occupants are vulnerable for any reason. All the above are considered in producing this list.

(Priority key: H, M, L = High, Medium, Low and H1 is higher priority than H2, etc.)
