

Scheme name / Q number / summary description							Value £'000	
<b>Quality Of Life</b>								
New additions								
Page 155	<b>Woodbourn Road Football Hub [Approval of procurement route only]</b> <b>Why do we need the project?</b> The Woodbourn Road Stadium offers an exciting opportunity to develop a football hub in the heart of the Darnall community, providing new and improved facilities for local people and ensuring a sustainable future. The project is also being developed as a real life test bed for the Football Foundation’s research into alternative infill/ design solutions for artificial grass pitches. The investment in Woodbourn Road Stadium would act as a catalyst for the improvement of this location, increasing usage and creating a hub site for football, athletics, sport, education and health and wellbeing activities in Sheffield.							0
	<b>How are we going to achieve it?</b> The project comprises the refurbishment of the athletics pavilion located adjacent to Woodbourn Road in the Attercliffe area of Sheffield and the development of eight small sided floodlit 3G Artificial Grass Pitches.  The current approval requested is only to go out to tender for the scheme in order to confirm prices, which will unlock Football Foundation funding to deliver the project. The costs of the project are currently estimated at approx. £2.6m. The approval to spend will be brought forward when Football Foundation funding is confirmed.							
	<b>What are the benefits?</b> The investment in Woodbourn Road Stadium would act as a catalyst for the improvement of this location, increasing usage and creating a hub site for football, athletics, sport, education and health and wellbeing activities in Sheffield.  The opening of the football facility will improve accessibility to improved playing pitches and ancillary facilities for all ages. Children and adults of all abilities and backgrounds will have the greatest possible access to outdoor sports and will therefore experience greater activity and sport opportunities							
	<b>When will the project be completed?</b> Currently estimated March 2023
