is in March 2023 and will be replaced by a new overarching Working Age supported Living, Activities Outside the Home (Day Services) and Short and flexible suite of services over a longer contract term will enable the local development opportunities to collaborate, share resources and reduce carbon footprint. The unique position to influence people they support by raising awareness of climate change in their everyday lives that will reduce carbon emissions. We expect all providers and complete an annual self-assessment to evidence how they are contributing to emissions. The co-benefits of provider and service user involvement will be: connecting with the local community, promoting active travel and healthy living (e.g. DIY) and raising awareness around energy efficiency

is in March 2023 and will be replaced by a new overarching Working Age Framework. In the following areas? Select all those that apply. Only complete the relevant sections.

<b>Influence</b>	Yes
<b>Resource Use</b>	Yes
